José Guerrero

Senior Front End Engineer

👤 Profile

I'm an experienced Front End Engineer that values and advocates for performance, accessibility & compliance, easy-to-use development workflows, automation, and in the end clean code.

I like to design architectures that make sense for the purpose, the scope, and the timeline.

I believe static is the future that why I'm a JAM Stack enthusiast and Contentful Certified Professional.

💼 Employment History

Senior Front End Engineer at Verndale, Quito

January 2021 — Present

I have been leading several department initiatives like CI/CD adoption, the creation of a Storybook.js UI library with accessibility, compliance, and test coverage in mind.

Front End Engineer at Verndale , Quito

June 2019 — December 2020

I was the Front End Engineer of enterprise clients in different industries like retail, higher education, healthcare, and finance. Developing complex clients side applications with strict compliance rules.
