

Efficient Product Rebates

Commercial Water Heating Rebate Guide

The following table lists the product requirements and rebates available for energy-efficient commercial water heating products.

If you are installing a split system (i.e. a system with an outdoor unit) for water heating, space heating or both, please use the heating worksheet and rebate guide.

* If your annual electricity consumption is less than 600,000 kWh (approx. \$6,000/month, not including demand charges) and you have not yet purchased your products, your business may qualify for rebates in addition to those listed here.

Heat Pump Water Heating

Measure	Criteria*	Rebate
≥ 40 gal and < 60 gal	<ul style="list-style-type: none">Energy Factor EF > 2.3Installation in heated spaces may not be eligible for incentives*Existing system must be an electric hot water system**Approval required before purchasingProduct must be CSA approved or equivalent certification for Canada	\$600
≥ 60 gal and < 80 gal		\$700
≥ 80 gal and above		\$800

*Other conditions may apply, please contact Efficiency Nova Scotia for more details.

*** If your annual electricity consumption is less than 600,000 kWh (approx. \$6,000/month, not including demand charges) and you have not yet purchased your product, the existing hot water system is not required to be electric.

Gas-fired Water Heating
