

# Efficient Product Rebates

## Commercial Pumping Equipment Rebate Guide

The following table lists the product requirements and rebates available for a range of energy-efficient pumping technologies.

Rebates that state availability as “in-store” have a rebate applied at the time of purchase at one of our participating distributor partners.

If your annual electricity consumption is less than 600,000 kWh (approx. \$6,000/month, not including demand charges) and you have not yet purchased your products, your business may qualify for rebates in addition to those listed here.

### High Efficiency Circulator Pump

Product	Availability	Max Power Input (Watts)	Product Requirements	Rebate
High Efficiency Circulator Pump	In-store	< 150W	<ul style="list-style-type: none"> <li>Utilizes permanent magnet motor</li> <li>Contains integral variable speed drive (VFD) which automatically powers, based on system demand.</li> </ul>	\$60
		150 - 499W		\$110
		500 - 2,500W		\$400

### High Efficiency Booster Pump

Product	Availability	Product Requirements	Rebate
Booster Pump System with VFDs	Mail-in	<ul style="list-style-type: none"> <li>New pump system hp must be greater than 5 hp (up to 50 hp) are eligible</li> <li>New pump system hp must be equal to or less than that of the existing system, but no less than 60% of existing system hp</li> <li>New pump system must contains variable frequency drive (VFD) which automatically powers, based on system demand</li> <li>Hp from backup systems (does not include standby configuration) is not eligible</li> <li>Please contact us for incentives on pumping systems over 50 hp</li> </ul>	\$2500+ \$300/hp reduced
