Mini-Split Heat Pumps - Rebate Eligible Units

Minimum Performance Standards

- To qualify for rebates, systems installed in Nova Scotia must appear on NRCan's Cold Climate Air Source Heat Pumps for New Brunswick & Nova Scotia.
- Systems must be registered with NEEP **and** meet the specifications and in the table below to be considered for the eligibility list.

New Minimum Performance Standards	
Specification	**All Efficiency Nova Scotia Delivered Programs**
Heating System Performance Factor (HSPF2) (Region V)	≥ 6.6
Seasonal Energy Efficiency Ratio (SEER2)	≥ 15.2
Coefficient of Performance (COP) at Maximum Capacity (5°F)	≥ 1.8
Capacity Maintenance (Maximum 5°F/Rated 47°F)	≥ 70%

Rebates

- **Moderate Income Rebates (MIR) and the Oil to Heat Pump Affordability (OHPA) Program** are both income pre-qualifying programs, you must apply to Efficiency Nova Scotia and receive approval prior to beginning retrofits.
- Apply to **Home Energy Assessment (HEA)** by booking an EnerGuide assessment with a Registered Energy Advisor. Please contact your Service Organization for a final assessment following completion of all upgrades.
- Look for a ✓ in all relevant columns of a heat pump system to maximize your rebates.
- Participation in multiple provincial programs simultaneously may affect rebate eligibility. Consult Efficiency Nova Scotia at **1-877-999-6035** before proceeding.
- **HEA and MIR** rebates are based on the "Rated Capacity Btu/hr (47°F)" and calculated on net added capacity (added capacity minus removed capacity).
    - **HEA** example: 30,000 BTU (2.5 ton) installed − 12,000 BTU (1 ton) removed = 18,000 BTU (1.5 ton) eligible for rebate ($450 HEA rebate)
- Please refer to the table below for rebate amounts. Visit the Efficiency Nova Scotia website, or call, to learn more about eligible rebates.
- Total eligible rebate amount will be capped at the cost of the upgrade.

Rebates		
Oil to Heat Pump Affordability Program	**Home Energy Assessment**	**Moderate Income Top-Ups**
All eligible costs up to $15,000 *(see below)*	$300/ton	$500/ton

Important eligibility criteria:

- Leased Equipment is not eligible for rebate.
- Installation must be performed by a certified Refrigeration and Air Conditioning Mechanic (RACM).
- Ducts and other heat pump equipment should be installed in conditioned spaces so that it operates as intended.
- Compact ducted and mixed-ducted mini-split, and replacement capacity (working or non-working) are not eligible for HEA or MIR rebates.
- Add on systems are only eligible for OHPA rebates when paired with a new electric furnace. Contact Efficiency Nova Scotia to confirm eligibility.
- **OHPA** rebates will only be issued for systems that meet the following criteria:
    - Designed to supply heat to the entire home, including basements that are 6 feet high or taller;

Last Updated: June 2026

Mini-Split Heat Pumps - Rebate Eligible Units

  - Minimum total "Rated Capacity Btu/hr (47°F)" of the system must be 12,000 BTU, or 1 ton;
  - Compressors must be of variable capacity with three or more distinct operating speeds, or continuously variable speed; and
  - Customer must purchase equipment from Canadian installers or distributors. This must be reflected on customer receipts.
- **OHPA eligible costs** include eligible cold climate heat pump systems **EXCLUDING add-ons paired with non-electric furnaces**, electrical/mechanical upgrades required to install the heat pump, expenses for safe removal/decommissioning of oil tanks, installing a back-up electric heating system, and electrifying other oil-using household systems e.g. domestic hot water.

List Summary

Oil to Heat Pump Affordability Eligible Units: 14,160

Home Energy Assessment & Moderate Income Eligible Units: 8,985
