Catalog Revisions

This Galvanize Catalog, California, is updated at least annually, but Galvanize reserves the right to revise it more frequently at its discretion. The most recent edition of the Catalog is the one posted on the Galvanize website, which can be downloaded at www.galvanize.com/regulatory-information. A copy of the current Catalog can be requested by sending an email to regulatory@galvanize.com or by calling the school at 415-805-1888. Such changes will not negatively affect currently enrolled students.

Location of Classes

All California in-person classes are conducted at our 44 Tehama Street, San Francisco, CA 94015 location or our branch locations at 6060 Center Drive #950 Los Angeles, CA 90045 or 18 S 2nd St, San Jose, CA 95113.

Ownership

Galvanize is a wholly owned subsidiary of Stride, Inc. The company headquarters is located at 1644 Platte Street, Denver, CO 80202. The officers of Galvanize are:

Harsh Patel	CEO
Patrick Neeman	CFO
James Rhyu	Director
Shaun McAlmont	Director
Vincent Mathis	Director

Accreditation

Galvanize is not accredited by an accrediting agency recognized by the United States Department of Education and is not eligible to participate in federal student financial assistance programs.

Galvanize does not offer any programs that prepare students for any official licensure exam in the state of California.

Galvanize is a private institution approved to operate by the California Bureau of Private Postsecondary Education and is in compliance with the standards as set forth in the CEC and 5, CCR.

Mandatory Bankruptcy Statement

Galvanize does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code.

Note to Prospective Students

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

Questions and Complaints

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the:

Bureau for Private Postsecondary Education
1747 N. Market Blvd. Ste 225
Sacramento, CA 95834.

or

Bureau for Private Postsecondary Education
PO Box 980818
West Sacramento CA 95798-0818
phone: 1-888-370-7589 fax: 916-263-1897
phone 916-431-6959 fax: 916-263-1897

www.bppe.ca.gov

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau's internet Web Site: www.bppe.ca.gov.

INTRODUCTION TO GALVANIZE

Galvanize Mission

Galvanize offers a re-imagination of professional and technical education. Our mission is to enable the next generation of data scientists and developers to gain access to practical, real-world skills that provide pathways into industry. Programs at Galvanize include the theoretical understanding of computer science, statistics, and software engineering, paired with industry-focused skills in visualization, business acumen, and the scientific method. Our primary focus is student outcomes, by providing the practical education students need to succeed in the new information economy.

In 2018, Galvanize Inc. acquired Hack Reactor, joining two of the strongest providers of immersive technology programs in their markets. With complementary operations Galvanize and Hack Reactor offer a diverse set of curricula to students and enterprise clients by optimizing operations and increasing overall size as a result of the transaction.

Mission Statement

Hold yourself and others accountable and responsible

Create for the future with pride, passion, and urgency

Win with trust, integrity, and inclusion

Be a team. Do your job. Be a pineapple

Continuously learn, grow, and hustle

Galvanize Educational Objectives

- Providing theoretical and practical learning based on industry needs and student feedback
- Cultivating an environment of student immersion and collaboration
- Employing qualified faculty who offer students personalized attention and professional expertise

PROGRAMS OFFERED

Galvanize Data Science Immersive ("DSI")

12 Weeks of programming delivered over 13 Weeks full-time, in-person program

Total lecture: 99.5 in-person hours; Total lab: 320.5 in-person hours

Total contact hours: 420 in-person hours

Program Description

Galvanize's Data Science Immersive program is designed for individuals who have most of the skills needed to obtain a position as a data scientist. The curriculum spans statistical analysis of data, software engineering, machine learning, and data engineering management. The tools and techniques that we teach are the ones that industry partners regularly tell us are most important in making decisions about hiring.

Program Outcomes

The Data Science Immersive prepares students to become data scientists. There are no license requirements for general work in this career field.

Class Schedule

Students are expected to be at Galvanize for Data Science instruction from 8:30AM – 5:30PM Monday through Friday for the full course. There are weekly evening events which students are strongly encouraged to attend. A class calendar with holiday closures will be made available to students during the enrollment process. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email.

Total Charges:

Total Tuition: \$17,980.00 includes:

Nonrefundable registration fee: \$250.00

Course deposit fee: \$2000 (required to pay upon enrollment)

Nonrefundable Student Tuition Recovery Fee: \$0**

*** Additional information provided in the catalog under the section “Student Tuition Recovery Fee”*

Galvanize Data Science Online Immersive

12 Weeks of programming delivered over 13 Weeks full-time, on-line program

Total lecture: 99.5 hours; Total lab: 320.5 hours

Total contact hours: 420 hours

Program Description

The Galvanize Data Science Immersive program takes the time-tested curriculum of the Galvanize Data Science Immersive and makes it accessible to students everywhere. Students learn from instructors face-to-face over video conference. The curriculum spans statistical analysis of data, software engineering, machine learning, and data engineering management. The tools and techniques that we teach are the ones that industry partners regularly tell us are most important in making decisions about hiring. We give them intimate access to teachers, a Help Desk that's ready to answer questions, and a strong peer community, all immediately available through messaging and video chat.

Class Schedule

Students will attend class via a live video conference Monday through Friday from 9am to 5pm Monday thru Friday for the entire 12 weeks of the Immersive. There is a scheduled meal break from 12:00PM to 1:00PM.

Total Charges:

Total Tuition: \$17,980.00 includes:

Nonrefundable registration fee: \$250.00

Course deposit fee: \$2000 (required to pay upon enrollment)

Nonrefundable Student Tuition Recovery Fee: \$0**

*** Additional information provided in the catalog under the section "Student Tuition Recovery Fee"*

Galvanize Data Science Online Immersive – Part Time

30 Weeks Part-Time, on-line program

Total lecture: 99.5 hours; Total lab: 320.5 hours

Total contact hours: 420 hours

Program Description

The Galvanize Data Science Immersive-Part Time program takes the time-tested curriculum of the Galvanize Data Science Immersive and spreads it out over 30 weeks of instruction, with an additional 2 weeks of break time built in. Students learn from instructors face-to-face over video conference. The curriculum spans statistical analysis of data, software engineering, machine learning, and data engineering management. The tools and techniques that we teach are the ones that industry partners regularly tell us are most important in making decisions about hiring. We give them intimate access to teachers, a Help Desk that's ready to answer questions, and a strong peer community, all immediately available through messaging and video chat.

Class Schedule

Students will attend class via a live video conference three times weekly. Twice during the week from 6:00pm to 9:00pm PST, and Saturday from 9:00am-2:00pm PST. Students are required to schedule an additional 5 hours of supported learning as required independent study during the week.

Total Charges:

Total Tuition: \$17,980.00 includes:

Nonrefundable registration fee: \$250.00

Course deposit fee: \$2000 (required to pay upon enrollment)

Nonrefundable Student Tuition Recovery Fee: \$0**

*** Additional information provided in the catalog under the section "Student Tuition Recovery Fee"*

Graduation Requirements

In order to qualify for graduation and successfully complete the Data Science Immersive, students should meet the attendance requirements, meet the minimum technical competency, and participate in the Career Services program.

- **Attendance:** Students are required to attend at least 85% of total class hours, all-inclusive (excused and unexcused absences combined.) Students must not exceed 3 unexcused absences throughout the course, or 5% of total class time.
- **Technical Competency:** Students are required to meet and maintain at least a 30% cumulative average on all assessments as outlined by the Data Science academic team
- **Career Services Program:** Students are required to complete all relevant activities in the

Career Services Program which could include tasks such as completing a resume and online profile, conducting mock interviews and phone screens with Galvanize staff and delivering a capstone project proposal to the lead instructor.

- **Delivery of Capstone Project:** In order to attain a Complete graduation status, a student must deliver a capstone project approved by Lead Instructor.

In order to graduate, students are also required to fulfill all financial obligations.

Hack Reactor Software Engineering Immersive ("SEI")

12 Weeks of programming delivered over 13 Weeks full-time, in-person program

Total Lecture: 49.5 hours, Total Lab: 526.5 hours

Total Contact Hours: 576 hours in-person

Program Description

The onsite immersive is built around learning advanced programming concepts and becoming familiar with industry-standard applications and tools. (Git, Backbone, Rails, Unix, and TDD testing frameworks.) The program provides a strong professional-support network starting at the application process extending through the student's job-search. This support leads to students garnering higher salaries, better benefits, and greater career satisfaction. We judge student outcomes by performance on technical interviews for relevant professional roles and job search success rate within six months of completing the program.

Program Outcomes

During the first half of the onsite immersive, students work through a large amount of new material, at an extraordinary pace. In the second half of the course, students deploy their newly acquired skills to build projects, while learning new technologies. By the time they graduate, students become autonomous engineers, capable of tackling unique problems, and building complex applications. We have developed the immersive program to help support students in achieving this end goal.

Class Schedule

Students will attend class Monday – Friday from 9am to 8pm and Saturday from 9am to 5:30pm for 12 weeks. The 12 weeks are split by one week without instruction, called "solo week", so students can work on personal projects, review lessons, or outline thesis projects with the assistance of mentors before entering the second half of the program. Students take a 1-hour study hall/lunch break from 12:30pm to 1:30pm daily and a dinner break from 5:30pm to 6:30pm and may take brief breaks throughout the day as needed. Students should communicate breaks with campus staff as extended breaks may count toward their total number of attendance points. Every other day, students are given an extended lunch break. During this time, they are encouraged to exercise and overall, regain a healthy work/life balance.

Total Charges

Total Tuition: \$17,980.00

Nonrefundable registration fee: \$250.00

Course deposit fee: \$2000.00 (required to pay upon enrollment)

Nonrefundable Student Tuition Recovery Fee: \$0**

*** Additional information provided in the catalog under the section "Student Tuition Recovery Fee"*

Hack Reactor Software Engineering Online Immersive

12 Weeks of programming delivered over 13 Weeks full-time, online program

Total Lecture: 49.5 hours, Total Lab: 526.5 hours

Total Contact Hours: 576 hours

Program Description

Hack Reactor Software Engineering Online (aka Remote) takes the time-tested curriculum of the Hack Reactor immersive and makes it accessible to students everywhere. Students learn from instructors face-to-face over video conference. They pair program with classmates throughout the course, so they are never working alone. We give them intimate access to teachers, a Help Desk that's ready to answer questions, and a strong peer community, all immediately available through messaging and video chat.

Class Schedule

Students will attend class Monday – Friday from 9am to 8pm and Saturday from 9am to 5:30pm for 12 weeks. The 12 weeks are split by one week without instruction, called “solo week”, so students can work on personal projects, review lessons, or outline thesis projects with the assistance of mentors before entering the second half of the program. Hack Reactor Software Engineering Online Immersive - Part Time

36 weeks Part-time, online program

Total Lecture: 49.5 hours, Total Lab: 526.5 hours

Total Contact Hours: 576 hours

Program Description

Hack Reactor Software Engineering Remote Immersive – Part Time (aka Remote Part Time, “RPT”) delivers the same curriculum as our Hack Reactor Software Engineering Immersive over 38 weeks consisting of 36 weeks of instruction and 2 “solo” weeks when students get additional time to work on solo projects with team support. RPT students have access to the Help Desk

and messenger services and all other software tools necessary for taking the course as stated above. Both curriculum and support are the same as provided by the Full Time Remote Program.

Class schedule

Students attend lectures and have designated pair-programming hours monitored by instructors for three hours, two times per week, and 5 hours on the weekend. Students are also required to complete an additional 9 hours of supported learning as required independent study during the week that they schedule at their convenience.

Total Charges

Total Tuition: \$17,980.00

Nonrefundable registration fee: \$250.00

Course deposit fee: \$2000.00 (required to pay upon enrollment)

Nonrefundable Student Tuition Recovery Fee: \$0**

*** Additional information provided in the catalog under "Student Tuition Recovery Fee"*

Graduation Requirements

In order to qualify for graduation and successfully complete the Software Engineering Immersive, students should meet the attendance requirements, meet the minimum technical competencies, meet the minimum soft skills competencies, and participate in the Career Services program.

- **Attendance:** Students must meet attendance requirements as outlined in the attendance policy.
- **Technical Competency:** Students must demonstrate minimum technical competency necessary for securing employment in a software engineering role as determined by the program's academic team.
- **Career Services Program:** Students are required to complete all relevant activities in the Career Services Program which could include tasks such as completing a resume and online profile, and conducting mock interviews and phone screens with Galvanize staff.
- **Delivery of Project Work:** In order to to graduate, a student must successfully complete all minimum project requirements as approved by their Campus Staff.

In order to graduate, students are also required to fulfill all financial obligations.

ADMISSIONS REQUIREMENTS & ENROLLMENT PROCEDURES

Each of Galvanize's immersive programs requires an application, and all candidates are interviewed before an enrollment decision is made. Galvanize welcomes qualified students and employees of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation and gender identity. Galvanize strongly encourages students from backgrounds underrepresented in the technology industry to apply.

Galvanize collects evidence of a high school or equivalent degree or higher before enrollment in a Galvanize program. Galvanize does not accept ability to benefit students.

Galvanize students must be at least 18 years of age.

Students must enroll in an entire Galvanize program, and no credits from any other institutions will transfer to satisfy successful completion of any part of our programs. Galvanize does not award credit for experiential learning towards completion of course requirements and has not entered into any transfer agreement with any other college, university, or school.

Galvanize does not allow late enrollment in an Immersive. A late enrollment is defined as an enrollment after the commencement of the first day of class.

For enrollment of those eligible to receive benefits under Title 38 and Title 10, USC., students will need to supply all college transcripts upon enrollment.

International Students/Visa Requirements

While Galvanize accepts international students, Galvanize does not assist with visa requirements, including but not limited to: visa reporting requirements (SEVIS) or any charges associated with applying for or retaining a visa.

Language of Instruction

Galvanize does not offer English as a Second Language instruction.

Our programs of study, textbooks, materials and all means of communication are delivered in English. All applicants are interviewed prior to acceptance, if there is a question regarding English language proficiency, the student will need to provide documentation of proficiency. Acceptable documentation of proficiency is:

- TOEFL iBT – with a minimum score of 'intermediate' for each section – reading, listening, speaking and writing.
- United States Foreign Services Language Rating System – minimum rating of 3.

Data Science Immersive (All)

To be considered for this program, students must be at least 18 years old and have a high school diploma or equivalent. Students must have some programming experience and excellent

communication skills. Programming experience can be either academic or with self-teaching. Students must be comfortable with college-level statistics and mathematics.

The application process includes an online application form and a technical assessment (Python and Statistics).

Hack Reactor Software Engineering Immersive (All)

To be considered for this program, students must be at least 18 years old and have a high school diploma or equivalent. Students must be able to demonstrate an understanding of the fundamentals of JavaScript, including a deep understanding of high-order functions.

The application process includes: an online application form, the completion of an online admissions challenge (JavaScript), successfully passing a Technical Admissions Assessment (JavaScript) and the completion of Pre-Course materials.

DEFERMENT POLICY

Admitted students seeking to defer to a later start date before the commencement of class must seek permission from the Admissions Officer at least 3 weeks prior to the course start date. Pre-start date deferment is contingent upon availability in the desired program. On or after the start date, student must follow the withdrawal and readmission policies if they wish to be admitted to a future start date.

READMISSIONS POLICY

Students who separate from a Galvanize immersive program and wish to be readmitted must reapply and satisfy all admissions requirements, including without limitation passing a technical interview and completing precourse requirements. Returning students are subject to the admissions requirements, tuition, fees, and program requirements in place at the time of their readmission. Readmission is not guaranteed and previous performance such as technical progress, accountability, and conduct may be considered. Pending review, Galvanize may request additional documentation, apply stipulations, or require completion of remedial requirements.

ACADEMIC ACCOMODATIONS

Galvanize does not provide accommodations that would fundamentally alter the educational program or academic requirements that are essential to a program of study. A fundamental alteration is a modification that is so significant that it alters the essential nature of the goods, services, facilities, privileges, advantages, or accommodations offered. Reasonable accommodations may be granted in circumstances as listed below.

Disability Accommodations

Galvanize is committed to providing students with disabilities equal access and participation in our programs as specified under applicable federal law. Consistent with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA), a disability is any

physical, learning, medical, emotional, mental health condition that limits a "major life activity" such as walking, hearing, seeing, speaking, breathing, or learning. We understand that disabilities can be visible or non-visible.

Students who seek accommodations related to a disability should contact the Accommodations Team at accommodations@galvanize.com. Students requesting disability accommodations engage in a collaborative process with staff that includes disclosing the disability(ies) and providing appropriate documentation when necessary. Detailed information regarding the process for requesting an Academic Accommodation can be found at galvanize.com/regulatory-information.

Religious Accommodations

Galvanize will make good faith efforts to provide reasonable religious accommodations to students who have sincerely held religious practices or beliefs that conflict with a scheduled course/program requirement. Students requesting a religious accommodation should make the request, in writing, directly to the Galvanize Accommodations Team at accommodations@galvanize.com with as much advance notice as possible. Being absent from class or other educational responsibilities does not excuse students from keeping up with any information shared or expectations set during the missed class. Students are responsible for obtaining materials and information provided during any class missed. The student shall work with their instruction team to determine a schedule for making up missed work.

PAYMENT INFORMATION

Payment is not required until an applicant has successfully completed the full admissions process and received acceptance into a Galvanize Immersive program.

An accepted student shall receive his/her Enrollment Agreement from a member of the Galvanize Enrollment Team. After reviewing the Enrollment Agreement and agreeing to the terms, an accepted student shall sign the agreement, and Galvanize will countersign.

Tuition

Total tuition for a Galvanize Immersive is \$17,980. In order to enroll in any Galvanize program an accepted student must pay an upfront deposit of \$2000, which includes a non-refundable registration fee of \$250. The \$2000 deposit is due at the time of signing the student enrollment agreement. Unless otherwise specified in your enrollment agreement, the balance of tuition (\$15,980) is due by close of business on the cohort start date, which is the first day of classes. \$.00 is currently being collected for STRF (a non-refundable charge). The estimated schedule of total charges, including institutional and non-institutional charges, is equal to the total tuition outlined above.

Payment Methods

Upfront / Direct Payment

Galvanize accepts the below methods of direct payment.

- ACH Bank Transfer
- Credit Card
- Check / Wire Transfer

Loans

If the student obtains a loan to pay for an education program, the student will have the responsibility to repay the full amount of the loan plus interest. Galvanize is not eligible to participate in federal student financial assistance programs. Galvanize does not provide 1098-T tax documents and students should seek the advice of a tax professional where necessary.

Income Sharing Agreement

Galvanize offers Income sharing agreements in select markets, subject to credit approval. Click [here](#) for more information.

VA Educational Benefits

Galvanize is eligible to receive Veteran's education benefits in select markets. Please contact vabenefits@galvanize.com with any questions or check out our Veteran's Training section for further information.

Other Third-Party Payment

Galvanize partners with several state workforce agencies and may be eligible to receive funding from your sponsor agency. Please have your agency contact reach out to us at regulatory@galvanize.com.

Scholarship Partnerships

The Galvanize Foundation, a 501(c)(3), partners with third parties and may not be available in every state. The Galvanize Foundation exists to make opportunities in technology available to all those with aptitude, drive and determination, not just those who went to the "right school" and got the "right degree". We award scholarships to help pay for skills training needed to enter the technology workforce. Specifically, we award scholarships to admitted Galvanize students in immersive web development and data science courses. We award scholarships to underrepresented populations in technology. We also assess financial need, and value diverse life experience and educational backgrounds. Our goal is to make immersive tech training more financially accessible for all qualified students.

The Galvanize Scholarship Fund

Education should be accessible to everyone, and to honor that commitment Galvanize is offering two full scholarships per cohort. Eligibility is open to everyone accepted to a Galvanize Immersive.

The scholarship covers the full cost of tuition to the program for our Galvanize Data Science Immersive or Hack Reactor Software Engineering Immersive, the Hack Reactor Software Engineering Online Immersive or the Galvanize Data Science Online Immersive.

Tuition Assistance

Galvanize is committed to helping individuals with the aptitude, drive and determination to pursue careers in technology. We provide numerous opportunities for financial support including lending partners, sponsorships, scholarships and veteran education benefits.

VETERANS TRAINING

For eligible individuals, we accept US Veterans with Vocational Rehabilitation benefits, commonly known as Chapter 31. Galvanize does not determine eligibility for this entitlement and complies with all regulations regarding this VA program. For more information, including VA disclosures, visit www.va.gov.

Additionally, certain programs of study at Galvanize select campus locations are approved by the appropriate state approving agency for enrollment of those eligible to receive benefits under Title 38 and Title 10, USC.

Galvanize Boulder & Denver - [Colorado Office of Veterans Education and Training](#)

Galvanize Austin - [Texas Veterans Commission](#)

Galvanize Seattle - Workforce Training and Education Coordinating Board's state approving agency ([WTECB/SAA](#))

Galvanize does not use erroneous, deceptive, or misleading enrollment and advertising practices to recruit student Veterans.

Galvanize, as a subsidiary of Stride, Inc., is of sound financial capability to ensure it will fulfill its training commitment. Please reference [Stride, Inc's Annual Reports](#) for additional financial information.

Galvanize does not and will not provide any commission, bonus, or other incentive payment based directly or indirectly on success in securing enrollment or financial aid to any persons or entities engaged in any student recruiting or admissions activities or in making decisions regarding the award of student financial assistance.

Active Duty/Reservist whom are called to duty, may be considered for a leave of absence if he/she is required to leave the immediate area. If the period of time needed exceeds that which is allowed in the leave of absence policy, and the future professional must withdraw due to their service agreement, the re-enrollment fee shall be waived providing the future professional returns within 30 days following the end of his/her service agreement.

In compliance with VA's 85/15 Rule, Galvanize will limit student enrollment to 85% veteran

enrollment per cohort. In the event that a veteran wishes to enroll in a class that has already reached the 85% cap, he or she may not use VA funding for that cohort. Chapter 35 and 31 students may still enroll even if the 85% has been realized.

VA Pending Payment Policy

In accordance with Title 38 US Code 3679 subsection (e), Galvanize adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <https://www.benefits.va.gov/gibill>.

This school will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the Institution.

However, to qualify for this provision, such students may be required to:

- Produce the Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

VA EDUCATIONAL BENEFITS - PRORATED REFUND POLICY

For students utilizing veteran's benefits through the Department of Veteran's Affairs to pay for tuition, the following additional refund conditions apply. Galvanize agrees that if a veteran student fails to enter the course, withdraws, or is discontinued at any time prior to completion of the course, the unused portion of paid tuition, fees, and other charges will be refunded or the debt for such tuition, fees, and other charges will be canceled on a prorated basis, as follows:

- a. Registration fee: An established registration fee in an amount not to exceed \$10 need not be subject to proration. Where the established registration fee is more than \$10, the amount in excess of \$10 will be subject to proration.
- b. Breakage fee: Galvanize does not collect a breakage fee
- c. Consumable instructional supplies: Galvanize does not charge for consumable instructional supplies

d. Books, supplies and equipment: Galvanize does not charge for books, supplies and equipment.

e. Tuition and other charges: Where the school either has or adopts an established policy for the refund of the unused portion of tuition, fees, and other charges subject to proration, which is more favorable to the veteran or eligible person than the approximate pro rata basis as provided in this section, such established policy will be applicable. Otherwise, the school may charge a sum which does not vary more than 10 percent from the exact pro rata portion of such tuition, fees, and other charges that the length of the completed portion of the course bears to its total length. The exact proration will be determined on the ratio of the number of days of instruction completed by the student to the total number of instructional days in the course.

f. Prompt refund: In the event that the veteran, spouse, surviving spouse or child fails to enter the course, or withdraws, or is discontinued there from at any time prior to completion of the course, the unused portion of the tuition, fees and other charges paid by the individual shall be refunded within 30 days after such a change in status.

Refund Table for Student(s) Utilizing VA Funding

Student entitled upon withdrawal/termination	Refund
10% of program completed	90% Refunded
20% of program completed	80% Refunded
30% of program completed	70% Refunded
40% of program completed	60% Refunded
50% of program completed	50% Refunded
60% of program completed	40% Refunded
70% of program completed	30% Refunded
80% of program completed	20% Refunded
90% of program completed	10% Refunded

The student may cancel this contract at any time prior to close of the third business day after signing the enrollment agreement.

The official date of termination for refund purposes is the last date of recorded attendance. All refunds will be made within 30 days from the date of termination.

The student will receive a full refund of tuition and fees paid if the school discontinues a course/program within a period of time a student could have reasonably completed it, except that this provision shall not apply in the event the school ceases operation.

Complaints, which cannot be resolved by direct negotiation between the student and the school, may be filed with the appropriate state authorizing agency; Bureau of Private Postsecondary Education.

POSTPONEMENT CLAUSE

The School may decide to postpone a program start date. Postponement of a starting date requires a written agreement signed by the student and the School. The agreement will set forth whether the postponement is for the convenience of the school or student, the deadline for the new start date, beyond which the start date will not be postponed.

If the course is not commenced, or the student fails to attend by the new start date set forth in the agreement, the student will be entitled to an appropriate refund of prepaid tuition and fees within 30 days of the deadline in accordance with the School's refund policy and all applicable laws and rules.

PRIOR CREDIT EARNED

Transfer of credits for prior training will be evaluated on an individual case basis and students will be required to submit official transcripts for evaluation. Credit for Prior Training is at the discretion of the enrolling school's administration.

Galvanize does not award credit for experiential learning.

TRANSFERABILITY OF CREDITS

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION

The transferability of credits you earn at Galvanize is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the certificate of completion you earn in Galvanize Data Science Immersive, Hack Reactor Software Engineering Immersive, Hack Reactor Software Engineering Online Immersive is also at the complete discretion of the institution to which you may seek to transfer. If the (credits or degree, diploma, or certificate) that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals.

This may include contacting an institution to which you may seek to transfer after attending Galvanize to determine if your certificate will transfer.

Galvanize does not guarantee the transferability of its credits/certificates to any other institution.

STUDENT TUITION RECOVERY FUND (STRF)

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 North Market Blvd., Suite 225, Sacramento, CA 95834 (916) 574-8900 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.

5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

CANCELLATION, TERMINATION, AND WITHDRAWAL

Student's Right to Cancel

The student has the right to cancel the enrollment agreement and obtain a refund of all tuition and fees paid, less the \$250 on refundable registration fee, through attendance at the first-class session, or the seventh day after signing the enrollment agreement, whichever is later.

Cancellation shall occur when written notice is given via email to admissions@galvanize.com, showing the student no longer wishes to be bound by the enrollment agreement.

If an applicant is denied admission, a full refund will be provided.

School's Right to Terminate

Galvanize reserves the right to terminate a student for unsatisfactory progress, failure to comply with the Galvanize Code of Conduct, nonpayment of tuition, or any other breach of the student's agreements with Galvanize. In such a case, the school will review the student's violation of the policy or agreement and if a dismissal is warranted, refund calculations will be based on the student's last date of attendance.

Refunds Due to Termination or Withdrawal

If a student withdraws or is terminated from the program after or on the first day of classes and has completed 60% or less of the program, the student is entitled to a pro-rated refund of monies paid. If the student withdraws or is terminated from the program after completing more than 60% of the program, the student is not entitled to a refund. Pro-rated refunds are calculated based on the number of days in the program and the number of days a student attended prior to withdrawal or termination. The refund calculation is based on the official date of termination or withdrawal. All refunds will be provided to the student within 30 days of termination or withdrawal.

Withdrawal Procedures

A student who wishes to withdraw from Galvanize on or after the commencement of classes should provide written notice by emailing their instruction team through the designated email indicated in the Student Enrollment Agreement.

LEAVE OF ABSENCE

Upon receiving a written request from a student, Galvanize may grant a leave of absence for a maximum of seven consecutive days for acceptable and unavoidable reasons.

A request for a Leave of Absence must be made in writing to the Program Lead before the beginning of the Leave of Absence, unless unforeseen circumstances prevent the student from doing so, and must include the reasons for the Leave of Absence. If unforeseen circumstances prevent the student from requesting the Leave of Absence in person, the student will be required to provide the required Leave of Absence request by email. The faculty team will evaluate the Leave of Absence request, and the student will be notified of the outcome of the Leave of Absence request by email.

The request will then be evaluated by the Program Lead and the student will be notified of the outcome of their request by email. A student who is granted a leave-of-absence will be assessed upon their return and assigned a new completion date.

If the student fails to return after the expiration of the leave of absence, the student will be withdrawn from the program, which includes the appropriate refund policy calculations, and the student's official withdrawal date will be the last date of recorded attendance.

ATTENDANCE REQUIREMENTS

Galvanize Data Science Immersive (All)

Regular attendance has a positive impact on a student's success in the program. Students are expected to be in class for all regularly scheduled class periods and to report to class on time. Instructors record attendance after class begins and after lunch.

Absences are considered excused if the student has communicated and approved by the instructor prior to the time of class, or if the absence is a result of an unforeseen emergency

(e.g. sickness) and the student has provided adequate documentation of the unforeseen emergency. Excused absences must be accompanied by a plan to complete missed work followed by evidence that the work has been completed. Excused and unexcused absences combined must not exceed 15% of the program.

Late arrivals, early departures and extended lunch leave without prior consultation with the instructor may be considered unexcused. Three partial unexcused absences equal one full day unexcused absence and will be counted towards the attendance policy noted above.

After a student has received three unexcused absences the student will be dismissed from the program.

Hack Reactor Software Engineering Immersive (All)

Hack Reactor's program is immersive, so missing a single day of instruction is highly likely to impede a student's academic success. We understand that absence is sometimes unavoidable, but we request that students let us know ahead of time when possible and have a really compelling reason. An absent student disrupts the cohesion of our classroom container so much that missing more than two days during the course, will trigger a discussion with the student about whether their learning goals can still be achieved.

With that in mind, an absence counts as three (3) points, a tardy is one (1) point and leaving early is one (1) point. Students enrolled in our Hack Reactor Software Engineering Immersive Program, Hack Reactor Software Engineering Online Immersive and Hack Reactor Software Engineering Online Immersive – Part Time are allowed a maximum of nine (9) attendance points. If a student exceeds the maximum of nine (9) attendance points, they will be dismissed from the program.

SATISFACTORY PROGRESS

Galvanize Data Science Immersive (All)

Data Science students will have regular weekly written assessments to check for understanding on the materials and skills covered in that week. A student's technical performance will be assessed and reported by the instructor on a weekly basis. Completion of academic learning modules is at the discretion of instructors such that the student is deemed capable of satisfying graduation requirements.

Students must receive 30 points or higher, cumulative average of all assessment tests.

Score	Indicator
0-10	Little/no mastery; little/no attempt to answer
11-20	Failed attempt
21-30	Some progress but insufficient mastery
31-50	Sufficient mastery with room to learn/grow

51-100	Above/Beyond sufficient mastery
--------	---------------------------------

This grading system allows for clear recognition of a struggling student and abundant opportunity for a successful student to explore a new concept in Data Science.

Probation

Students who receive fewer than 30 points, cumulative average on assessments will be placed on academic probation and required to show improvement before the following written assessment. A member of the educational team will inform students who are underperforming of their progress. If a student on probation continues to perform below this minimum level after the written assessment they will be dismissed from the program.

A student who is dismissed from the program due to unsatisfactory technical competency may reapply to a subsequent program after their original program has concluded.

Technical Competency

Students must complete class projects and homework and contribute to group projects as assigned. Galvanize does not assign grades, but feedback following formal assessments are distributed electronically to students by instructors. The instructor team will advise students who do not show adequate progress in class and/or during assessments, and an individualized learning plan will be discussed and created with the student. Completion of academic learning modules is at the discretion of instructors such that the student is deemed capable of satisfying graduation requirements.

Career Services Requirements

Galvanize Data Science Immersive focuses both on acquiring technical competencies, building an employment portfolio, and preparing to succeed in interviews for roles relevant to the course content. In order to complete the Galvanize Data Science Immersive program, a student must participate in the Career Services Program which could include such activities as; complete an **approved resume**; complete approved **online profile(s)** assigned by Career Services Team; **complete a mock recruiter phone screen** with Career Services Team and **technical interview** with a designated Instructor.

Graduation Standards

Failure to satisfy Attendance, Technical, and Career Services requirements and/or deliver an approved Capstone project can result in dismissal from the program and an inability to graduate from the program. Students that are not on track to graduate will be issued a written warning. Students who do not make progress towards meeting Graduation Requirements after appropriate intervention will be dismissed and will not graduate from the program.

Hack Reactor Programs (All)

This is a serious course for serious students. We expect students to work hard, act professionally and ask for help as needed. The program curriculum is divided into topical sprints, usually lasting anywhere from 1-3 days each. These sprints incorporate exercises that

help cement the concepts reviewed in lectures and assignments. We use assessments at the end of each sprint to monitor progress. If a student cannot pass the assessments, we will do everything we can to give them support, guidance, and further instruction. But, ultimately, assessments will determine whether a student graduates. Instructors will communicate guidelines to individual students during the course of the program explaining what in particular would be expected of them given these and other factors.

Evaluations are conducted throughout the program, including a midterm Summary Evaluation, and students must meet technical and soft skills standards. Failure to successfully meet the standards outlined in this section at any evaluation point will result in dismissal from the program.

Technical Skills

The program features periodic self-assessments that are tested by an automated system and then reviewed and graded by instructional staff. The system identifies students that may be having technical difficulties encouraging them to set up office hours with instructional staff. Additionally, staff will proactively monitor student results and reach out to provide feedback and help students refine their technical strategies.

The Technical Assessment is a full-day coding challenge at the halfway point of the Immersive Program. Both of these tests the knowledge and skills developed in the first half of the course. The Technical Assessment is a significant portion of the gating Summary Evaluation.

Soft skills

Students are regularly graded on a "[no] reason for concern" basis by staff observing students as they collaborate. Students with multiple "reason for concern" notes will be approached with written feedback and areas for improvement.

Summary Evaluation

The Summary Evaluation is a midterm evaluation of proficiency in the course, largely centered around the question "Would Galvanize hire this person onto one of our teams?" The Summary Evaluation takes into consideration technical proficiency, ability to successfully collaborate with pairs and groups, as well as student engagement with classroom requirements and expectations. The Summary Evaluation gates participation in the second half of the course. Students who do not meet the standards of the summary evaluation will be dismissed from the program.

Assessment Frequency and Evaluation

Assessments are typically conducted weekly, however Students' technical proficiency and soft skills are evaluated constantly, and instructional staff meet weekly to review individual student progress. Progress reporting typically occurs at the end of a sprint by way of self-assessments and directed feedback from staff.

Students receive a detailed testing analysis of their code from Spectator, our self-assessment

tool as well as individualized feedback from instruction staff throughout the program. Students receive a copy of their marks via email, with a red (X) indicating incorrect answers. Students are encouraged to schedule check-ins with technical staff as needed. Scoring a 2 or above on a 0-3 scale for all self-assessments demonstrates satisfactory technical progress.

Galvanize instructional staff conduct student evaluations, considering the student's project completion, assessment performance, communication and collaboration skills, and daily attendance in real time. A student who is struggling with the technical aspects of the Program may be offered remedial instructional exercises at any point of the program.

If the student is unable to demonstrate an ability to achieve satisfactory progress thereafter, they will be dismissed from the program. This is largely determined by an independent evaluation of the student's technical and soft skill capabilities. Dismissed students are provided a refund per our refund policy and may reapply to the program. They may be re-admitted as a new student if they are able to demonstrate a clear understanding of the foundational concepts required for admission.

Academic Intervention and Dismissal Policy

Hack Reactor is a fast-paced, rigorous and intensive program offered over a condensed period of time. If a student is unable or unwilling to meet expectations or achieve satisfactory progress during any portion of the program, Galvanize will conduct an evaluation of the student's assessments and soft skills and determine whether academic intervention is warranted. Intervention may include remedial coursework, increased frequency of staff counseling or an opportunity to defer to restart the program in an upcoming cohort.

Academic Intervention is discretionary and may not be available in every scenario. Under circumstances where Galvanize determines that Academic Intervention would not successfully address the student's academic deficiencies, the student will be dismissed from the Program and offered a prorated refund as required by law.

Hack Reactor Program Expectations (All)

This is going to be an amazing ride, but we need to set up some Expectations before we start in order to make sure everyone is able to work in a safe, productive environment.

1. **Be on time** - We need to start promptly. This means being ready to start on time, not just being present in the classroom container.
2. **Be present** - Because of our condensed schedule, missing a day is going to put you far behind. We understand that in some rare circumstances someone might need to miss a day, but we request that you let us know ahead of time when possible and have a really compelling reason. An absent member disrupts the cohesion of our classroom container so much that if a student misses more than 2 days during the course, we will discuss with the student whether learning goals can still be achieved. In some cases, absence may lead to withdrawal from the program.
3. **Be good students** - This is a serious course for serious students. We need you to work hard

and ask for help when you need it. We use assessments to monitor progress and, if you cannot pass the assessments, we will do everything we can to give you more support and instruction. But, ultimately, your assessments will determine whether you progress to graduation or not. If you cannot pass the assessments, you may be withdrawn from the program.

4. **Be respectful** - We are going to be around each other for many very intense weeks. It is therefore really important that we go out of our way to make each other comfortable. Belittling, aggressive, sexist, racist, or discriminatory language has no place in our learning environment.
5. **Have a good attitude** - At times, you may feel ahead of other students. At other times you may feel behind other students. However, we request that you keep a positive, engaged, and motivated attitude. The instructors are available to discuss any situation in which someone feels that their own or someone else's attitude is affecting their own or someone else's learning. We will do our best to help.
6. **No drinking** - You can't drink here, and you can't party here.
7. **Guest policy (onsite immersive only)** - We understand that you may want to bring friends or mentors to the space. We ask that you let us know ahead of time and check if it fits with the class schedule. Please do not invite 'drop in' guests.
8. **Be open and willing** - Hack Reactor is not like most educational experiences and we're going to ask that you bring an open mind and a good attitude to everything we do together. If you're not sure why we're doing things in a certain way, please let us know, but be prepared to be on board with a plan that you don't fully understand. Trust us.
9. **Take care of yourself** - We don't want you to burn out. Raise red flags with staff early if you feel like you are struggling or overwhelmed. Take care of your body, be healthy.
10. **Take care of space (onsite immersive only)** - All of us need to be respectful of the space and make sure that we are keeping it clean and enjoyable to be in.
11. **Follow the Code of Conduct**

We look forward to a really productive and educational course! If you feel that you cannot agree to any of the above, let us know and let's talk about it.

STUDENT RECORDS

Galvanize maintains student financial and academic records in digital format while students are enrolled in school. Upon completion of training, student records are merged and maintained in a digital format for no fewer than the minimum number of years required by law. Student records are stored within an encrypted records management system with the highest available levels of security. Only faculty and staff members who use this information in the course of their regular duties are given access to student records.

Graduates of the Immersive programs will receive a certificate of completion. Graduates may request a copy of their certificate of completion by contacting the School Administrator at ca.regulatory@galvanize.com.

STUDENT SERVICES

Galvanize offers industry connection services to students during their time of enrollment.

Guest Speakers: Industry leaders are invited to the program to discuss their careers and trending topics in the field.

Events: Several social and networking events are held each session for students to interact with industry professionals, potential mentors and hiring partners, and members of the Galvanize community.

Learning Resources: Students are encouraged to utilize the industry-standard cloud-based resources available online. These include Stack Overflow and GitHub. Included in the curriculum is instruction on how to access and properly utilize these resources, which are freely accessible on the internet.

Career Services & Employment Opportunities

Led by the Career Services representatives for each region, Galvanize provides job search skills programming, develops and manages relationships with external hiring partners, and hosts opportunities for students to actively engage and interview with those hiring partners.

While assisting in the job search, Galvanize makes no guarantee, expressed or implied, of future employment. Career services and job search assistance is not available for the Professional Development programs.

While Galvanize does not guarantee any job, credential, salary, or bonus for any graduate of our programs, we note that our gainfully employed graduates tend to fall under the U.S. Department of Labor Standard Occupational Classification (SOC) 15-1250 Software Developers, Programmers, and Testers and/or 15-2050 Data Scientists.

Current law prohibits any school from guaranteeing job placement as an inducement to enroll students. Students who are not authorized to work in the United States will receive placement assistance limited to interview preparation and resume review. Please contact the enrollment team for more details at: info@galvanize.com

Galvanize does not offer any programs that prepare students for any official licensure exam in the state of California.

Housing

Galvanize does not maintain dormitory facilities and does not offer assistance in finding housing. Galvanize does not assist and has no responsibility to find or assist a student in finding housing.

Galvanize San Francisco is located near many public transportation options, including bus and train stops. Students can find housing options within a commutable distance using online tools such as [craigslist.com](https://www.craigslist.com), [apartments.com](https://www.apartments.com), and [Airbnb.com](https://www.airbnb.com). Prices start around \$1,500/month.

Galvanize Los Angeles is located near bus stops, and paid parking is available in the area. Students can find housing options within a commutable distance using online tools such as [craigslist.com](https://www.craigslist.com), [apartments.com](https://www.apartments.com), and [Airbnb.com](https://www.airbnb.com). Prices start around \$1,500/Month.

PROFESSIONAL DEVELOPMENT PROGRAMS

Information and Policies

Technical Competency

Weekly in-class and take-home assignments are provided each week but Galvanize does not assign grades. Feedback is an integral part of the course and will be provided on each submitted project-based summative assessment. The instructor team will assist students that request assistance on the lessons and assignments. **Career services are not available for these programs.**

Attendance Requirements

There are no minimum attendance requirements. Students are encouraged to attend live-online sessions and access asynchronous program content in order to successfully complete the assessments required for graduation. Asynchronous participation is tracked in the learning management system.

Graduation Requirements

In order to qualify for graduation and receive a certificate, students must submit all formative assessments (non-scored) and successfully pass a mid-program and final summary assessment with a score of 70% or higher.

Equipment

Students will need a computer with a minimum of 8Gb of RAM, administration rights on their computer, a high-speed Internet connection, and unfettered access to the World Wide Web.

Faculty

Mike Rudinsky, B.A. Accounting & Finance, University of Arizona

Curtis Schlak, B.S. Mathematics, B.A. English, Santa Clara University; M.S. Computer Science, University of Houston

Daniel Billotte, B.S. Computer Science, Arizona State University

Tyler Bettilyon, B.S. Computer Science, University of Utah

Hack Reactor Microservices + Orchestration

6-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- The ability to write a three-tier database-backed Web application

Program Description

The Microservices + Orchestration program is designed for software developers that want to enrich their understanding of creating software applications with complex deployment topologies to meet massive scalability demands. With the advent of cloud computing resources, computer programmers were freed from the constraints imposed by inefficient corporate data centers. With the new resources came the freedom to establish new and innovative ways to create and deploy software. Thus, the microservices revolution began. Students will build microservice architectures from first principles to establish an in-depth understanding of the current best practices in the industry. Then, they will learn how to deploy, scale, and manage those microservices to guarantee resilience in a production environment.

Class Schedule

Six-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 12 sessions: six weeks running twice per week for 1.5 hours per session. There are 42 total hours (18 optional live-online / 24 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Microservices + Orchestration program provides students with modern best practices for building scalable and maintainable software applications with a service-oriented paradigm. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates skills and competencies in designing, developing, provisioning, and maintaining loosely coupled, tightly cohesive, horizontally scalable software systems.

Total Charges

\$1,800 (includes \$250 non-refundable registration fee)

Hack Reactor Methodologies + Requirements Gathering

6-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- Worked on a software development team of two or more people (including yourself)

Program Description

The Methodologies + Requirements Gathering program is designed for professional software developers that want a broader understanding of proven methodologies that they could use to facilitate the work of their teams. Determining what software needs to be built is still the hardest and most important part of software. Incorrect requirements are the costliest of all errors to make during the software development lifecycle. The agile software development movement was created to help streamline those processes. Students will learn the operational details of Scrum, XP, Kanban, ASD, AUP, DSDM, FDD, Kanban, Lean, Scrum, and XP. They then learn strategies and frameworks that can help them interact with customers to elicit requirements from them in the process known as knowledge mining.

Class Schedule

Six-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 12 sessions: six weeks running twice per week for 1.5 hours per session. There are 42 total hours (18 optional live-online / 24 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Methodologies + Requirements Gathering program provides students with practical exposure to twelve certified agile software development methodologies and frameworks to elicit functional requirements for software development projects. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates familiarity with using agile software development methodologies to facilitate the development of software.

Total Charges

\$1,800 (includes \$250 non-refundable registration fee)

Hack Reactor Algorithms + Data Structures

6-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- The ability to proficiently use a third-generation programming language

Program Description

The Algorithms + Data Structures program is designed for software developers that want insight into the design and application of algorithms and data structures to support it. Taking an algorithms-first approach, this class prepares students to identify time/space complexity of existing and their own algorithms and associated data structures. Students will learn when and how to apply these fundamentals in their day-to-day computer programming. They will review sorting and searching, then move into graph and weighted graph algorithms, combinatorial and heuristic methods, dynamic programming, intractability and approximation algorithms, and gain the ability to design their own algorithms. Students will be able to identify and find resources to solve numerical, combinatorial, polynomial, “hard”, geometrical, set, and string problems.

Class Schedule

Six-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 12 sessions: six weeks running twice per week for 1.5 hours per session. There are 42 total hours (18 optional live-online / 24 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Algorithms + Data Structures program provides students with fundamental computer science knowledge of problem solving. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates skills and proficiencies with a variety of algorithms and their associated data structures used to solve programming problems and answer technical interview questions.

Total Charges

\$1,800 (includes \$250 non-refundable registration fee)

Hack Reactor Computer Architecture + IoT

6-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- Must be able to proficiently write software in a modern computer programming language such as C++, Java, C#, Ruby, Python, or JavaScript (Node.js) and have used a debugging tool to evaluate and inspect running programs

Program Description

The Hack Reactor Computer Architecture + IoT program is designed for software developers that want to enrich their understanding of computing by learning about the design and assembly of computing components and devices. Knowing about how a computer works from its logic gates informs a software programmer about the code that they're writing, giving deep significance to what happens between the running code and what electrons do on the silicon.

Computer architecture is the study of the hardware-software boundary. Not quite electronics and not quite software engineering, computer architecture is the magic that allows us to harness the deterministic laws of physics and electricity and create computation.

Microcontrollers are small computers. They generally expose more of the hardware interface to users, and are typically used in embedded systems. Because of the raw and exposed design, microcontrollers can more readily be attached to commodity hardware components such as LEDs, infrared sensors, motion detectors, and all kinds of cool devices.

Class Schedule

Six-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 12 sessions: six weeks running twice per week for 1.5 hours per session. There are 48 total hours (18 optional live-online / 30 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Hack Reactor Computer Architecture + IoT program enriches the student's understanding of computing by learning about the design and assembly of computing components and devices. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates skills and competencies in the comprehension of the technical documentation of microcontrollers, how to program them, and the theory behind the circuitry involved in creating them.

Total Charges

\$1,800 (includes \$250 non-refundable registration fee)

Hack Reactor Networking + Reactive Programming

4-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- Must be able to program in a "server-side" language like Ruby, Node.js (JavaScript), Python, C#, or Java

Program Description

The ability to understand how networking works is a big deal. Networks are what make almost all possible modern programming possible. Getting a deep understanding of all of that is a delightful and daunting task. This class provides a journey from simply knowing how to connect to WiFi to understanding how computers communicate with one another in intimate detail.

Dealing with asynchronous information that comes from possibly multiple sources over a network can overwhelm the mental model of programmers attempting to handle the disparate information sources. This can manifest itself in a variety of ways, usually in intractable code that becomes impossible to understand and, therefore, impossible to maintain. To manage that, we introduce the concept of Reactive programming, a programming paradigm with an axiom that all things are asynchronous, to just deal with it.

Class Schedule

Four-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 8 sessions: four weeks running twice per week for 1.5 hours per session. There are 32 total hours (12 optional live-online / 20 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Hack Reactor Networking + Reactive Programming provides students with knowledge about how computers communicate with one another across a physical network and best practices to handle those data streams. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates skills and competencies in the design and configuration of network topologies to support network-enabled software applications along with best practices for maintaining the state of a graphical user interface.

Total Charges

\$1,400 (includes \$250 non-refundable registration fee)

DevOps + Testing

6-week duration part-time, remote program

Admissions Requirements

To enter this course, an applicant must have

- A high-school diploma or equivalent
- Must have professionally programmed for more than one year on production software

Program Description

Modern software development environments have tasked software developers to broaden their understanding of the software development lifecycle. Gone are the days of dedicated testing and sysadmin teams. Now, software developers are meant to understand the full pipeline of how code written on their computer gets into production, often being tasked with configuring the pipeline, as well. DevOps + Testing provides software developers a deep understanding of how to test software applications and how to reliably and repeatedly get their applications into production using a variety of modern tools and deployment targets.

Class Schedule

Six-week duration, meeting twice per week in 1½ hour sessions in a virtual classroom setting. This Part-Time Course is taught over 12 sessions: six weeks running twice per week for 1.5 hours per session. There are 48 total hours (18 optional live-online / 30 asynchronous) within the online classroom and the schedule is built around holidays, so no classes will be missed. When an unexpected closure occurs due to extraordinary conditions such as inclement weather, students will be notified as soon as possible via email and the missed Part-Time Course hours will be provided at another time.

Program Completion Competencies

The Hack Reactor DevOps + Testing program provides the student with a robust understanding of the modern best practices for deploying applications into production. There are no license requirements for general work in this career field. Students are provided with a certificate of completion upon completing program requirements. Completion of the program demonstrates skills and competencies in the implementation of automating the testing and deployment of software applications built for the Web and for the desktop.

Total Charges

\$1,800 (includes \$250 non-refundable registration fee)

CODE OF CONDUCT-ALL PROGRAMS

Students are expected to act maturely and demonstrate respect for others, for themselves, and to the larger Galvanize community. In order to foster a challenging and safe academic environment, students must:

1. Maintain professional relationships with fellow classmates, colleagues, instructors, community members, etc.
2. Show respect to others, themselves, and to the larger Galvanize community.
3. Be able to process constructive criticism and understand that this feedback is key to their overall learning experience.
4. Understand the impact of their behavior both upon the program and the entire Galvanize community.
5. Be courteous and responsive in dealing with others.
6. Freely accept the responsibility for and consequences of their conduct.
7. Communicate professionally if there are issues regarding conduct of themselves or others.

In addition, the following are not permitted and are subject to disciplinary sanctions:

1. Uncooperative or disrespectful behavior to your fellow classmates, colleagues,

instructors, community members, and visitors to the Galvanize campus.

2. Disruptive activity that causes the obstruction of the teaching, learning, or administration of Galvanize programs.
3. Violation of any term of the Galvanize Facilities and Portal Use Agreement, including damage to, or destruction of, Galvanize property.
4. Acts of falsity including, but not limited to, cheating, plagiarism, forgery, or other forms of academic dishonesty.
5. Theft of any kind, including seizing, receiving, or concealing property with knowledge that it has been stolen.
6. Using marijuana, tobacco, smoking on campus.
7. Possession of weapons, firearms, or illegal drugs at any time on school property.
8. Any other violation of published Galvanize policies, rules, regulations, or agreements, including the Galvanize Policy Against Harassment.

Any student may be temporarily suspended or permanently dismissed for violations of the Galvanize Code of Conduct, or program expectations.

Policy Against Harassment

Galvanize welcomes qualified students and employees of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation and gender identity to all the rights, privileges, programs and activities generally available through Galvanize. Consistent with its obligations under the law, Galvanize prohibits unlawful discrimination on the bases of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, or any other characteristic protected by applicable law in the administration of the programs and activities.

Galvanize also prohibits unlawful harassment including sexual harassment and sexual violence.

Harassment includes offensive verbal comments related to gender, sexual orientation, disability, physical appearance, body size, race, religion, sexual images in public spaces, deliberate intimidation, stalking, following, harassing photography or recording, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome sexual attention. Sexual and disruptive language and imagery is not appropriate for any campus, including Galvanize and member areas and cafes.

Students asked to stop any harassing behavior are expected to comply immediately. We expect students to follow these rules at all campuses and class-related social events. Our members, staff, and guests are also subject to this policy against harassment.

If you are being harassed, notice that someone else is being harassed, or have any other concerns, please contact Galvanize faculty or staff immediately. Galvanize faculty and staff will help students contact security or local law enforcement, provide escorts, or otherwise assist those experiencing harassment to feel safe.

Discipline

Violation of the Code of Conduct, Program Expectations or the Policy against Harassment may result in a written warning, but conduct deemed to be sufficiently disruptive or severe, such as harassment, violence, bullying, discrimination, or similar behavior towards another student, staff member, or community member, may result in immediate suspension or dismissal without prior notice.

School officials, in collaboration with instructors, will review each case and make a determination regarding if the behavior violated the above mentioned policies, and possible discipline up to permanent dismissal without the option for readmission.

GRIEVANCES

Stage 1: Informal Resolution

Basic steps in the informal process include:

- Begin by discussing the matter with the instructional staff, faculty, or person responsible for the class in which the issue originated.
- If the issue is not resolved, the next contact will be the Program Lead to investigate the issue and allegations.
- If you do not know where to begin an informal resolution, the Program Lead can help you identify the appropriate office or individual.

Stage 2: Formal Complaint

If unresolved after following the appropriate informal complaint procedures, the student may choose to have the complaint "officially documented." The student completes the Student Complaint Form located at: <https://www.galvanize.com/regulatory-information>

The complaint must contain the following information:

- Complainant's name, cohort name, mailing address, email address and telephone number.
- A detailed description of the specific actions that constituted the complaint and the names and titles of those presumed to be responsible or at fault. It is necessary to demonstrate that one has already attempted to resolve the concern through the informal procedures.
- The date(s) of the alleged improper activities or the condition developed.
- A list of witnesses, if any, including their contact information and the facts known by each. Documentation that supports the complaint if any exists.
- All communications between the student and Galvanize regarding the formal complaint will be directed to the student's email account provided in the complaint form.

Stage 3: Formal Complaint Resolution Process

Upon submission, the program's Director of Operations or his/her designee will investigate the complaint. The Galvanize staff member will acknowledge receipt of the complaint to the complainant within 3 business days. Complaints will be investigated and resolved within 14 business days of receipt. The staff member will advise the complainant if that timeline will not be met due to extenuating circumstances. If the student is not satisfied with the resolution made by the program's Director of Operations, the student may appeal to the Regulatory Team by emailing: ca.regulatory@galvanize.com

Stage 4: Appeal

Appeals to the Regulatory Team must be received within 5 working days following communication to the Complainant of the resolution. The Regulatory Team may request additional information from the complainant and any involved Galvanize staff. Complaints will be investigated and resolved within 14 business days of receipt. The Regulatory Team will

advise the complainant if that timeline will not be met due to extenuating circumstances, and issue a written determination of the appeal that shall be provided to the complainant and the impacted faculty or other individual. The Regulatory Team's determination shall be final.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau's internet Web Site: www.bppe.ca.gov.

FACILITIES

Galvanize has ten campuses located throughout the United States

Phoenix, Arizona – 515 E Grant Street Phoenix AZ 85004

San Francisco, California – 44 Tehama Street San Francisco CA 940105

Los Angeles, California - 6060 Center Drive #950 Los Angeles CA 90045

Boulder, Colorado – 1023 Walnut Street Boulder CO 80302

Denver Colorado – 1644 Platte Street Denver CO 80202

New York City, New York – 109 Nassau Street, 4th Floor New York, NY 10039

Austin, Texas – 119 Nueces Street Austin TX 78701

Dallas, Texas – 750 N Paul St Ste 301 Dallas TX 75201

Seattle, Washington – 111 South Jackson Street Seattle WA 98104

San Jose, California - 18 S 2nd St, San Jose, CA 95113

The Galvanize Administrative Office is located at 1644 Platte Street Denver CO 80202. The front desk can be reached at (303) 749-0110.

The normal hours of operation for the Galvanize – California location(s) are:

- Monday through Friday from 9am to 8pm.
- Saturday from 9am to 5:30pm.

Facility Descriptions

San Francisco

The Galvanize Soma location is 5 floors plus a basement (actively used) and a rooftop area.

There are multiple classrooms designed for student and Immersive requirements.

Each floor is lined with member companies renting space, and an atrium in the middle of each floor for assigned and unassigned co-working space. There is a café on the 1st floor and a kitchen space on each floor.

Los Angeles

The Galvanize Los Angeles location is on one floor. The floor is divided into a kitchen lounge, student computer stations, lecture area, and coffee/conference rooms for private meetings.

There is dedicated space for classrooms. One room has a door and can be sectioned as two teaching areas. The second area is a large, open space and will be used as a teaching area.

San Jose

The Galvanize San Jose location is located within CommonGrounds Co-working space in downtown San Jose. Our program is delivered in private, sound-isolated suites outfitted with industry-standard computer "pairing stations" that we use at all campus locations for the delivery of the Hack Reactor Software Engineering Immersive. Students have access to many membership benefits at CommonGrounds including use of shared kitchen space, and open seating throughout the building.

EQUIPMENT REQUIREMENTS

Galvanize Data Science (All)

Galvanize requires all Data Science Immersive students to provide themselves with a Mac or Ubuntu Linux machine with 4Gs of RAM and recommends a computer from the last 3 years. Galvanize can support students using OSX/ Ubuntu Linux machines. Galvanize is unable to provide technical support to students using a Windows machine.

Galvanize provides equipment, including full paired workstations with Mac mini computers, monitors, keyboards, and mice for the Data Science Immersive students.

Galvanize also maintains a professional GitHub account with electronic instructional materials, where students complete all assignments.

Hack Reactor Software Engineering Immersive (All)

The Hack Reactor SEI Immersive Programs use a custom learning management platform called Learn, which was built and is maintained in house by Galvanize staff. This helps us improve the platform constantly so we're always working with a better version of the software, and student-tested improvements.

Other software includes Slack, Zoom, GitHub, Google Hangouts, Appear.in, AwwApp, and Repl.it each supported by their respective companies. These applications are provided at no cost to the student.

Slack and email are the best means of communication to HR staff should there be any issues with Learn, or third-party software. Students primarily submit their work and assessments through GitHub, though some assignments are submitted via Google Drive. Both technologies allow staff to review and provide instant feedback on student work.

Students are required provide their own computers for the program. Student computers should support a Unix-based platform (like mac OS or Linux). If you choose to use Windows your computer must either; be able to run Ubuntu, and meet the following technical specifications 6GB of RAM, 20GB of drive space free, 2-core 4-thread processor, and 2GHz processor speed

OR run your computer must be able to run a dual-boot system for Ubuntu. Please note that these are the basic technical specifications, as these are comparable to the equipment currently used in the engineering field.

In order to ensure student success in the Hack Reactor Program, students must have adequate and reliable access to the internet for the duration of the program. Student must ensure that they are meeting the technical requirements of their Hack Reactor Program. If a technical issue affects your learning ability in the program staff will discuss alternatives with you. Additionally, students must actively participate in the program by keeping their webcam on during class time, except in extenuating circumstances (such as inclement weather or power outages).

Meaningful communication

Slack allows staff to connect with the students via instant messaging on a real-time basis. This means that there is no lag in messages sent and received. Students are expected to be monitoring their Slack messages during program hours for communications from students and staff. More personal interactions, whether one-on-ones, small group sessions, or live Q&As with the entire class, are done face-to-face via Zoom where the faculty and students have an opportunity to let their personalities shine. Video chats require full participation and engagement. This holds students accountable for their own learning and allows staff to identify any gaps in a student's understanding of the course materials. We also provide remote Help Desk support that allows students to quickly receive one-on-one support from staff if they need help or have questions about an assignment or concept via video chat.

PROPRIETARY MATERIALS

Any and all educational materials provided or furnished to students, electronically or otherwise, by Galvanize during the course of, or in furtherance of the student's participation in the Program ("Materials") belong to Galvanize and/or its licensors. Galvanize reserves all rights in the Materials and grants students a limited license to use the Materials during the period of their enrollment. Students understand and agree that they have no rights to any Materials, and agree that they will not reproduce or disseminate the Materials or use the Materials other than in accordance with their Student Enrollment Agreement.

RECORD RELEASE POLICY

Galvanize ensures the security and privacy of student records. As such, requests from third parties may require a written release from the student in order to disclose information. Exceptions to the requirement of a written release include situations in which Galvanize must release record information as part of its operations and in which the requested information is an item that Galvanize has designated as releasable without written consent.

Galvanize may release record information without a written release to individuals or organizations that fall into the below categories.

- Staff, instructors, or other individuals employed by Galvanize that have a legitimate interest in the record information in order to complete functions of their jobs.

- Officials of a state or federal regulatory body in compliance with an audit or other requirement.
- Third party service providers with which Galvanize has contracted to provide services.
- Officials related to a health or safety emergency.

The below items have been designated as information that Galvanize may disclose at its discretion. Information outside of the below list requires a written release from the student prior to disclosure to a third party. Galvanize will not provide information in response to employment recommendation requests outside of the below items, regardless of if a written request is submitted.

- First name
- Last name
- The name of the Program you attended
- Program completion status
- Dates of attendance

Galvanize offers live and remote programming delivered in person at our campuses and online using real-time video-conferencing platforms. Lectures and other programming may be recorded and used for quality assurance and promotional purposes.

COURSE DESCRIPTIONS

Algorithms

Students will learn a process for writing solutions to complex computational problems. A tool for visualizing chess board positions will support students in exploring the classic 'N-Queens' algorithms problem.

Authentication

Students will learn the basics of web security and user authentication by implementing a secure login system in a web application.

Blue Ocean

Blue Ocean is a workplace simulation that mimics a small Agile software engineering environment. This is a greenfield group thesis project where emphasis is placed on team dynamics, Agile practices, Github workflows and modern development and deployment workflows, while introducing user acceptance and client/developer relationships. At the start of the week-long project, students join Blue Ocean Consulting and are introduced to a client who needs an application developed for them. Students must work closely with their team and with the client to ensure that the project is scoped properly and delivered on time using an Agile workflow.

Browser apps, jQuery, and AJAX

Students will learn about HTTP, RPCs, REST, and the other mechanisms of how internet traffic is transmitted and digested. Using jQuery, students will practice getting data from a server without a page refresh by building an application that interfaces with the Parse API as a backend.

Career Week

During this week, students will learn how to search for and apply to software engineering jobs. Students will learn about the entire job-search process from cover letters and phone screens to salary negotiations and offer letter reviews, all the while finalizing their professional portfolio, practicing their interviewing skills and brushing up on fundamental computer science and problem-solving concepts most likely to be found in modern software engineering job interviews. During the latter part of the week, students will begin applying to their very first software engineering positions with the support of their fellow cohort mates, and guidance from their instructional staff.

Databases

Students will store data persistently using the languages provided by database packages, including both traditional relational models (e.g. SQL) and more recent non-relational technologies (known commonly as “NoSQL”). Students will also learn to build their own ORM, a technique for shortening the gap between in-memory programs and the Database interface.

Data Modeling and Classes

By implementing basic data structures like stacks and queues, students will learn some of the fundamentals of software engineering, including abstraction and data modeling, as well as how those tools are used in a complex application. Students will also dive into standard code sharing patterns, including object-oriented classes and mixins, and 4 different class instantiation patterns available in JavaScript.

Data Structures and Complexity Analysis

Students will dive into advanced data structures by learning to build and implement hash tables, graphs, trees and linked lists while leveraging Big O Notation to assess and describe the computational complexity of the methods associated with each of these data structures. Students will complete this module understanding advanced data structures and be equipped to select the right data structure for solving a problem with a deep understanding of how to assess time complexity tradeoffs.

DS 101: Programming for Data Science

Programming for Data Science introduces students to development workflow, pair programming, and data science tools including python, pandas, matplotlib, linear algebra, and numpy.

DS 102: Statistical Inference

Statistics and Probability helps students review probability and introduces them to bootstrapping, the central limit theorem, and hypothesis testing.

DS 103: Bayesian Statistics

Bayesian Statistics will introduce students to the differences between the frequentist and Bayesian statistical approaches. Students will learn Bayesian inference and testing.

DS 104: Data Engineering

Data Engineering will introduce students to working with Big Data and concepts efficient computing. These include current big data technologies.

DS 105: Supervised Learning

Supervised Learning offers students the opportunity to review and strengthen skills from DSI 101, DSI 102, and DSI 103, and build upon them by introducing the most popular and widely used, up-to-date data-science algorithms.

DS 106: Unsupervised Learning

Unsupervised Learning introduces students to the most popular and widely used unsupervised techniques in Data Science.

DS 107: Natural Language Processing

Natural Language Processing (NLP) introduces students to basic NLP methods and commonly used algorithms using NLTK and scikit-learn.

DS 108: Recommendation Systems

Students will learn techniques for building some of the most commonly used recommender systems used in Data Science.

DS 109: Neural Nets

Neural Nets introduces students to the basic multilayer perceptron and how that translates to more complex neural net systems. They will learn to train from scratch as well as apply transfer learning to neural net models.

DS 110: Special Topics

Special Topics will cover additional relevant advanced data science algorithms and tools.

DS 111: Capstone 1

In Capstone 1, students focus on building a projects based on DS 101 - DS 104, practice presenting their projects, prepare for interviews, and practice. Instructors approve project proposals prior to student construction, to ensure that the project displays a cumulation of skills acquired in the program and that the project is appropriate for the job market.

DS 112: Capstone 2

In Capstone 2, students focus on building a projects based on DS 101 - DS 107, practice presenting their projects, prepare for interviews, and practice. Instructors approve project proposals prior to student construction, to ensure that the project displays a cumulation of skills acquired in the program and that the project is appropriate for the job market.

DS 113: Capstone 3

In Capstone 3, students focus on building a projects based on the DS 101 - DS 110, practice presenting their projects, prepare for interviews, all culminating in a showcase presentation. Instructors approve project proposals prior to student construction, to ensure that the project displays a cumulation of skills acquired in the program and that the project is appropriate for the job market.

DS 114: Career Services

In Career Services, students will learn how to job search in the Data Science field. They will learn about the entire job-search process from cover letters and phone screens to salary negotiations and offer letter reviews, all the while finalizing their professional portfolio, practicing their interviewing skills and brushing up on fundamental data science and problem-solving concepts most likely to be found in modern data science job interviews. Additionally, students will begin applying to their first data science positions with the support of their fellow cohort mates and guidance from the instructional staff.

ES6, APIs, and React

Students dive into the largest codebase yet, building a video player using the popular React library and features in the latest major version of JavaScript: ECMAScript 6. Students will learn

how to think about web apps as components and gain more exposure sending AJAX requests to REST APIs by populating their applications with real data from YouTube.

Front-End Capstone (FEC)

Students will be formed into working groups and spend two weeks developing features on a complex web application designed using a micro-service architecture. Students will emulate the day-to-day work of a software engineering and learn about project management, group dynamics and collaboration, product design, software architecture design, server-side rendering and production-level systems. Students will complete this project with a thorough understanding of how front-end engineering teams work together to build complex web applications.

Full Stack Overview

Students will revisit all of the technologies and concepts they've learned thus far in the course and put it all together in the form of a full-stack JavaScript web application. Students will learn how to holistically design and craft a full-stack application using the design patterns, frameworks, libraries and tools they've seen up to this point.

Inheritance Patterns

Students will learn about class inheritance and how to implement subclassing for each of the four instantiation patterns covered earlier in the course. Students will do so by writing a graphical, in-browser application that makes use of various object-oriented code sharing patterns.

Mini Apps I

Students will practice the rapid development of miniature web applications to perfect the skill of connecting together the front-end and back-end, all while learning to adapt to the time constraints commonly found during software engineering job interview processes.

Minimum Viable Product (MVP) – Project

Students will build their final project of the course by following the MVP mindset – Minimum Viable Product. Ambitious time constraints will be placed upon students to build fully functional software that meets specifications that they design. Students will apply the experiences they had from previous projects to set and meet goals, following project management standards and sound software architecture design principles.

Orientation & Precourse Review

Students will get acquainted with their fellow cohort mates and learn the structure and rules of the Hack Reactor Software Engineering Immersive at Galvanize while reviewing the Pre-Course curriculum at lightning speed. Students will revisit scopes, closures, and the keyword “this” modules.

Professional Resume

Students will learn how to write a professional resume and best present their skills and projects. By the end of this module, students will have completed the first draft of their software engineering resume that they will continue to refine with feedback from instructional staff each week until completing the course.

React with Redux

Students will refactor their previous module to implement Redux, a popular state management library, often coupled with React in larger, more complex applications. Students will gain comfortability with refactoring a codebase to use a technology that helps reduce complexity and technical debt.

REST & CRUD

Students will gain a deeper understanding of the design patterns used in server-side code by implementing an API that complies with REST principles. For the first time, students will write front-end and back-end code, learning to plug together all the usual facets of modern web applications.

Servers and Node

Students will build a custom backend in Node.js to replace the Parse API from the codebase used in a previous module. Students will learn the ropes of Node.js, routing, and how to debug server-side code effectively.

System Design Capstone (SDC)

Students will be formed into working groups and be tasked with taking a front-end project to full back-end functionality and scale. Through learning about the principles of large-scale systems design, students will explore how engineering teams prepare and launch software at scale to millions of users. By deploying stress testing, students will tweak and optimize their web applications at every identifiable bottleneck (from user page load to database query) to create high-performing software while replicating the processes of a production-grade engineering organization. Students will complete this project feeling prepared to participate and contribute to a real, world-class engineering team.

Technical Assessment

Students will undergo a day-long coding challenge that tests the skills and knowledge that they were expected to master during the first half of the course. This assessment contributes as a significant portion of the Summary Evaluation, which means failure to perform sufficiently on the Technical Assessment could result in a student being unable to proceed with the remainder of the course.

ACADEMIC CALENDAR

Galvanize observes the following Holidays:

New Year's Day	January 1, 2021
MLK Day	January 18, 2021
President's Day	February 15, 2021
Memorial Day	May 31, 2021
Independence Day	July 5, 2021
Labor Day	September 6, 2021
Thanksgiving	Nov. 25 and 26, 2021
Christmas	N/A
New Year's Eve	N/A
Winter Break	Dec. 27 - 31, 2021

Program Name	Start Date	End Date	Campus Location			
			Los Angeles	San Francisco	San Jose	Remote
Galvanize Data Science Immersive; Galvanize Data Science Online Immersive	Oct. 5, 2020	Jan. 15, 2021	✓	✓		✓
