Investment Objective

The fund is a Retail Investor Hedge Fund aiming to provide investors with long term positive real returns that are uncorrelated to the South African Capital markets. The benchmark for the portfolio is the STeFI composite index. The Fund can invest in a wide range of assets, such as shares, bonds, listed property and cash, both in South Africa and internationally. The Fund's absolute equity exposure is limited to 200% (2x gearing) of the total net asset value of the portfolio. The fund may invest in derivative instruments.

Investment Approach

The investment approach is rooted in detailed fundamental analysis of the underlying investments focusing on: sustainability of the business model, quality of management, corporate governance, predictability of cashflows, Balance Sheet strength and a compelling valuation.

Fees (incl VAT)

Service Fee	0.28%
Performance Fee	0.00%
Total Expense Ratio (TER)	6.53%
Transaction Costs (TC)	0.40%
Total Investment Charge (TIC)	6.93%

Manager Commentary

For the quarter the fund gained 3.5%, while the All Share and Capped Shareholder Weighted Index (Capped Swix) both gained 9.6%. For the year to date the fund is up 4.6% while both indices are up 15.9%

The quarter was driven by continued positive sentiment towards South Africa following the formation of the Government of National Unity. The consumer discretionary, industrial, financial and property sectors all performed well, while resource, energy and consumer staple sectors underperformed.

In the portfolio our best performing positions were Momentum Group, Discovery, Pepkor, Truworths and Naspers, while the main detractors were all in the Resource sector.

This quarter saw the beginning of what we think will be a multi-quarter rate cutting cycle. Coupled with the sentiment tailwind, which we expect to turn into actual tailwinds early in 2025, we are positioning the fund towards more discretionary and South Africa facing (industrial and construction) companies and reducing less volatile consumer staple areas.

At quarter end the fund's net equity exposure was 24%, while gross exposure was 36%.

Glossary

Performance Fee	The fund charges a performance fee of 20% of the amount by which it outperforms the hurdle rate, STeFI. The performance fee is payable quarterly in arrears. A high water mark principle is applied in the performance fee calculation.
Transaction Costs (TC)	TC is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.
Total expense ratio (TER)	TER reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Total investment charge (TIC)	The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns.
Max Drawdown	The maximum loss from a peak to a trough before a new peak is attained. Maximum Drawdown (MDD) is an indicator of downside risk over a specified time period.
Standard Deviation (Std Dev)	A measurement of dispersion of a dataset relative to its average. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.
Sharpe Ratio	A measure of risk-adjusted performance. Calculated by dividing the annualized excess returns over the risk-free rate by Std Dev.
Beta (Bull and Bear)	Bear/(Bull) Beta is a relative measure of the sensitivity of the fund's return to negative/(positive) changes in the benchmark return. It shows to what extent negative/positive periods of performance of the fund are reflected by corresponding negative/positive periods of performance in the benchmark.

Investor Information

Leverage: Sources, value and providers of leverage	The fund employs short positions in equities and market indices as leverage. Short positions as a percentage of fund value at quarter end: 10.0% Provider(s) of leverage are the fund's asset manager: Mazi Asset Management
Exposure Limit	Effective exposure is limited to 4 times the value of the fund.
Highest Exposure Value over the quarter	The maximum allowable exposure is 4 times the value of the fund. The maximum exposure over the quarter : 1.2
Exposure value at quarter end	1.1 times the value of the fund. The maximum allowable exposure is 4 times the value of the fund.
Re-hypothecation strategy	The Prime Broker is prohibited from rehypothecating and from repledging any securities that form part of the fund's collateral.
Stress testing applied	A series of stress tests are performed that changes the underlying price or yield of every security in the portfolio and revalues each one from first principles, according to the size of the user-defined stress. We also determine what percentage of the portfolio can be closed out over time bands.
Counterparty Exposure	Not applicable since no CFDs are used (Contracts for Difference)
TIC: Period (Annualised, rolling three-year period): 01 April 2021 to 31 March 2024	1. TER 2.96% + TC 0.58% =TIC 3.55% as at 31 March 2024. The total investment charge (TIC) is the percentage of the portfolio that was incurred as costs relating to the investment of the portfolio. It is the sum of the total expense ratio (TER) and transaction costs (TC), including VAT. 2. TER is the percentage of the value of the portfolio that was incurred as expenses to the administration (charges, levies and fees) of the portfolio. TER is calculated over a rolling three- year period (or since inception, where applicable) and annualised to the most recent calendar quarter. Inclusive in the TER, the stated performance fee percentage of the net asset value of the class of portfolio was recovered. 3. TC is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.
Changes to portfolio liquidity risk over the quarter	None
