

## DV100

### Dual View Dumper

The measure of class and safety.

The powerful engine combined with the high payload (up to 10 tons) combine high material handling with the pulling power it needs. Efficiency utilized to the maximum. And the high safety precautions of the machine such as the entry in signal color, the hill-hold function for mountain travel or the special reversing tone prevent accidents and inattentiveness. This size is a real must-have on the construction site. More power, more bite. With the larger engine, you immediately feel the power during all work and on the road. More tractive force and better acceleration, on any terrain.

### Highlights

- Swiveling operator's seat with plenty of legroom
- Seat belt monitoring with start release
- Fold-down armrest for entry and exit from both sides
- 10-ton payload
- Active Sense Control
