Daktarin Aktiv Spray Powder (miconazole nitrate) Product Information

Presentation:

Cutaneous spray powder containing miconazole nitrate 0.16% w/w.

Uses:

For the treatment and prevention of athlete's foot.

Dosage:

Apply to infected area twice daily until lesions are healed. For cutaneous use.

Contraindications:

Hypersensitivity to the active substance(s), other imidazole derivatives or to any of the excipients listed in SPC section 6.1. Not to be used on hair infections, nail infections or broken skin.

Precautions:

The spray should be kept away from the eyes and mucous membranes. If a reaction suggesting hypersensitivity or irritation should occur, the treatment should be discontinued. This product contains talc. Avoid inhalation of the powder to prevent irritation of the airways. In particular, when treating infants and children, careful application should be used to prevent inhalation by the child. This medicine contains 255 mg (10% w/w) ethanol in each gram powder. It may cause burning sensation on damaged skin. Miconazole administered systemically is known to inhibit CYP3A4/2C9. Due to the limited systemic availability after topical application, clinically relevant interactions are rare. However, in patients on oral anticoagulants, such as warfarin, caution should be exercised and anticoagulant effect should be monitored.

Pregnancy and Lactation:

Use with caution. Consult a doctor prior to use.

Side effects:

Very rare: anaphylactic reaction, hypersensitivity, angioedema, urticaria, contact dermatitis, rash, erythema, pruritus, skin burning sensation.

Rare: application site reactions including application site irritation.

Please refer to Summary of Product Characteristics for detailed information.
