

# **Future generations of polar bears and people depend on the decisions we make today.**

---

*The key to saving sea ice for polar bears and getting the climate back to functioning the way it should is to get away from using fossil fuels for energy altogether.*

Here's how you can get involved →

# TOP ACTIONS

## to save our sea ice

### Vote and speak up

The most important action you can take is to vote with the climate in mind, in each and every election. Also let your representatives know you support bold climate action.

### Support an energy shift

Get involved in community projects that reduce or replace fossil fuels with clean energy sources like solar and wind. Also research renewable energy options available to you.

### Talk about it!

Open up and *talk* about climate change (and climate solutions) with friends, family members, and colleagues.

### Promote clean transportation

Support community projects aimed at reducing the number of vehicles overall, such as car sharing programs and mass transit programs.

### Build a better future

Encourage energy-efficient construction standards, including better heating and cooling systems, insulation, and lighting methods.
