Hello, my name is Bas Klinkhamer.

I am a Frontend Developer, Scrum Master, and maybe your new colleague?

I am a developer on a mission, with a passion for stouts & porters, post-rock, and good books.
I stack **HTML5**, **ES6+/TS** and **CSS Vars** using webcomponents or a framework like **Vue** or **LitElement**, or by creating hybrid solutions with **React Native** or **Electron**.

I'm a strong proponent of Agile development and work as a Scrum Master to help my team reach their goals. I'm currently 32 years old, living in Den Haag, NL with my wife Marleen.

Consultancy

viaBOVAG.nl
apr '22
Bunnik, NL

viaBOVAG.nl allows it's visitors to find their next car by looking through all of BOVAG's car-dealers within seconds. The Apollo team manages and maintains the platform and implements new features for both visitors and platform-managers. Recent projects include an overhaul of the old MVC platform to a JS-based SSR-stack and implementing a headless CMS.

→ NextJS
→ Typescript
→ Headless CMS
→ Platform

NN Group
jan '22 — apr '22
Den Haag, NL

NN Group pivoted their app team towards a platform-based approach. Our new team set out to support all app-contributors with a single, dependable tech-stack. We collected and reviewed needs and wants from all stakeholders and converted them into a standard dev-toolkit, which generated deployable units that enforced the NN Ops guidelines.

→ AWS Lambda
→ Serverless
→ React Native
→ DevSecOps
→ Platform Architecture

VGZ
jan '21
Arnhem, NL

The IML team is tasked with implementing a new way of working for Datacare at VGZ. As part of this team I help bring the transition to micro-frontends and -services by developing a new platform based on Azure. I developed custom tooling based on, amongst others, LitElement and a custom NodeJS CLI-tool. The team operates as a "competence center" for these new techniques.

→ LitElement
→ WebComponents
→ CI/CD
→ NodeJS
→ CLI
→ Architecture

Consultancy

NN Group
mar '20 — dec '20 → AWS Lambda → 3rd Party API's
Den Haag, NL → Serverless → Pipelines
→ React Native

ING Bank
aug '19 — mar '20 → LitElement → NodeJS
Amsterdam, NL → WebComps → Communication
→ ESNext → DevEx

TWC R&D
feb '19 — aug '19 → Vue → Components
Budapest, HU → Streaming → REST
→ Electron → Communication

Royal Dutch KLM
jan '18 — oct '18 → Angular → REST
Schiphol, NL → NodeJS → BDD
→ JWT → Cypress

KPN

Derk → NodeJS → Koa
→ Vue → TypeORM

Barista.app
A set of apps that allowed teams to get coffee on the run.
oct '18 — dec '18 → Ionic → SocketIO
Personal → Electron → Tray-app

Hobbies & Personal Life

I like to tinker with IoT devices, NodeJS, and new web technologies.

I work to improve myself and my colleagues, and to earn the money I spend travelling Europe and the world. In 2019 I took a long holiday to Australia and I enjoyed a year of working in Hungary, which taught me to make the most out of the least amount of stuff.

I enjoy my books and vinyl records, and I'm a sucker for dark beer, a good podcast and Formula 1.

I also keep a blog on **www.bas.earth** with new tricks I've learned and stuff I have done away from my keyboard. You'll find more info on the experiences shortlisted on this page there as well.
