

# **CPMA®** Auditing Training Course Syllabus

Prerequisites: Minimum of two years coding experience and coding certification strongly recommended.

<u>Clock Hours:</u> 20 (*Note:* 20 clock hours accounts only for time spent in the online course, and does not include time spent outside the course or study time. Study time will vary widely per individual.)

<u>Course Length:</u> To be completed at student's own pace within a 3-month period or less. Enrollment date begins at date of purchase. Monthly course extensions may be purchased.

<u>Class Hours: Days/Times Per Week:</u> Online course, independent self-study, no classroom meetings; student may login to course at their own time schedule, no specific login times.

#### **Certificate of Completion Issued:** Yes

**CEUs:** 20 CEUs upon completion (AAPC certified prior to enrollment; some certifications excluded – see AAPC website for more details.)

<u>Course Description</u>: The student will learn principles of medical auditing. In addition, there will be discussion of key areas of regulations, CIAs, medical record documentation and chart abstraction. This course is recommended for anyone who is preparing for a career in medical auditing and strongly recommended for anyone who is preparing for the AAPC CPMA certification examination.

#### **Course Objectives:**

- Define fraud and abuse and explain regulatory guidelines for key regulations
- Explain the impact of the OIG Work Plan and Corporate Integrity Agreements (CIAs)
- List the elements of compliance plans and identify potential compliance risk areas
- Identify National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) risk areas
- Identify the purpose of recovery audit contractors and how to prepare for potential RAC audits
- Explain the HIPAA privacy rule, including details on protected health information, minimum necessary, sharing of information, and enforcement
- Identify medical record documentation standards and record retention standards
- Identify common errors found in documentation for evaluation and management, anesthesia, surgery, radiology, pathology and laboratory, and medicine services
- Explain the types of audits and the resources required for audits
- Define steps of the audit process and identify statistical sampling types and factors
- Explain aggregate analysis and when it is useful
- Explain the importance of discussing audit findings with the provider
- Provide practical application of auditing operative reports and evaluation and management services
