CIEL KEY ACHIEVEMENTS

Insurance revenue increased by 17% from €111m in FY24 to €130m in FY25.

CIEL (the Company) Solvency Capital Requirement (SCR) Coverage Ratio decreased by 10% from 224% in FY24 to 214% in FY25 against a target of 175%.

Key distribution partner relationships extended, and material new affinity partnerships won.

Significant underwriting and pricing experience resulting in sustainable performance and profitable growth across the insurance distribution partnership.

Continued investment in digitalisation to further enhance the customer experience.

Continued investment in automation and data capabilities to support our insight strategy.

Development of the Insurance ESG strategy in alignment with the Collinson Group's.

Our DNA

Value propositions

Design products that fulfil customers' needs and align with our strategic affinity distribution partners.

Optimal Balance Sheet

Our active risk management combined with our reinsurance partners support efficient balance sheet management and generate enhanced returns, underpinned by experienced Underwriting and Pricing capability.

Brilliant Customer Experience

Combining seamless digital journeys with human interaction at the most critical times.

Innovation

Continued Investment in high levels of automation to deliver enhanced customer outcomes.

Executive Summary

This single Group Solvency and Financial Condition Report (“Single SFCR”) relates to Collinson Holdings Europe Limited (“CHEL”) and its subsidiaries, together referred to as “the Group”. The Group fall under Article 213(2)(b) of Directive 2009/138/EC (“Solvency II Directive”). CHEL was incorporated on 17th December 2018 to acquire and hold participations in Collinson Insurance Europe Limited (“CIEL” or “the Company” or “the insurance undertaking”) and Collinson Insurance Solutions Europe Limited (“CISEL” or “the insurance intermediary”).

Both CIEL and CISEL are authorised and regulated by the Malta Financial Services Authority (“MFSA”). CIEL is licensed under the Insurance Business Act (Cap. 403 of the Laws of Malta) to write business of insurance in classes 1-3, 7-9, 13, 16-18. CISEL is licensed as an Insurance Agent under the Insurance Distribution Act (Cap. 487 of the Laws of Malta).

CHEL has identified CIEL as the ‘entity responsible for fulfilling the governance requirements at group level’. CISEL has been classified as ‘a strategic participation’ when consolidating group solvency in line with the requirements of Article 335 of the Solvency II Directive Delegated Regulation and EIOPA published Q&A ID 649. The Directors of CIEL has approved this Single SFCR for year ended 30th April 2025. The Single SFCR has been prepared further to the approval received from the Malta Financial Services Authority (“MFSA”) on 23rd September 2019.

In producing information to meet the individual reporting requirements of the Company and the Group, separate disclosures are provided. However, as CIEL is responsible for fulfilling the governance requirements, all references to Operations, Compliance and Risk Management, and Internal Audit throughout this document refers to those in place at the insurance undertaking and therefore no distinction is drawn between the Company and the Group, when providing group information.

This SFCR has been prepared to allow the Parent to comply with the Pillar III reporting requirements under the Solvency II Directive.

All figures represented in this document are in Euro (“EUR”, “€”) unless otherwise noted.

Business and Performance

The current financial period of the Group covers the period from 1 May 2024 to 30 April 2025 (FY25). The comparative figures cover the period from 1 May 2023 to 30 April 2024 (FY24).

Business Objectives

CIEL is a specialist insurer operating within niche segments of the general insurance personal lines market. CIEL writes Travel, International Private Medical Insurance (IPMI), Dental, as well as specialist and ancillary personal lines insurance products distributed via sophisticated affinity partner brands. As a diversified, niche personal lines insurer, CIEL’s vision is “to provide protection and peace of mind in the best interests of customers so they enjoy their travel experiences whilst looking after their health and personal possessions”.

During FY25, the business continued to see growth across all its key lines of business. (IPMI, Dental, Travel Insurance and Multi Lines). One new travel scheme was onboarded and in Multi Lines we have underwritten some additional products with our existing partners.

The business expects this strong growth to continue as we continue to renew key affinity partner contractual arrangements as well as introduce new clients and products building on the specialist expertise that exists in the Group.

Executive Summary

The business will continue to grow efficiently because of previous investments in digitalising and automating the travel insurance customer journey. This continues to offer our customers choice of channel throughout their claims journey and empowers our claims staff to reduce the end-to-end cycle time which lowers cost and increases customer satisfaction.

CIEL's insurance product offering is entirely consistent with Collinson's wider travel ecosystem strategy. It focuses not only on developing insurance products and services to meet the needs of customers, providing valuable protection and assistance products and services, but also on building long term relationships with clients to maximise the brand experience of their customers.

Growth delivered along with a focus on containing costs and good underwriting disciplines has resulted in improved underwriting performance. The portfolio is projected to continue to grow because of increased new business through existing affinity partner relationships and newly originated business, as we:

- Continue to seek new affinity distribution partners for Travel insurance.
- Continue to seek new clients that fit our appetite across specialist and ancillary personal lines insurance products.

Overall Performance for Financial Year ended 30 April 2025

During the current financial year, CHEL generated a profit before tax of €1,141,055 (2024: loss before tax of €12,157), arising from a net dividend income received from one of its subsidiaries, CISEL, during the financial year of €1,100,000 (2024: Nil).

With effect from 1 May 2023, CIEL applied IFRS 17 Insurance Contracts for the first time. IFRS 17 replaced IFRS 4 Insurance Contracts for annual periods on or after 1 January 2023. The adoption of IFRS 17 did not change the classification of the Company's insurance and reinsurance contracts. The Company has also adopted IFRS 9 Financial Instruments from 1 May 2023 and comparatives have been retrospectively restated. The application of IFRS 9 to the Company's financial instruments has not had a significant impact on the financial position and/or financial performance of the Company. The application of IFRS 9 has had no impact on the cash flows of the Company.

The Company has applied the premium allocation approach (PAA) to all the insurance contracts that it issues and reinsurance contracts that it holds. The Company's insurance contracts issued for the business have a coverage period of one year. Moreover, the Company has demonstrated that the value of the liability for remaining coverage under the PAA approach does not differ materially when this is valued under the General Measurement Model for reinsurance contracts held, which contract boundary is longer than 1 year.

The level of business for the Company's year of operations has been satisfactory. During the year ended 30 April 2025, the Company reported an insurance revenue of €129,680,937 (2024: €111,009,988). The Company has experienced continued growth across its existing clients and products as well as seen strong recovery in motor ancillary premiums. The existing and new business provides a strong geographical and product balance of diversification to the Company. Insurance service expenses amounted to €125,288,022 (2024: €105,649,413). Insurance revenue has grown by 17% year on year whereas insurance service expense has increased by 19%, while claims costs have grown consistently in line with increased premium sales directly attributable expenses have increased by a greater proportion of revenue reflecting agreed commercial arrangements, this is in line with plan.

The movement in the net expenses from reinsurance contracts held takes into consideration the changes in the quota share program during the year with less business being ceded.

As a result, the insurance service result for the year ended 30 April 2025 amounted to €234,959 (2024: €769,425).

Executive Summary

The net insurance finance income from insurance contracts issued and reinsurance contracts held amounted to €314,745 (2024: €517,213). The movement reflects increased sales, directly attributable expenses and a reduction in the percentage being ceded in the financial year.

Investment income for the year amounted to €1,058,905 (2024: €1,052,545). The increase in investment return is attributable to the Company continuing to invest in high quality short-dated money market funds.

The Company's profit before income tax for the year amounted to €129,917 (2024: €2,151,526). This reduction is attributable to the Company setting aside a significant provision for a potential liability for which the Company is approaching the relevant authorities to confirm the position.

The Group's financial position is satisfactory, and the Directors expect that the present level of activity will continue to grow in the foreseeable future. The shareholders' funds of the Group amounted to €15,054k (2024: €14,026k) and reflect the results of the Group entities generated during the financial year ended 30 April 2025.

System of Governance

The Company maintains a robust system of governance which is commensurate to the nature, scale and complexity of the Company's activities and its risk profile.

The system of governance revolves around the Board, the Audit Committee, the Underwriting and Claims Committee and the Risk and Compliance Committee. The Risk Management Function is outsourced to external service providers, in line with the Company's Outsourcing Policy.

The mainstay of the system of governance is the risk management system, which is designed to ensure that all the material risks are identified, and that policies and procedures are in place to assess their potential impact and to adequately report them, so that they can be managed or mitigated. The Company recognises the importance of having an effective risk management system embedded throughout all its areas.

CIEL has established a risk management framework, supported by a Risk Strategy, Risk Appetite Framework and Board policies, to manage the risks faced by the business. All components of the risk management framework are shown in the illustration below highlighting how each component interacts with another.

There has been no material change to the underlying System of Governance of the Company during the year under review.

Risk Profile

The acceptance of risk is fundamental to CIEL and a core element of the overall strategic objectives as an insurance undertaking.

Each of the elements of the Risk Management Framework contribute to the identification, measurement, monitoring, management, and reporting of risks and is intended to work as an integrated system, and therefore each should be considered both in terms of the specific function of the respective element, and in terms of its function within the overall system. Each element of the system is embedded effectively within the Company and managed by the Risk Management Function with appropriate oversight from the Risk and Compliance Committee and the Board of Directors of CIEL.

The Company's main risk is in respect of the business of writing insurance as this is the principal activity. The risk under any one insurance contract is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims and actual benefits paid. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

Other risks relate to counterparty default risk in relation to insurance and reinsurance receivables and short-term investments, market risk in relation to liquidity risk and asset-liability management ("ALM"), operational and compliance risks.

The Directors have considered that the Parent does not add any material operational risk to the Group since it carries out no activities and holds minimal cash at bank. However, the strategic participation which the Parent holds in CISEL adds material market risk exposure and increases the own funds of the Group significantly.

Valuation and Capital Management

The Group abides by the Solvency II Directive (2009/138/EC) which ascertains the level of the required regulatory capital on the basis of the risks they undertake, in terms of the Insurance Business Act, 1998 (Chapter 403, Laws of Malta) and the applicable Insurance Rules issued under the Insurance Business Act by the Malta Financial Services Authority. Solvency II outlines how the own funds shall be derived by converting the Statement of financial position from an International Financial Reporting Standards (IFRS) perspective to one where assets and liabilities are measured in line with their underlying economic value.

The Directors of CIEL are actively involved in the application of the Solvency II legislation and these are embedded in the Company's operations. Regular monitoring of the Solvency Capital Requirement ("SCR") and Minimum Capital Requirements ("MCR") is considered crucial, and a Capital Management Policy is in place to address the procedures and controls in this regard.

The Directors of CIEL monitor solvency through regular reviews and quarterly reporting of the net asset coverage over both the SCR and MCR.

Based on the SCR calculations as at 30 April 2025, the Company and the Group complied with the capital and solvency requirements as stipulated in the rules issued by the MFSA and within the Board approved risk appetite.

CIEL's solvency position as at 30 April 2025 was as follows:

	FY25 €'000	FY24 €'000
Company's Own Funds to cover the MCR	18,430	15,121
Minimum Capital Requirement	4,000	4,000
MCR Coverage Ratio	461%	378%

Executive Summary

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	1,781	1,743	38
Counterparty Default	390	435	(45)
Undiversified BSCR	10,162	7,897	2,265
Diversification	(3,290)	(2,703)	(587)
Base SCR	6,872	5,194	1,678
Operational Risk	2,062	1,558	504
LACDT	(321)	-	(321)
Solvency Capital Requirement	8,613	6,752	1,861
Company's Own Funds to cover the SCR	18,430	15,121	3,309
SCR Coverage Ratio	214%	224%	(10%)

CHEL's solvency position as at 30 April 2025 was as follows:

	FY25 €'000	FY24 €'000
Group's Own Funds to cover the Minimum Consolidated Group SCR	20,538	17,992
Minimum Consolidated Group SCR	4,000	4,000
Minimum Consolidated Group SCR Coverage Ratio	513%	450%

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	2,096	2,187	(91)
Counterparty Default	390	435	(45)
Undiversified BSCR	10,477	8,341	2,136
Diversification	(3,422)	(2,856)	(566)
Base SCR	7,055	5,485	1,570
Operational Risk	2,116	1,646	470
LACDT	(321)	-	(321)
Group Solvency Capital Requirement	8,850	7,131	1,719
Group's Own Funds to cover the SCR	20,538	17,992	2,546
Group SCR Coverage Ratio	232%	252%	(20%)

The main movements in the SCR of the Company from 30 April 2024 is due to the following reasons:

- Non-Life and Health Underwriting risk has increased mainly due to an increase in forecast business volumes as well as a lower level of quota share reinsurance, both of which have increased the premium and reserve risk. Additionally, the introduction of new products—such as Shipment Protection and Ticket Cancellation—has led to a rise in catastrophe risk. Lapse risk has increased due to higher expected profits driven by rising premiums and improved profit margins.

Executive Summary

- Counterparty Default risk has reduced due to lower quota share recoveries on the funds transferred reinsurance and cash at bank reducing (due to more funds being transferred to the money market fund where it earns a higher return).
- Operational risk has increased due to it being capped at 30% of the Basic SCR (i.e. it has increased in line with the increases in the Basic SCR).

The Eligible Own Funds have increased over the financial year due to profit on the retained earned premium and investment returns.

At the level of the Group, the movement can be explained by the following additional reasons:

- The market risk for the Group, has also increased due to the increases for the Company, although this has been offset slightly by a lower net asset value of CISEL, which has decreased the equity risk from this strategic participation.
- In addition, the Group's Own Funds to cover the SCR, has increased from last year due to the higher Own Funds of the Company.

Based on management calculations, the Company and the Group expects to continue meeting the Solvency II capitalisation requirements and remain within the Board approved risk appetite going forward.

The Board of CIEL approved the latest Own Risk and Solvency Assessment ("ORSA") on 4 August 2025 and is confident that the Group shall remain solvent under normal business conditions during the planning period.

The Board of CIEL also carried out several stresses to the realistic assessment and is satisfied that the Group shall remain solvent during the planning period.

A. Business and Performance

Group structure and ownership

CIEL and CISEL are 100% owned by CHEL. CHEL sits within the Insurance Division of The Collinson Group Limited as a direct subsidiary of Collinson Insurance Holdings Limited (CIHL).

The ultimate holding company of CIHL is Parminder Limited, a company incorporated in the Isle of Man. The ultimate controlling parties identified by Parminder Limited are the Trustees of the Colin Evans 1987 Settlement, established under Laws of the Isle of Man, the beneficiary of which is Mr C R Evans.

The Structure of the Group is shown below:

Business Objectives

CIEL is a specialist insurer operating within niche segments of the general insurance personal lines market. CIEL writes Travel, International Private Medical Insurance (IPMI), Dental, as well as specialist and ancillary personal lines insurance products distributed via sophisticated affinity partner brands. As a diversified, niche personal lines insurer CIEL's vision is "to provide protection and peace of mind in the best interests of customers so they enjoy their travel experiences whilst looking after their health and personal possessions".

During FY25, the business continued to see growth across all its key lines of business (IPMI, Dental, Travel Insurance and Multi Lines). One new travel scheme was onboarded and in Multi Lines we have underwritten some additional products with our existing partners. The business expects this strong growth to continue as we continue to renew key affinity partner contractual arrangements as well as introduce new clients and products building on the specialist expertise that exists in the Group.

The business will continue to grow efficiently because of previous investments in digitalising and automating the travel insurance customer journey. This continues to offer our customers choice of channel throughout their claims journey and empowers our claims staff to reduce the end-to-end cycle time which lowers cost and increases customer satisfaction.

CIEL's insurance product offering is entirely consistent with Collinson's wider travel ecosystem strategy. It focuses not only on developing insurance products and services to meet the needs of customers, providing valuable protection and assistance products and services, but also on building long term relationships with clients to maximise the brand experience of their customers.

A. Business and Performance

Growth delivered along with a focus on containing costs and good underwriting disciplines has resulted in improved underwriting performance. The portfolio is projected to continue to grow because of increased new business through existing affinity partner relationships and newly originated business, as we:

- Continue to seek new affinity distribution partners for Travel insurance.
- Continue to seek new clients that fit our appetite across specialist and ancillary personal lines insurance products.

As part of the ongoing ORSA process, the Board agreed to have a 3-year planning period for the Group being FY26 as the short term, FY27 and FY28 in the medium term. The Board is of the opinion that forecasting further than 2028 is difficult due to uncertainty resulting from the market conditions.

There are no significant legal or regulatory issues that are expected to affect the Group negatively in FY26.

There were no significant events in the reporting period which would require disclosure or adjustment to the financial statements.

Business Written

The Solvency II Lines of Business written by CIEL are Medical Expense Insurance (International Health, Dental and medical elements of Travel), Assistance (non-medical elements of Travel), Other Motor (Collision Damage Waiver), Damage to Property (Gadget), Miscellaneous Financial Loss (Ticket Cancellation) and Marine (Goods in Transit).

CISEL acts as an insurance intermediary with CIEL on part of the above-mentioned portfolio of business and continues to run-off travel and dental insurance books for an insurer for which it acted as intermediary.

Material Transactions with Shareholders and Members of the Board of Directors

Trading transactions with related parties and year end balances arising from these transactions are disclosed in Note 22 to the Audited Financial Statements of CIEL and Note 22 of CISEL.

Any other matters

In July 2025, CHEL injected an additional €1,000,000 in CIEL in the form of a Capital Contribution.

There is no other information to be submitted.

A. Business and Performance

A.2 Underwriting Performance

Overall Performance for Financial Year ended 30 April 2025

During the current financial year, CHEL generated a profit before tax of €1,141,055 (2024: loss before tax of €12,157), arising from a net dividend income received from one of its subsidiaries, CISEL, during the financial year of €1,100,000 (2024: Nil).

With effect from 1 May 2023, CIEL applied IFRS 17 Insurance Contracts for the first time. IFRS 17 replaced IFRS 4 Insurance Contracts for annual periods on or after 1 January 2023. The adoption of IFRS 17 did not change the classification of the Company's insurance and reinsurance contracts. The Company has also adopted IFRS 9 Financial Instruments from 1 May 2023 and comparatives have been retrospectively restated. The application of IFRS 9 to the Company's financial instruments has not had a significant impact on the financial position and/or financial performance of the Company. The application of IFRS 9 has had no impact on the cash flows of the Company.

The Company has applied the premium allocation approach (PAA) to all the insurance contracts that it issues and reinsurance contracts that it holds. The Company's insurance contracts issued for the business have a coverage period of one year. Moreover, the Company has demonstrated that the value of the liability for remaining coverage under the PAA approach does not differ materially when this is valued under the General Measurement Model for reinsurance contracts held, which contract boundary is longer than 1 year.

The table below shows the Income Statement for the year ended 30 April 2025.

Income Statement	FY25	FY24	Movement
	€'000	€'000	€'000
Insurance revenue	129,681	111,010	18,671
Insurance service expenses	(125,288)	(105,649)	(19,639)
Net expenses from reinsurance contracts held	(4,158)	(4,591)	433
Insurance service result	235	770	(535)
Investment income	1,059	1,053	6
Net investment income	1,059	1,053	6
Finance expenses from insurance contracts issued	(551)	(471)	(80)
Finance income from reinsurance contracts held	866	988	(122)
Net insurance finance income	315	517	(202)
Net insurance and investment result	1,609	2,340	(731)
Other operating expenses	(1,479)	(188)	(1,291)
Profit before income tax	130	2,152	(2,022)
Income tax credit/ (expense)	660	(753)	1,413
Profit for the year – total comprehensive income	790	1,399	(609)

The level of business for the Company's year of operations has been satisfactory. During the year ended 30 April 2025, the Company reported an insurance revenue of €129,680,937 (2024: €111,009,988). The Company has experienced continued growth across its existing clients and products as well as seen strong recovery in motor ancillary premiums. The existing and new business provides a strong geographical and product balance of diversification to the Company. Insurance service expenses amounted to €125,288,022 (2024: €105,649,413). Insurance revenue has grown by 17% year on year whereas insurance service expense has increased by 19%, while claims costs have grown consistently in line with increased premium sales directly attributable expenses have increased by a greater proportion of revenue reflecting agreed commercial arrangements, this is in line with plan.

The movement in the net expenses from reinsurance contracts held takes into consideration the changes in the quota share program during the year with less business being ceded.

A. Business and Performance

As a result, the insurance service result for the year ended 30 April 2025 amounted to €234,959 (2024: €769,425).

The net insurance finance income from insurance contracts issued and reinsurance contracts held amounted to €314,745 (2024: €517,213). The movement reflects increased sales, directly attributable expenses and a reduction in the percentage being ceded in the financial year.

Information on the material geographical areas in which CIEL carries out business is provided in the Appendices as part of S.04.05 template.

The Company's profit before income tax for the year amounted to €129,917 (2024: €2,151,526). This reduction is attributable to the Company setting aside a significant provision for a potential liability for which the Company is approaching the relevant authorities to confirm the position.

The Company and the Group's financial position is satisfactory, and the Directors expect that the present level of activity will continue to grow in the foreseeable future. The shareholders' funds of the Group amounted to €15,054k (2024: €14,026k) and reflects the results of the Group entities generated during the financial year ended 30 April 2025.

The Group maintains a system of governance which is commensurate to the nature, scale, and complexity of the Group's operation. The mainstay of the system of governance is the risk management system, which is designed to ensure that all the material risks are identified, managed, and mitigated.

The principal risks from the general insurance business arise from; fluctuations in the timing, frequency and severity of claims compared to our expectations; inadequate reinsurance protection; and inadequate reserving.

CIEL manages these risks through an underwriting and reserving policy that is approved by the Board of Directors after having considered the Underwriting Committee's advice.

Group Transactions

Trading transactions with related parties and year end balances arising from these transactions are disclosed in Note 22 to the Audited Financial Statements of CIEL.

A.3 Investment Performance

The table below lays out the composition of CIEL investment portfolio as at 30 April:

	FY25	FY24	Movement
	€'000	€'000	€'000
Financial assets at amortised cost	40,284	30,558	9,726
Total	40,284	30,558	9,726

Financial assets measured at amortised cost consist of:

- A-rated money market funds denominated in Euro, USD and GBP. The investment return consisted of interest income. The amount invested is subject to a number of parameters, including limits on investment with a single counterparty and the investment rating being at minimum A rated; and
- Short-duration global high- yield credit denominated in Euro.

The investment choices are dictated by the investment policy. The policy ensures the Company maintains a high quality, diversified portfolio of short-dated deposits with capital preservation and positive investment returns helping to guide our investment decisions.

A. Business and Performance

During the reporting period, the CIEL Board approved a new investment strategy, aimed at enhancing risk-adjusted returns while maintaining a disciplined risk management framework. This includes continued focus on diversification, asset-liability management, and liquidity risk management—particularly under stressed market conditions. The strategy marks a shift beyond the current reliance on money market funds, expanding into broader fixed income opportunities such as short-duration bonds and credit. Implementation of the strategic asset allocation is planned over the course of the upcoming financial year (FY26), subject to prevailing market conditions. To date, only a modest allocation has been deployed into short-duration global high-yield credit.

The Company regularly compares the returns and the duration of its investments with the average duration of the liabilities to policyholders under insurance contracts. Any gap between the duration of the assets and the estimated average duration of the liabilities is managed by maintaining short term deposits and cash at bank and cash equivalents.

The Company target returns in accordance with its authorised investment policy. Investment return comprises of interest income and is net of investment expenses and charges. Investment income gross of expenses for 2025 was of €1,058k (2024: €1,053k). All investment return/charges are recognised in the Income Statement. The Company did not hold any investments in securitisation. Details of the Company's investment performance can be found in Note 9 to the Audited Financial Statements of CIEL.

A.4 Performance of other activities

There are no material other activities to note in the reporting period.

A.5 Any Other information

The macroeconomic situation in Europe is characterised by moderate economic growth, declining inflation, and a mixed outlook across different countries. The EU economy started the year stronger than expected, with growth projected to continue at a modest pace in 2025 potentially picking up in 2026. Inflation is on a downward trend and is expected to reach the European Central Bank's (ECB) 2% target this year. However, global economic uncertainty and trade tensions persist, creating some threats to this goal.

Europe is currently navigating a complex geopolitical landscape given the interconnected nature of challenges and opportunities. The continent faces a multitude of threats, including the ongoing war in Ukraine, tensions in the Middle East, and the rise of great power competition between China and the US. Simultaneously, Europe is grappling with ongoing internal challenges such as economic disparities, political polarization, and demographic shifts.

Economic inequalities between member states can undermine European unity and resilience, especially in times of crisis. Europe has been facing declining birth rates and an aging population, which can strain social welfare systems and impact economic growth. The EU is engaged in enlargement negotiations with several Western Balkan countries and is also considering the possibility of future membership for Ukraine, Moldova, and Georgia. EU continues to work on its green agenda. However, the transition to a green economy presents both challenges and opportunities for European industries and societies.

B. System of Governance

B. System of Governance

B.1 General Information on the System of Governance

Structure of the Board of Directors

The Board of Directors of CIEL is made up of two (2) independent non-executive directors, one (1) non-executive director and three (3) executive directors. The Board of Directors is made up of a mix of individuals who have the necessary skills and expertise in market knowledge, business strategy and business model, systems of governance, financial and actuarial analysis and regulatory framework and requirements. The table below lists the members of the Board as at 30th April 2025, together with the main duties and responsibilities.

Name	Position	Date of Appointment
Anne Marie Tabone	Chairperson and Independent Non-Executive Director	20 December 2018
Joseph Mary Rizzo	Independent Non-Executive Director	20 December 2018
Elizabeth Carbonaro	Non-Executive Director	20 December 2018
Lawrence David Watts	Executive Director	29 April 2020
Paul Escott	Executive Director	20 December 2018
Sebastian Matthias Kittel	Managing Director	29 March 2021

The BoD have the following **duties and responsibilities**:

- To oversee overall business performance of CIEL and the Group;
- To set business objectives and strategy and ensure that the objectives are met;
- To set and monitor adherence to the risk strategy, risk appetite and risk management framework; and
- To monitor and ensure that Solvency Capital Requirement and Minimum Capital Requirement are met at all times.

The Board reviews its effectiveness annually and all members are subject to an annual fit and proper reassessment.

The Board has established three Board committees, namely the Audit Committee, the Risk & Compliance Committee and the Underwriting and Claims Committee. The tables below list the members of the respective committees as at 30th April 2025, together with the main duties and responsibilities.

Audit Committee

Name	Position	Date of Appointment
Anne Marie Tabone	Chairperson and Board member	April 2024
Joseph Mary Rizzo	Board member	April 2024
Elizabeth Carbonaro	Board member	April 2024

Main duties and responsibilities:

- To assist the Board with discharging its responsibilities for monitoring the integrity of the Company's financial statements;
- To monitor the independence and objectivity of the statutory auditors and the performance and effectiveness of the statutory audit process;
- To consider the observations and recommendations of the internal audit function and monitor progress of internal audit plan and actions;
- To review and assess the adequacy and effectiveness of the systems for internal control including financial reporting and controls.

B. System of Governance

Risk & Compliance Committee

Name	Position	Date of Appointment
Joseph Mary Rizzo	Chairperson and Board member	December 2021
Paul Escott	Board member	December 2021
Lawrence David Watts	Board member	December 2021
Sebastian Matthias Kittel	Board member	December 2021

Main duties and responsibilities:

- To review the effectiveness of the Risk Management Framework;
- To oversee the development, implementation and operation of the ORSA;
- To review capital requirements including stress testing and monitoring; and
- To review regulatory and legal compliance.

Underwriting and Claims Committee

Name	Position	Date of Appointment
Joseph Mary Rizzo	Chairperson and Board member	December 2018
Paul Escott	Board member	December 2018
Elizabeth Carbonaro	Board member	December 2018
Sebastian Matthias Kittel	Board member	March 2021

Main duties and responsibilities:

- To determine and implement suitable premium and contract terms in respect of the risks underwritten by the Company;
- To identify and assess potential new underwriting opportunities;
- To review the product governance and product information in relation to CIEL products;
- To determine and annually review the claims reserving policy; and
- To review the annual Actuarial Function Holder Report, including the Underwriting Opinion and Reinsurance Opinion.

Key and Critical Functions

In line with the Solvency II Directive, CIEL implemented the following key functions: Risk Management, Compliance, Actuarial and Internal Audit.

Risk Management Function

The Risk Management function is outsourced to Willis Towers Watson Management (Malta) Limited and reports to the Risk and Compliance Committee. Mr Joseph Mary Rizzo, as the chairperson of the Risk and Compliance Committee is responsible for the oversight of the Risk Management function. Risk management lies at the heart of CIEL's business activities. The adopted risk appetite reflects the articulated risk profile set by the Board through its risk-return profiling of the identified key risks. The Risk Management function has the responsibility to identify, evaluate, monitor, manage and report risks.

B. System of Governance

Compliance Function

The Compliance function is performed in-house by Dr Annalisa Debono and reports to the Risk & Compliance Committee. The Compliance function is responsible for assessing the Group's overall compliance with all relevant rules and regulations to effectively mitigate the risk of non-compliance. This includes the assessment of the system of governance. Further information on the roles and responsibilities of the Compliance function is provided in Section B.4. below.

Following the reporting period, Mr Stefan Josef Vella replaced Dr Annalisa Debono as Compliance Officer of the Company.

Actuarial Function

The Actuarial function is performed in-house by Mr David Trefusis and reports to the Board of Directors. The Actuarial Function is responsible for supporting the business, including the calculation of the Solvency II technical provisions and ensuring policyholders' interests are protected.

Further information on the roles and responsibilities of the Actuarial function is provided in Section B.6. below.

Internal Audit Function

The Internal Audit function is performed in-house by Ms Isabel Cutajar and reports to the Audit Committee. Internal Audit is responsible for evaluating and independently assess the quality of internal controls, including the effectiveness of the risk management, governance and key controls processes. Further information on the roles and responsibilities of the Internal Audit function is provided in Section B.5. below.

In addition to the four key functions mentioned above, CIEL considers the Underwriting function and the Claims function as critical or important functions.

Underwriting Function

The Underwriting function is performed in-house by Mr Sebastian Kittel and reports to the Underwriting and Claims Committee. The Underwriting function is mainly responsible for ensuring that risks are underwritten in accordance with the Company's approved underwriting guidelines, strategy and appetite.

Claims Function

The Claims function is performed in-house by Mr Sebastian Kittel and reports to the Underwriting and Claims Committee. The Claims function is mainly responsible for the fair, timely and efficient settlement of claims in line with the Company's contractual obligations and oversee limits and claims handled by third-party administrators where applicable.

B. System of Governance

Review / Adequacy of Systems of Governance

The Board of Directors of CIEL are satisfied that the systems of governance in place are appropriate given the Company's risk profile and commensurate with the nature, scale, and complexity of its operations.

Information on Remuneration Policies and Practice

The following principles are applied to remuneration within the Company;

- Senior members of staff covered by this policy will be remunerated in a manner which supports the aims of Regulatory requirements.
- Targets and measures will be set which support customer-centric behaviours.
- Senior staff will be remunerated against a balanced set of criteria.

The Independent Non-Executive Directors have no past or present employment with the ultimate shareholder. They have been selected for their knowledge and applicable regulations in Malta.

It is recognised that the INEDs may have other engagements with other companies. The contract between CIEL and its appointed INEDs states that any potential "conflict of interest" be declared. Conflicts are declared at every Board meeting.

INEDs are bound by confidentiality clauses in their personal contracts which continue beyond the end of the contract. Following the re-appointment of the INEDs during 2025, there has been no change to the Remuneration Policies and Practice.

Remuneration of members of the management body

The Executive Directors representing the shareholder are directly employed by the Collinson Group whilst the two Independent Non-Executive Directors are remunerated by the Company. The non-executive Director representing the Managers is remunerated by Willis Towers Watson Management (Malta) Limited. The Managing Director is remunerated by the Company. Details of the amounts remunerated to Directors and Management can be found in Notes 10 and 11 to the Audited Financial Statements of CIEL.

B. System of Governance

B.2 Fit and Proper Requirements

Individuals assuming key roles, including Board members and key function holders are required to be suitable for their role and are assessed in line with the Fit and Proper Policy of the Company. An assessment is carried out prior to the appointment of such individuals assuming key roles, and prior to the notification to the MFSA for their approval. Fitness and properness are further reassessed on an annual basis.

The assessment considers the respective duties to be assumed by such individual and considers the academic background and professional experience, any existing or potential conflicts of interest, the individual's integrity and reputation and whether the individual can devote sufficient time to the proposed role.

B.3 Risk management system including the Own Risk & Solvency Assessment

CIEL has established and embedded a consistent risk management framework, supported by appropriate Board policies and procedures to manage the key risks to the business. Where relevant, policies and procedures have been aligned to the current regulatory requirements under the Solvency II ("SII") regime. A key part of CIEL Risk Management Framework is the way the business collectively manages, controls and reports risk at every stage throughout its governance structure. The governance framework is based upon the "three lines of defence" operating model and seeks to provide a formal and robust structure to enable risks to be identified, assessed, controlled, and mitigated; reported and monitored.

Risk Management Function

The Risk Management Function of CIEL is responsible for the operational coordination and application of all Risk Management activities throughout CIEL on an ongoing basis.

The Risk Management Function reports directly to the RCC on a quarterly basis or upon occurrence of an event which could materially impact CIEL's risk profile.

The Function is responsible for coordination of all risk management activities throughout CIEL. The Function is also responsible for providing the Board with assistance and support in development and implementation of the various risk management arrangements within CIEL.

The Board has outsourced the activities of the Risk Function to Willis Towers Watson Management (Malta) Limited in accordance with the CIEL's Outsourcing Policy.

Risk Management Framework

CIEL has established a risk management framework, supported by a Risk Strategy, Risk Appetite Framework and Board policies, to manage the risks faced by the business. All components of the risk management framework are shown in the illustration below highlighting how each component interacts with another.

B. System of Governance

Risk Strategy

The Risk Strategy defines the guiding principles with which CIEL operates to deliver effective risk management in support of its commercial performance and intended customer outcomes. Twenty-one principles have been defined, centred on five themes which provide a coherent structure to articulate the strategic approach to risk management:

(1) People & Culture, (2) Customers, (3) Data & Systems, (4) Processes & Delivery, and (5) Prudential

People & Culture	▪ Accountabilities led approach (with the Senior Manager Regime embedded from inception) ▪ Three Lines of Defence operating model (with clearly defined roles & responsibilities) ▪ Strong emphasis on professional conduct (i.e. 'Do the right thing') ▪ Culture of effective risk management (i.e. risk identification, escalation, mitigation, awareness & learning from events)
Customers	▪ Responsible Insurer & relationship led business partner ▪ Safe & secure guardian of customer data & assets ▪ Fair treatment of new & existing customers (with a strong outcomes focused ethos) ▪ Sensitive & flexible approach to treating customers fairly
Data & Systems	▪ Data led strategy for decision-making & customer relationship management ▪ Automate rather than rely on manual intervention (with preventative controls where practical) ▪ Buy before Build – prioritise the use of 'tried and tested' technologies from well-established providers ▪ "Robust" operational resilience for systems, business processes & controls
Processes & Delivery	▪ Integrated risk & control framework ▪ Robust selection & oversight of Outsource Service Providers & suppliers ▪ Robust change management processes ▪ Timely remediation (i.e. 'We'll put things right if things have gone wrong')
Prudential	▪ Own funds: become self-sufficient with internal growth of own funds rather than shareholder capital injections ▪ Resilient balance sheet (i.e. capital & liquidity requirements are met under 'extreme but plausible' stresses) ▪ Stable earnings (i.e. profitability isn't volatile / unpredictable) ▪ Robust stress testing & scenario analysis ▪ Prudent approach to strategic planning & financial accounting / reporting

B. System of Governance

Risk Appetite Framework

The Risk Appetite Framework (RAF) defines CIEL's overall approach through which risk appetite is established, communicated, and monitored. It also defines the roles and responsibilities of those overseeing the implementation and monitoring of the RAF (including policies, processes, controls, and systems). The RAF is complemented by the Risk Appetite Statement (RAS), which defines the risk appetite across CIEL eight primary risk classes and the associated qualitative and quantitative risk limits, applying a two-level hierarchy (i.e., Board and Executive) to the risk limits and reporting.

The diagram summarises the interplay of risk appetite with strategy and business planning, alongside the processes for managing risk appetite and associated key enablers.

The appetite for risk is aligned to the Business Strategy to ensure that key risks are identified, and suitable mitigating controls are implemented and monitored. The risk appetite statement is agreed and reviewed at least annually by the Board and earlier in case of material change in risk profile or strategy. A monitoring programme of risk appetite metrics supporting management in ensuring that CIEL remains within its risk appetite.

CIEL follows a 'three lines operating model' for risk management. This approach is predicated on 'the business' (Line 1) having effective risk management processes in place, coupled with the effective design, implementation, and operation of effective controls.

The Risk function (Line 2) provides strategic oversight and challenge, whilst also enabling robust risk management by providing advice, Policies, guidance, and tools to aid Line 1's risk activities. Internal Audit ('Line 3') provide independent oversight and assurance on the effectiveness of Line 1 and Line 2 risk management.

B. System of Governance

The table below highlights the different roles and responsibilities for key risk management processes:

'The business' (Line 1)	Risk (Line 2)	Internal Audit (Line 3)
(1) Risk Identification - Proactively escalate risks & issues to relevant line managers - Proactively escalate potential breaches to line managers & Risk - Maintain business team's Risk & Control Self-Assessments	(1) Risk Identification - Maintain the Risk Universe (a shared vocabulary for 'show on the road' risk categories & definitions) - Maintain the Strategic Risk Radar (a 'top-down' tool for key risks) - Challenge Executive team re. incoming / 'horizon' risks	(1) Risk Identification Provide independent oversight & assurance on effectiveness of Line 1 & 2 risk identification activities
(2) Risk Assessment - Apply the 5x5 Risk Matrix when performing Self-Assessments - Assess materiality of risks & issues when determining next steps - Ensure the business stays within the Board's Risk Appetite	(2) Risk Assessment - Responsible for the Board's Risk Appetite Statement - Maintain the 5x5 Risk Matrix for assessing business areas risks - Maintain the Risk & Control Self-Assessment methodology & tools	(2) Risk Assessment Provide independent oversight & assurance on effectiveness of Line 1 & 2 risk assessment activities
(3) Risk Management - Implement effective risk mitigation processes (ideally using a mix of preventative & detective controls) - Implement effective actions if a risk is outside of risk appetite - Maintain robust regulatory & Policy gap analyses - Proactively confirm the effective execution of key controls	(3) Risk Management - Provide advice & guidance on risk management solutions / approaches - Provide independent oversight of Line 1 risk management (e.g., via Compliance Monitoring work, Scenario analysis, etc.) - Deliver a rolling programme of Compliance Monitoring - Support the Underwriting Control Framework	(3) Risk Management Provide independent oversight & assurance on effectiveness of Line 1 & 2 risk management activities
(4) Risk Reporting - Support regular reporting of business area risk profile - Proactively monitor key risk exposures (in line with Risk Appetite)	(4) Risk Reporting - Provide Committee & Board reporting on Risk Universe & Strategic Risks - Provide independent oversight reports to Board Risk Co (e.g., Risk and Compliance Committee)	(4) Risk Reporting Provide independent oversight & assurance on effectiveness of Line 1 & 2 risk reporting activities
(5) Board Policies - Adhere to the Board's Policy Statements & Minimum Standards - Proactively request waivers / exceptions if non-compliance exists	(5) Board Policies - Define the Board Policy framework & document set - Create Policy Statements & Minimum Standards for Insurers - Maintain a register of policy waivers & exceptions	(5) Board Policies Provide independent oversight & assurance on effectiveness of compliance with Board Policies
(6) Risk Culture - Lead by example - Recruit for cultural fit & support new joiners in induction activities - Apply 'common sense' & professional judgement in personal conduct & treatment of customers - Embed appropriate behaviours in teams, reinforced by responsible objective setting & performance management	(6) Risk Culture - Lead by example - Provide new joiner training on risk management - Provide a rolling programme of risk awareness 'deep dives' - Periodically assess business team culture (e.g., via Compliance Monitoring work or in aftermath of operational incidents)	(6) Risk Culture Provide independent oversight & assurance on effectiveness of risk culture activities

B. System of Governance

Own Risk and Solvency Assessment Process

The requirements of Article 45 – Own Risk and Solvency Assessment ('ORSA') of the Solvency II Directive 2009/138/EC of the European Parliament and of the Council require companies to have processes in place as is proportionate to the nature, scale, and complexity of the risks inherent in its business. Within their risk identification process, the Insurers seek to properly identify and assess the risks they face, in the short and long term, and to which it is or could become exposed to, whilst having processes in place which led to effective capital management.

CIEL aims to ensure that it is appropriately and prudently capitalized to accept the risk to which CIEL is exposed. In order to ensure this, CIEL will perform an ORSA at least annually and upon the occurrence of an event which may materially impact its risk profile. CIEL maintains separate policies on ORSA and Capital Management which are considered in the performance of the ORSA.

ORSA Objectives

The ORSA process supports the BoD in achieving their strategic objectives by taking a structured and combined approach of business strategy, risk management and capital management. Thus, within this context, the prime purposes of the ORSA processes are to:

- Provide the BoD and individuals involved in the decision-making processes and management with an assessment of whether risk management and solvency position are currently and prospectively adequate;
- Serve as an essential insight for any strategic decision to be made; and
- Serve as a supervisory tool by providing a detailed understanding of the evolving risk exposure, solvency position and capital planning of the CIEL to the Malta Financial Services Authority.

ORSA Timing and Frequency

CIEL undertake an ORSA process, at least annually, to demonstrate the adequacy of the available capital, the Risk Appetite and the appropriateness of the risk limits which are assessed for the business planning period, considering the evolving risk profile. It will be re-performed on an additional 'ad hoc' basis in the event of significant change in the risk profile or business plans. Depending on the trigger and initial impact assessment, either a full or a partial ORSA (focused on the triggering event whilst keeping other variables constant) will be conducted.

The diagram below depicts the ORSA process that the Group has embedded within the Insurers:

B. System of Governance

An integral element of CIEL's risk management framework (included with the ORSA) is the stress and scenario testing of the business model and its key assumptions through sensitivity analysis and 'extreme but plausible' scenarios.

- **ORSA:** Identifies the Company's capital requirements in delivering the business strategy and includes in 'extreme but plausible' stress scenarios and forecasts the adequacy of its capital holdings against these requirements.
- **Stress tests:** These generally assess the impact of a change in a single risk factor. Tests were performed that included both negative and positive results on the 3-year forecast view of SCR.
- **Scenario tests:** These assess the impact of a change in the overall operating environment resulting from a range of factors or a 'shock'. The tests are considered relevant to CIEL's underwriting portfolio and operating model.
- **Reverse Stress tests:** These assess the scenarios and circumstances that would render CIEL's business model unviable and encourages management to identify pre-emptive measures that would be applied in such scenarios.

A range of stress and scenario tests is applied to CIEL's Base Case Capital model to understand the impact of these sensitivities. The visual below depicts the types of scenario analysis that have been assessed as part of the ORSA process.

B. System of Governance

Own Solvency Needs Assessment

CIEL primarily considers whether the risks of the Company are adequately captured by the Standard Formula. The use of the standard formula is embedded within the decision-making processes as a capital calculator is used to assess the impact of planned decisions to support the approval process. This is used within the product governance process to ensure that CIEL has the required capital to support the new product. It is used to evaluate the impact of pricing decisions including the expected outcomes of these decisions.

The Board, with assistance from the Actuarial, Finance and Risk functions, has assessed the projected SCR for the planning period against the risks that CIEL face to determine the Own Solvency Needs. The assessment has concluded that the Own Solvency Needs for CIEL are aligned to the SCR calculations and does not attract any additional capital charges.

B.4 Internal Control System

Internal control is defined as a process determined by an organisation's structure, work and authority flows, risk profile, people, and management information systems, designed to help the organisation accomplish specific goals or objectives. The purpose of an internal control system is to have in place a coherent, comprehensive, and continuous set of mechanisms which are designed to secure the following:

- Effectiveness and efficiency of the undertaking's operations, leading to improved performance and error reduction;
- Alignment of the Company's activities with its business objectives by ensuring resources are correctly and prudently allocated;
- Safeguarding of the Company's physical and monetary assets against error, fraud, theft and unauthorised use, acquisition, or disposal, by quick identification and systemic prevention of, and formal responses to, these activities;
- Availability, reliability, and accuracy of financial and non-financial information, ensuring proper financial reporting, by maintaining accurate and complete records required by legislation, regulation, the Board, and the Company;
- Provision of timely and accurate management information critical to sound management practices and decision making;
- Compliance with applicable laws, regulations, and administrative provisions; and
- Reduction of exposure to risks by minimising the chance of unexpected events.

To support a robust internal control system a suite of governance policies has been implemented to ensure the strategy and objectives of the Company are achieved. All relevant personnel and service providers are made aware of these policies where applicable to support the internal control environment.

The Internal Control System within CIEL is depicted within the other sections of section B – System of Governance with key function holders appointed to Actuarial (B6), Compliance, Internal Audit (B5) and Risk Management (B3) and are detailed in the relevant sections. Compliance is detailed below.

Compliance Function

The Compliance function is responsible for assessing the Group's overall compliance with all relevant rules and regulations to effectively mitigate the risk of non-compliance. This includes the assessment of the system of governance. The Board is ultimately responsible for ensuring effectiveness of the Compliance function. The key responsibilities of the Compliance function include:

- Advise the Board on compliance with laws and regulations;
- Ensure relevant and appropriate compliance training is provided for employees and the Board;
- Ensure appropriate and proportionate risk-based systems and controls are in place to support compliance with relevant laws, rules, regulations, and standards in Malta;
- Assist in the design, formulation and amendment of new and existing policies and procedures, products, services and the approval of marketing and advertising material;
- Provide a level of co-ordination and interaction with the relevant external bodies, including regulators, external auditors and external compliance consultants on all relevant issues and matters;

B. System of Governance

- Ensure that the business keeps pace with regulatory change by performing frequent horizon scanning, engaging with stakeholders to assess impact, communicating incoming change to relevant parts of the business, supporting with reg change projects and tracking and reporting on the status of project deliverables;
- Provide regulatory advice to help support and enable new and existing business arrangements; and
- Ensure regulatory reporting is accurate and submitted on time.

B.5 Internal Audit Function

The Internal Audit function is an independent assurance function, which examines and evaluates the functioning of internal controls and governance within the control environment. It objectively examines, evaluates, and reports on the adequacy of the control environment in relation to compliance with documented policies and procedures.

An appropriate control environment is fundamental to ensuring that staff behaviour is consistent with governance and regulatory requirements, and it relies on senior management promoting the appropriate top-down culture.

The Function forms the Company's third line of defence. It operates in accordance with The Institute of Internal Auditors' mandatory guidance including The Definition of Internal Auditing, the Code of Ethics, and the International Standards for the Professional Practice of Internal Auditing.

Internal Audit is governed by an Internal Audit Charter that defines the role, level of professionalism, authority, structure, independence and objectivity and responsibility of the function. The charter is reviewed and approved by the Audit Committee (AC) on an at least annual basis. The Function reports into the Audit Committee, which is chaired by an Independent Non-Executive Director. This reporting structure delivers independence to Internal Audit in line with the provisions of the Insurance Business Rules.

The Internal Audit Function creates an Internal Audit Plan on a bi-annual basis following a risk assessment process which includes:

- A review of the risk register;
- Consideration of functions/operations impacted by recent or upcoming changes;
- Interviews with key senior management across the different functions; and
- Consideration of regulatory guidance, circulars or newsletters and industry risk analysis reports issued.

The Internal Audit Plan is frequently evaluated to determine that it is relevant and appropriate, in particular to changes that significantly impact the business environment such as changes in management strategies, external conditions, major risk areas, or revised expectations in respect of achieving the business objectives. The CIEL Audit Committee reviews and approves the Internal Audit Plan.

Internal Audit activity evaluates the management and governance oversight covering key risks and the design and operating effectiveness of key controls. The output of each internal audit engagement is an audit report covering the overall audit opinion, key observations covering control failing or identified weaknesses and their potential impact, and the actions and timings which management have agreed to remediate.

B.6 Actuarial Function

The Actuarial Function is responsible for providing insightful actuarial analysis to contribute to the business's success, whilst fulfilling regulatory responsibilities and ensuring policyholders' interests are protected.

The Actuarial Function is a critical function of the Company, having a significant impact on pricing, reserving and capital. It is a key contributor to the effective control management of insurance risks relating to the failure of pricing, risks relating to the failure of product or strategy and risks relating to adverse reserve development.

The Company has an in-house Actuarial Function Holder (AFH), whilst the Actuarial team which completes the IFRS Reserving, Solvency II Technical Provisions ("TP's") and Solvency Capital Requirement calculations is outsourced via CISEL.

B. System of Governance

The Actuarial Function produces an annual Actuarial Function Report (“AFR”) to set out:

- the assessment of the reliability and adequacy of technical provisions;
- the opinion on the underwriting policy; and
- the opinion on the overall reinsurance arrangements.

The AFR and the recommendations of the Actuarial Function Holder are presented to the Board, and the progress of actions is tracked and reported to the relevant Committee(s).

B.7 Outsourcing

The Company only enters into outsourcing arrangements with service providers who have adequate financial, human, capital, and systems resources to take on the activities outsourced to them. The Company will assess that the provider is financially sound and has the relevant knowledge and experience of the service it is contracted to supply. The outsourcing of critical and/or important operational functions or activities has not been undertaken in a way that has led to any of the following:

- Materially impair the quality of the system of governance of the Group;
- Unduly increasing the exposure to Operational Risk;
- Impairing the ability of the supervising authorities to monitor the compliance of the Company with its obligations; and
- Undermining continuous and satisfactory service to policyholders.

The Company remains fully responsible for all outsourced functions and activities it needs to include in its risk management systems and controls for monitoring and reviewing the quality of the service provided. It is not sufficient for the service provider itself to have internal controls and a risk management system that covers the services performed. In order to ensure effective control of outsourced activities and manage the risks associated with the outsourcing, the Company maintains the competence and ability to assess whether the outsourcing provider delivers according to contract.

A summary of the key outsourced arrangements currently in place are as follows:

- Claims handling activities for Dental Insurance written in Norway and Sweden (registered in Norway);
- Claims handling activities for CDW and Travel Insurance (registered in Netherlands);
- Claims handling activities for Ticket Cancellation and Gadget Insurance (registered in Germany)
- Claims handling activities for CDW (registered in Malta)
- As indicated above, a service agreement for insurance administration services with CISEL (registered in Malta); and
- An Insurance Management Agreement (registered in Malta).

The arrangements detailed above are reviewed regularly to ensure outsourcing risks are mitigated and that quality of service is maintained in line with the Outsourcing & Third-Party Management Policy.

B.8 Any other information

The BoD does not consider that there is any further information which should be disclosed.

C. Risk Profile

C. Risk Profile

CIEL operates a business model that is supported by a robust risk management framework that ensures risks are well understood and controlled. This is facilitated by systematic quantification of all risks and a culture that promotes the importance of risk management.

Integral to this is a thorough understanding and articulation of CIEL's risk exposures. Determining the prevailing risk landscape within CIEL allows Management, the Risk Function, and the Board to assess the appetite for each emerging risk and to ensure that all are quantifiable and managed consistently with our appetite to risk.

The Directors have considered that the Parent does not add any material operational risk to the Group since it carries out no activities and hold minimal cash at bank. However, the strategic participation which the Parent holds in CISEL adds material market risk exposure and increases the own funds of the Group significantly. This section provides the necessary information related to the risk profile of CIEL, with any additional risks related to the Group shown as a comparison.

The table below provides a breakdown of the components of CIEL Solvency Capital Requirement (SCR) as at 30 April 2025:

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	1,781	1,743	38
Counterparty Default	390	435	(45)
Undiversified BSCR	10,162	7,897	2,265
Diversification	(3,290)	(2,703)	(587)
Base SCR	6,872	5,194	1,678
Operational Risk	2,062	1,558	504
LACDT	(321)	-	(321)
Solvency Capital Requirement	8,613	6,752	1,861
Company's Own Funds to cover the SCR	18,430	15,121	3,309
SCR Coverage Ratio	214%	224%	(10%)

C. Risk Profile

The table below provides a breakdown of the components of CHEL Solvency Capital Requirement (SCR) as at 30 April 2025:

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	2,096	2,187	(91)
Counterparty Default	390	435	(45)
Undiversified BSCR	10,477	8,341	2,136
Diversification	(3,422)	(2,856)	(566)
Base SCR	7,055	5,485	1,570
Operational Risk	2,116	1,646	470
LACDT	(321)	-	(321)
Group Solvency Capital Requirement	8,850	7,131	1,719
Group's Own Funds to cover the SCR	20,538	17,992	2,546
Group SCR Coverage Ratio	232%	252%	(20%)

The main movements in the SCR of the Company from 30 April 2024 is due to the following reasons:

- Non-Life and Health Underwriting risk has increased mainly due to an increase in forecast business volumes as well as a lower level of quota share reinsurance, both of which have increased the premium and reserve risk. Additionally, the introduction of new products—such as Shipment Protection and Ticket Cancellation—has led to a rise in catastrophe risk. Lapse risk has increased due to higher expected profits driven by rising premiums and improved profit margins.
- Counterparty Default risk has reduced due to lower quota share recoveries on the funds transferred reinsurance and cash at bank reducing (due to more funds being transferred to the money market fund where it earns a higher return).
- Operational risk has increased due to it being capped at 30% of the Basic SCR (i.e. it has increased in line with the increases in the Basic SCR).

The Eligible Own Funds have increased over the financial year due to profit on the retained earned premium and investment returns.

At the level of the Group, the movement can be explained by the following additional reasons:

- The market risk for the Group, has also increased due to the increases for the Company, although this has been offset slightly by a lower net asset value of CISEL, which has decreased the equity risk from this strategic participation.
- In addition, the Group's Own Funds to cover the SCR, has increased from last year due to the higher Own Funds of the Company.

C. Risk Profile

An overview of the key risks associated with the business including an outline of how they are managed is provided below.

C.1 Underwriting Risk

Underwriting risk arises from the volume of business the Company underwrites, inadequacies in pricing, compared to the product benefits, or worse than expected claims experience. Most of the underwriting risk to which CIEL is exposed is of a short-term nature in view of the lines of business which it writes. CIEL has a diverse portfolio of business across different product lines ensuring that it is not reliant on the performance of one line of business.

The table below shows the Underwriting Risk charge for year ending 30 April 2025 and percentage of the undiversified Basic SCR with a comparison with the previous financial year. The standard formula was considered an appropriate proxy for Underwriting risk as it applies a risk charge based on the different lines of business allowing for catastrophes and lapses.

Underwriting Risk – CHEL	FY25		FY24		Movement	
	€'000	BSCR %	€'000	BSCR %	€'000	BSCR %
Non-life Underwriting risk	4,992	48%	3,095	37%	1,897	11%
Health Underwriting Risk	2,999	29%	2,624	31%	375	(2%)
Total Underwriting Risk	7,991	77%	5,719	68%	2,272	9%

Underwriting risk is mitigated by:

- Single source performance information produced on a regular basis, feeding into the underwriting and management processes, and informing decision making. CIEL has also invested in improvements to the analytical processes – including new reserving processes and underwriting management information and pricing models.
- CIEL is a specialist insurer focusing on Travel, Health, and ancillary personal lines insurance products. As well as pricing, CIEL has additional controls to segment the market and target those risks it wishes to underwrite in close cooperation with its key affinity partners.
- Reinsurance contracts, both quota share and excess of loss, reduce exposure to large individual claims or aggregated losses from a single event and dampen the volatility in the underwriting result.
- A quarterly review of reserving loss ratios is undertaken, which sets the IFRS reserves. This is done by projecting claims to an ultimate position using underwriting year triangles. Back testing of recent experience against the expected premiums and claims emergence is performed between Reserving Committees where the analysis is challenged prior to sign off and booking. As the Solvency II Best Estimate Technical Provisions (TP's) consist of Premium Provisions, Claims Provisions and Risk Margin, the booked IFRS reserves form an input into the Company's Solvency II Best Estimate TP's Model.
- Underwriting Governance processes including the Deal rooms pay particular attention to how much Underwriting Risk Capital is being consumed by the product or scheme under review and includes comparison of the scheme risk capital to the available capital headroom. Return on Capital calculations drive underwriting focus towards items which deliver an appropriate return on capital.

Underwriting risk is monitored by:

CIEL has a Board approved risk appetite statement that includes the monitoring of the Underwriting metrics, which are monitored within appropriate governance forums. This monitoring provides assurance that CIEL is ultimately operating within the Board approved risk appetite and remains within the budgeted capital plan.

C. Risk Profile

C.2 Market Risk

Market risk arises from fluctuations in the market value of, or income from, CIEL assets. CIEL has invested its assets in Money Market Funds. This allows CIEL to gain a reasonable return on its available assets to support the operations, while also ensuring adherence to the prudent person principle and adequate liquidity since such investments are callable within 1 days' notice.

CIEL has exposure to the following types of market risk:

- **Currency risk** – CIEL is exposed to currency risk in respect of liabilities under policies of insurance and reinsurance contracts denominated in currencies other than Euro. CIEL manages its foreign exchange risk against its functional currency. Foreign exchange exposure arises when there is a mismatch in the value of the foreign currency assets and liabilities.
- **Interest rate risk** – CIEL is exposed to interest rates in respect of duration of liabilities and assets mismatching with each other under different currencies. CIEL manages its exposure to interest rate risk via quarterly Finance and Investment working group meetings to ensure the risk charge of interest rate risk within its risk appetite.
- **Spread risk and concentration risk** – CIEL is exposed to spread, and concentration risk originated from its investment portfolio.

Due to the simple structure of investment portfolio, the standard formula is deemed to be an adequate proxy given the size and complexity of CIEL's market risk exposure. Cash exposures are considered within the Counterparty Risk module.

The table below shows the Market Risk charge for year ending 30 April 2025 and percentage of the undiversified base SCR with a comparison to the previous financial year.

	FY25		FY24		Movement	
	€'000	BSCR %	€'000	BSCR %	€'000	BSCR %
CIEL Market risk	1,781	18%	1,743	22%	38	(4%)
CHEL Market risk	2,096	20%	2,187	26%	(91)	(6%)

CIEL does not use derivative instruments to manage exposure to foreign currencies, instead its ongoing monitoring of non-Euro asset and liability exposure and rebalancing any surplus / deficit positions allows CIEL to control currency exposure.

CIEL's investments are exclusively in money market funds. All Investments and cash and cash equivalents are ordinarily available within 24 hours thereby reducing the Groups liquidity exposure including under any stressed scenarios.

The Group is further exposed to market risk in the form of its investment in Collinson Insurance Solutions Europe Limited. CISEL is classified as a strategic participation of the Group and attracts market risk under the Solvency II standard formula. The Group manages this risk as explained in Section C.6 under "Group risk".

Prudent person principle

CIEL is required, and strictly follows, the prudent person principle to invest the assets used to cover its' respective MCRs and SCRs. The prudent person principle defines that the assets must be invested in a manner that a 'prudent person' would – that is that the decisions are generally accepted as being sound for the average person.

C. Risk Profile

Market Risk is mitigated by:

- The Investment Strategy defines the currencies in which underlying investment assets may be held.
- Surplus currency bank and cash positions are monitored and rebalanced by the finance function when any surplus or deficit positions arise.
- The Finance and Investment Working Group monitors the level of CIEL's exposure to foreign currency against risk appetite and the approved business plan.
- The Finance and Investment Working Group also monitors the level of CIEL's exposure to asset liability mismatching against risk appetite and the approved business plan.
- The overall level of current and forecast exposure to foreign currencies across the CIEL balance sheet and the impact this has, or may have, on the regulatory capital of CIEL is monitored by the Risk and Compliance Committee (RCC).
- CIEL does not currently use derivatives to manage currency exposure.
- The banks used by CIEL currently have a credit rating of A or higher, with the exception of a local bank which is CRD IV compliant.
- The amount of cash held by CIEL is also monitored and ensured to be within the limit approved in the business plan.

Market risk is monitored by:

Regular monitoring of cash balances, and concentration limits is managed by the Operational Cash Management team reporting to the Board. This assists with remaining within risk appetite and acts as an early warning to potential stress events. CIEL has a Board approved risk appetite statement that includes the monitoring of the Market, Investment and Liquidity risk metrics, which are monitored within appropriate governance forums. This monitoring provides assurance that CIEL is ultimately operating within the Board approved risk appetite and remains within the budgeted capital plan.

C.3 Credit Risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due. Key areas where CIEL is exposed to credit risk are:

- Reinsurer's share of insurance liabilities;
- Amounts due from reinsurers in respect of claims already paid;
- Amounts due from policyholders;
- Amounts due from insurance intermediaries; and
- Cash held with banks.

CIEL's exposure to counterparty risk arises from exposure to reinsurers in respect of reinsurance assets representing recovery reserves, and banks in respect of policyholder's operational cash balances and debtors from the distributors who sell policies on behalf of CIEL.

CIEL's current and forward-looking policy over the period of its three-year plan is to place business with reinsurers with an external credit rating of "A" or above, and to bank with and place deposits with institutions with an external credit rating of "A" or above, with the exception of HSBC Malta which is CRD IV compliant and part of the HSBC Group which is A rated.

The table below shows the Counterparty Risk charge for year ending 30 April 2025 and percentage of the undiversified base SCR with a comparison with the previous financial year.

	FY25		FY24		Movement	
	€'000	BSCR %	€'000	BSCR %	€'000	BSCR %
CIEL Counterparty risk	390	4%	435	6%	(45)	(2%)
CHEL Counterparty risk	390	4%	435	5%	(45)	(2%)

C. Risk Profile

CHEL's counterparty risk includes additional cash at bank which is not included in CIEL. The amount of cash at bank held by CHEL was immaterial in FY 25.

Credit Risk is mitigated by:

- CIEL manages the level of credit risk it accepts by placing limits on its exposure to a single counterparty, or groups of counterparties, and to geographical and industry segments. Such risks are subject to regular review.
- CIEL has a minimum reinsurer credit agency rating (A.M. Best) appetite of A, with its principal Quota Share reinsurer having a rating of A+.
- The Excess of Loss reinsurance panel comprises of reinsurers with a minimum credit rating of A. The panel is composed primarily of Lloyd's reinsurers.
- The Board Policy is to maintain intercompany debt with other Collinson entities at a minimum, thereby reducing CIEL's counterparty credit exposure.
- Exposure to credit risk in respect of amounts due from policyholders is mitigated by CIEL's large customer base and the low average level of balances outstanding. The Company is not exposed to concentrations of credit risk in respect of policyholders.
- The Risk & Compliance Committee meets on a quarterly basis and is responsible for monitoring these risks remain within risk appetite.

Credit exposure

Information on CIEL's credit risk exposures can be found in Note 6.2.4 in the Audited Financial Statements of CIEL.

Impaired financial assets

For assets to be classified as 'past-due and impaired' contractual payments must be in arrears for more than 90 days. During the year ended 30 April 2025, an amount of €58k (2024: €50k) due from an insurance intermediary has been provided for as bad debt.

Counterparty risk is monitored by:

Regular monitoring of cash balances, and concentration limits is managed by the Operational Cash Management team reporting to the Finance Leadership Team. This team assists with ensuring CIEL remains within risk appetite and act as an early warning to potential stress events. CIEL has a Board approved risk appetite statement that includes the monitoring of the Credit Risk (including counterparty) risk metrics, which are monitored within appropriate governance forums. This monitoring provides assurance that CIEL is ultimately operating within the Board approved risk appetite and remaining within the budgeted capital plan.

C.4 Liquidity Risk

Liquidity risk is the risk that CIEL although solvent or profitable, either does not have available sufficient financial resources to enable it to meet its obligations as they fall due or can secure such resources only at excessive cost.

Liquidity risk is not explicitly included within the standard formula SCR calculation and is not considered a material risk to the Company as the assets to support its risks and capital requirements are held in Money Market Funds or cash deposits with banks with a current credit rating of A or higher. The Company considers the composition of its assets in terms of their nature and liquidity to be appropriate and sufficient to meet its obligations as they fall due.

The Company manages the level of liquidity risk through:

- Liquidity and Asset Liability Management Policies in place;
- Monthly cash forecast;
- Monthly report of cash and liquid balances presented to the Board;
- ALM (currency) forecast on quarterly basis; and
- Set guidelines on asset allocations, portfolio limit structures and maturity profiles of assets, in order to ensure sufficient funding available to meet insurance contract obligations.

C. Risk Profile

During the year ended 30 April 2025, CIEL was not exposed to significant liquidity risk.

C.5 Operational Risk

CIEL is exposed to operational risk through its operational outsourcing relationships, regulatory or legal environments and external events that affect the operation of CIEL. To operate efficiently, CIEL recognises that it needs to have a robust framework in place to manage operational risk. The framework is underpinned by an Operational Risk Policy.

The following are the Board Policy Statements that have been implemented to manage Operational Risk:

Risk Culture: The Board and Executive Management will seek to lead CIEL in delivering a strong risk management culture.

Risk Framework: The Risk function will seek to develop, implement, and maintain a risk framework and standards that align to regulatory requirements.

Risk Identification: CIEL will seek to use appropriate risk management tools to identify actual, potential, or emerging risks in all material products, activities, processes, and systems.

Risk Assessment: CIEL will seek to use appropriate risk management tools to assess risks in all material products, activities, processes, and systems to ensure that risks are properly understood.

Risk Control: CIEL will seek to use appropriate internal controls e.g., policies, processes and systems and appropriate risk mitigation and transfer strategies to manage its operational risks.

Risk Events: CIEL will seek to ensure that incidents are identified, escalated, and effectively managed within agreed parameters.

New Product Approval: CIEL will seek to ensure that new products, material changes to existing products and associated operational implications are assessed for risk.

Risk Reporting: CIEL will seek to regularly monitor its risk profile and material exposure to losses.

Operational Resilience: CIEL will seek to maintain robust operational, cyber, and technological resilience for both its in-house processes and activities and those undertaken by its partners.

As a standard formula company, the Operational Risk SCR charge is primarily driven by premium volumes especially premium volume growth. Operational risk charge accounts for 30% of the Basic SCR in FY25, in line with the prior year. The table below shows the Operational Risk charge for year ending 30 April 2025 and percentage of the SCR with a comparison with the previous financial year.

	FY25		FY24		Movement	
	€'000	BSCR %	€'000	BSCR %	€'000	BSCR %
CIEL Operational risk	2,062	30%	1,558	30%	504	-
CHEL Operational risk	2,116	30%	1,646	30%	470	-

CIEL seeks to mitigate the risk with the implementation of a robust operational risk framework which is consistent, effective, economic, and proportionate to the nature, scale, and structure of the business. The framework is supported by an Operational Risk Policy and procedures detailing clear roles and responsibilities to support staff in undertaking their “business as usual” activities whilst managing the “day to day” operational risks.

As underwriting premium growth continues to be a key driver of Operational Risk SCR, CIEL has implemented a 3-Year Capital Planning cycle embedded in its business planning procedures. This enables identification of the level of premium growth and the level of Operational Risk SCR within risk appetite. The process has been implemented within the scheme underwriting processes and constitutes a key part of Solvency II embedding in general business activity. This monitoring provides assurance that CIEL is ultimately operating within the Board approved risk appetite and remaining within the budgeted capital plan.

C. Risk Profile

C.6 Other Material Risks

Other risks that could impact the Company's ability to meet its business plan are:

Financial risk from climate change

Financial risk from Climate Change (FRCC) is not a new risk but has received heightened regulatory focus within financial services and increased expectations for external reporting during the past few years. A key aspect is financial risks caused due to climate change, not solely the impact of climate change.

The conclusion of the assessment is that CIEL has minimal exposure to FRCC. The Board has considered that the capital charge within the Standard Formula adequately captures all the risks of the Company and does not believe an additional capital charge is required for FRCC following this assessment. The Board is confident that the robust control framework and monitoring in place reduces the probability of risks crystallising in this area and that no additional management action is considered necessary to reduce the risks further.

Strategic Risk

Strategic risk is defined as 'failure to set and implement an appropriate strategy', has been assessed as within CIEL's risk appetite. To this extent, whilst not explicitly modelled, the consequences of inappropriate strategic decisions will be assessed within each risk contributing to the SCR.

Group Risk

The Company is dependent upon on the wider Collinson Group for the provision of the following services directly associated with the sale of insurance and servicing of policy obligations.

- Underwriting and pricing
- Claims handling
- Finance, actuarial reserving, and taxation
- Policy administration
- Investment management and treasury.

The current outsourcing arrangement in respect of operating costs (non-technical in nature) is with CISEL. CISEL is the legal entity through which the Collinson Group performs managing agency business in Europe. CISEL also provides insurance administration services to CIEL.

There is a separate profit commission agreement between CIEL and CISEL covering the respective arrangements in place for the profit commission paid to CISEL for the provision of insurance administration services to CIEL. The basis of this profit commission is CIEL retain a 4.5% cost of capital fee on retained net earned business written, with the balance of underwriting profit being paid as profit commission to CISEL. (Note: there is a guaranteed profit commission of 10% to CISEL and in effect a "corridor", of 85.5% to 61%, where the profit commission paid is restricted. Typically, our loss ratio is 66% and the corridor limits are not breached).

This model means, that subject to the upper corridor limit (85.5%) not being breached, then CIEL will make a 4.5% profit before FX and interest. This is reflected in the future forecasts which show a steady profit stream and increase in own funds, within well capitalised SII funds. For CISEL, the profit commission received is variable depending on underwriting performance of the overall portfolio.

CIEL therefore has a significant inter-dependence with CISEL to enable the Company to deliver the services to its ultimate clients, including the provision of insurance administration services. CIEL works closely with CISEL to satisfy itself that it continues to have the economic and operational resources to continue to meet their obligations to the Company.

C. Risk Profile

In addition, Collinson Group provides services to CISEL which indirectly support the sale of insurance and servicing of policy obligations.

- Property and infrastructure
- People and culture
- Information systems
- Data management

Collinson Group remains committed to supporting business growth of CIEL, with the Insurance Division and CIEL containing key components of the Collinson Group's strategy.

Emerging risks

CIEL's approach is to ensure such risks are identified at an early stage by using a Strategic Risk Radar to assess, record and monitor emerging risks to ensure controls are in place where required to mitigate the risk. This is regularly reviewed at the Risk and Compliance Committee.

Once an emerging risk can be assessed and more is discovered about its potential impact and likelihood, the relevant committee Chairperson is responsible for escalating this to the Risk Function for further discussion and potential inclusion within the risk register. In this way, an appropriate mitigation plan to avoid any losses can be developed.

The Board is confident that the robust control framework and monitoring in place reduces the probability of risks crystallising in this area and that no additional management action is considered necessary to reduce the risks further.

C.7 Any other information

Group Consolidation

CIEL forms part of an insurance group which potentially adds risks outside of the normal spectrum of an insurance company. The Directors have considered that the Parent does not add any material operational risk to the Group since it carries out no activities and hold minimal cash at bank. However, the strategic participation which the Parent holds in CISEL adds material market risk exposure and increases the own funds of the Group significantly. CISEL is an insurance intermediary which carries out insurance policy administration and claims handling for the operations of the Company and also services third party underwriters and accordingly is being treated as a strategic participation when considering the requirements of Article 335 of the Solvency II Delegated Regulation and EIOPA published Q&A ID 649.

The Board does not consider that there is any further information which should be disclosed.

D. Valuation for Solvency Purposes

D. Valuation for Solvency Purposes

Assets and liabilities under Solvency II are valued in accordance with the Solvency II Directive. “The primary objective of valuation as set out in Article 75 of Directive 2009/138/EC requires an economic, market-consistent approach to the valuation of assets and liabilities. According to the risk-based approach of Solvency II, when valuing Balance Sheet items on an economic basis, undertakings need to consider the risks that arise from a particular Balance Sheet item, using assumptions that market participants would use in valuing the asset or the liability.”

The values of the assets and liabilities prepared using International Financial Reporting Standards as adopted by the EU (“IFRS”), have been used with some adjustments as outlined in the following sections. These adjustments are in line with the recommendations in the EIOPA Technical Specifications.

References to “the Regulation” in this Section are in respect of the Commission Delegated Regulations (EU) 2015/35.

D.1 Assets

The following table shows a comparison of asset figures under both Solvency II and IFRS for the Group.

Assets	Solvency II	IFRS	Movement
	€'000	€'000	€'000
Financial assets	40,284	40,284	-
Holdings in participations	2,035	2,035	-
Reinsurance contract assets		(51)	51
Reinsurance recoverables from:	(697)	-	(697)
Non-life excluding health	(223)	-	(223)
Health similar to non-life	(474)	-	(474)
Insurance and intermediaries receivables	2,279	43,768	(41,489)
Receivables (trade, not insurance)	1,855	2,529	(674)
Cash and cash equivalents	2,122	2,122	-
Total assets	47,878	90,687	(42,809)

A description on the valuation techniques utilised are described below:

Deferred tax asset

Deferred tax assets are valued as the difference between the assets and liabilities recognised in accordance with Solvency II and under IFRS. Deferred tax assets are only recognised on the basis that future taxable profit will be available against which the deferred tax asset can be utilised. As at 30 April 2025, the Company did not have any unrecognised temporary differences or trading losses and therefore did not recognise a deferred tax asset.

D. Valuation for Solvency Purposes

Financial assets

CIEL classifies its investments at amortised cost. The classification is dependent on the purpose for which the assets were acquired. The Directors determine the appropriate classification of investments at the time of purchase and re-evaluate such designation at every reporting date.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Financial assets at amortised cost are subsequently measured using the effective interest rate method and are subject to impairment. Gains and losses are recognised in other comprehensive income when the asset is derecognised, modified or impaired.

Financial assets at amortised cost as at 30 April 2025 amounted to €40,284k (2024: €30,558k). The Solvency II valuations of these financial assets are the same as the valuations required by the International Financial Reporting Standards (IFRS).

Holdings in participations

Holdings in participations were valued on the basis of the net asset value of the participation. The net asset value approximates the market value of the holdings in participations in accordance with Article 8 of the Regulation. This has been classified as a strategic participation in the SCR calculation and stressed under the equity risk module.

Reinsurance recoverables

Reinsurance recoverables are calculated using a Best Estimate concept in line with Solvency II valuation techniques as compared to IFRS which considers a case-by-case estimate at a point in time. Information on the valuation principles of the reinsurance recoverables is provided in Section D.2.

Insurance and intermediaries' receivables

The Solvency II valuation is based on the best estimate of the recoverable value, discounted to present value where the expected recovery is greater than one year. In addition, the undue insurance receivables are classified into the technical provisions and included as part of the Premium Provisions as they constitute a future cashflow. Information on the valuation principles utilised to calculate the Premium Provision are disclosed in Section D.2.

Receivables (trade, not insurance)

Receivables are calculated using IFRS valuation principles and approximate the fair value of the asset. This is in accordance with Article 8 of the Regulation. The Receivables have been stressed under the Counterparty Default Risk module.

Cash and cash equivalents

Cash and cash equivalents were valued using the market price of the asset in accordance with Article 8 of the Regulation and is consistent with the valuation approach under IFRS. These have been stressed under the counterparty default risk module. Cash at bank also includes exposures in foreign currencies which are stressed under the currency risk module within market risk.

Loss absorbing capacity of deferred tax assets under Solvency II

The value of the SCR may be reduced to allow for the loss absorbing capacity of deferred tax assets ("LACDT"). This adjustment is calculated in accordance with Article 207 of the Regulation and is equal to the change in the value of deferred taxes that would result from an instantaneous loss of an amount that is equal to the Basic SCR plus operational risk.

D. Valuation for Solvency Purposes

D.2 Technical Provisions

The calculation of Technical Provisions (“TPs”) under Solvency II relies on similar principles to the IFRS 17 calculation of liabilities with respect to expired and unexpired risk. Both calculations use the actuarial ‘best estimate’ of liabilities and are discounted on a cashflow basis, which takes into account the time value of money. Both approaches also allow for expenses, Events Not in Data (“ENIDs”) and a risk adjustment/margin to account for the cost of holding capital.

Differences between both bases arise in the provision of expenses. IFRS 17 includes expense payables in the calculation of liabilities. Solvency II excludes expense payables but instead incorporates a provision for expenses that would be incurred in running off the business. Furthermore, Solvency II is more prescriptive on the discount rate and the methodology used for the calculation of the risk adjustment, whereas IFRS 17 is flexible and therefore may differ to the Solvency II assumptions used.

Valuation results

The valuation was carried out together for each line of business.

The table below sets out the results of the gross technical provisions under both IFRS and Solvency II basis.

Gross Technical Provisions	SII €'000	IFRS €'000	Movement €'000
Liabilities for expired risk	8,815	8,886	(71)
Liabilities for unexpired risk	9,780	52,236	(42,456)
Risk Margin	367	387	(20)
Total Gross Technical Provisions	18,962	61,509	(42,547)

The table below shows the composition of Best Estimate and Risk Margin by Solvency II Line of Business:

		Direct business and accepted proportional reinsurance					Total Non-Life obligation €'000
		Medical expense insurance €'000	Assistance €'000	Fire and other damage to property €'000	Other motor insurance €'000	Marine, aviation and transport insurance €'000	Miscellaneous financial loss €'000
Premium provisions							
Gross - Total Direct Business	3,804	6,387	15	(471)	-	45	9,780
Total recoverable from reinsurance	(4,802)	(2,006)	(50)	(264)	(58)	6	(7,174)
Net Best Estimate of Premium Provisions	8,606	8,393	65	(207)	58	39	16,954
Claims provisions							
Gross - Total Direct Business	5,550	2,646	90	479	57	(7)	8,815
Total recoverable from reinsurance	4,328	1,822	50	232	53	(7)	6,478
Net Best Estimate of Claims Provisions	1,222	824	40	247	4	-	2,337
Total best estimate - gross	9,354	9,033	105	8	57	38	18,595
Total best estimate - net	9,828	9,217	105	40	62	39	19,291
Risk margin	125	129	2	94	12	5	367

D. Valuation for Solvency Purposes

The value of TPs corresponds to the current amount an insurer would have to pay if it were to transfer its obligations immediately to another insurance undertaking. TPs are the sum of the best estimate liabilities (“BEL”) and the risk margin. Best estimate corresponds to the probability-weighted average of future cash flows, taking into account the time-value of money using the relevant risk-free rate term structure. The bases, methods and assumptions used for the valuation of TPs are as follows:

Calculation Basis

- Calculations are carried out on a going-concern basis;
- Insurance exposure is split into six lines of business; Medical Expenses, Assistance, Fire and other Damage to Property, Other Motor Insurance, Miscellaneous Financial Loss and Marine, Aviation & Transport;
- TPs are calculated as best estimate cash flow projections of all inflows and outflows required to settle liabilities. The time horizon for the calculations is the full lifetime of liabilities that exist on the valuation date;
- Cash flows are discounted using the EIOPA basic risk-free rates (without the matching adjustment and volatility adjustment). It is assumed that, on average, cash flows occur in the middle of each month; and
- Best estimate calculations are at homogenous risk group level by scheme and scheme year and are based on up-to-date credible information and realistic assumptions. The quality and sufficiency of data underlying the calculation is compliant with SII standards.

Best Estimate

- The TPs, so far as concerns this element, are on a best estimate basis, and
- The best estimate consists of a claims provision and premium provision for business on risk at the valuation date.

Claim Provisions

- The claims provisions are calculated as the discounted best estimate of all future cash flows relating to existing claims that occurred on or prior to the valuation date (i.e., claims on earned business);
- The provision for claims outstanding is the underlying best estimate, as calculated within the IFRS reserves using a combination of actuarial and statistical techniques, including Chain Ladder and Bornhuetter-Ferguson techniques.

The following adjustments are made in the best estimate claims provisions:

- Allow for low probability high severity events, referred to as Events Not in Data (“ENIDs”) where applicable.
- Include SII expenses required for the run-off of reserves where applicable; and
- Discount cash flows.

D. Valuation for Solvency Purposes

The following table shows the changes between the IFRS and Solvency II Claims Provisions:

	IFRS	SII
	€'000	€'000
Liability for incurred claims	9,273	
IFRS discounting	30	
Risk Adjustment	(387)	
Reinsurance	(6,488)	
PAD Provision	115	
Valuation under previous accounting practices	2,543	
SII Adjustments:		
PAD Provision		(115)
Run-off expenses allocated		(24)
Discount Factor		(67)
Net claims provision under Solvency II		2,337

The amount of recoverables from reinsurance contracts on the claims provision are shown as “Reinsurance Recoverables” in Section D.1. The valuation principles of reinsurance recoverables follow the same valuation principles utilised to arriving to the gross claims provision.

The following are the main differences that arise between the solvency valuation and the accounting valuation:

- the provision for the time-value for money considers only a risk-free-rate for the solvency valuation while the accounting valuation uses a risk-free-rate plus an illiquidity adjustment;
- the concept and calculation of the risk margin for the solvency valuation is different from that of the risk adjustment under the accounting valuation;
- the allocation of other directly attributable costs to the accounting valuation which are included as part of “payables (trade, not insurance)” in the solvency valuation.

Premium Provisions

- The premium provisions are calculated as the discounted best estimate of all future cash flows relating to claims for projected future events on existing business (i.e., claims on the unearned business);
- The premium provisions also include the discounted best estimate of all future cashflows on bound but not incepted (“BBNI”) business;
- Cash flows are projected in line with all insurance obligations related to future exposure until contract boundaries, and lapses and mid-term cancellations are allowed for as per business expectations; and
- The following adjustments are made in the best estimate premium provision:
 - Allow for ENIDs;
 - Include SII expenses required for the run-off of reserves where applicable;
 - Include unpaid premium not overdue, net of provision for bad debts; and
 - Discount cash flows.

D. Valuation for Solvency Purposes

The following table shows the changes between the IFRS and Solvency II Premium Provisions:

	IFRS	SII
	€'000	€'000
Liability for remaining coverage	52,236	
Profit commissions	(16,832)	
Directly attributable expenses	723	
Reinsurance	(26,862)	
XOL	(424)	
FX on UPR/ DAC reallocated under IFRS 17	4	
Unearned premium valuation under previous accounting practices	8,845	
SII Adjustments		
ENID Loading		99
Allowance for BBNI		(875)
Profit on unearned premium		(2,562)
Premium receivable		(35,037)
Run-off expenses allocated		47,687
Discount Factor		(1,203)
Net Premium provision under Solvency II		16,954

The profit on the unearned premiums arises due to the assumed loss and expense ratios being less than 100%.

The above approach to calculate expected claims is consistent with the Actuarial Function Report, which is provided by the Actuarial Function Holder, and which follows the roles and responsibilities laid out in Section B.7.

Risk Margin

- The Risk Margin is included as a component of the technical provisions in order to ensure that the value of total technical provisions is equivalent to the amount that another insurance or reinsurance undertaking would be expected to require in order to take over and meet the insurance and reinsurance obligations.
- The Risk Margin has been calculated in accordance with simplification 3 within the EIOPA guidance, which assumes the SCR will proportionally decrease based on the run-off pattern of net claims payments.
- A 6% Cost of Capital rate is assumed to determine the cost of providing the funds as defined in SII.
- The Risk Margin is calculated to be €367k (2024: €333k).

Reinsurance Recoverables

- TPs are calculated gross, and the reinsurance recoverable asset is calculated using a similar corresponding approach, consistent with the boundaries of the inwards contracts to which those relate. Additionally, future reinsurance costs are adjusted where necessary to allow for contractual obligations of non-proportional reinsurance contracts.
- The reinsurance recoverable asset has been adjusted to allow for the best estimate probability of reinsurer default. Reinsurance recoverables relate to insurance liabilities ceded to A-rated reinsurers for quota share, and a panel of A-rated reinsurers for excess of loss reinsurance.

D. Valuation for Solvency Purposes

Level of uncertainty associated with the amount of TP's

The key assumptions that may impact the Technical Provisions are detailed below along with the comments regarding the materiality of these assumptions.

- **Assumed loss ratio:** Loss ratios are calculated by scheme and reviewed and approved by the Underwriting and Claims Committee.
- **Settlement period:** Claims settlement patterns are calculated by scheme and based on historical data. The settlement patterns feed into the Technical Provisions to split out the future cashflows by period.
- **Discount rate:** The short-tailed nature of the liabilities underwritten by the Company means that discounting benefit applied to the Technical Provisions is relatively low.
- **Expenses:** The relevant expenses involved in the operation of the Company are included within the calculation of the technical provisions.
- **Reinsurance:** It is assumed that the reinsurance will perform as expected, although the technical provisions include an allowance for bad debt.
- **ENIDs:** Events not in Data ("ENIDs") are calculated based on scenario analysis for each line of business underwritten by CIEL. The amount calculated is small compared with other elements in the calculation of the technical provisions.

Matching adjustment, volatility adjustment and transitional provisions

The Company has no matching adjustments, volatility adjustments or transitional measures as at the reporting period.

Changes to technical provisions from previous reporting period

The following graph shows the walk from year end 2023 Solvency II TP's to year end 2024 Solvency II TP's.

SII Technical Provisions FY24 to FY25 – Net of Reinsurance

Key for waterfalls:

decrease in TP's

increase in TP's

D. Valuation for Solvency Purposes

Reinsurance

The Company's reinsurance program comprises of two components –Excess of Loss (XOL) and Quota Share (QS) reinsurance. The Company has two XOL treaties, one covering International Private Medical and another for Travel Insurance, as ordinarily these are the only products exposed to large losses. The treaties are placed predominantly into the Lloyd's and London reinsurance market. For the QS programme we strictly adhere to our appetite in terms of security of reinsurers with all our reinsurers being A-rated or better.

Claims Management Procedures

Claims management procedures utilised by CIEL are broadly similar year on year and incorporate both direct and indirect costs associated with the management and settlement of claims.

D.3 Other Liabilities – Solvency II balance sheet

Financial liabilities are recognised when CIEL become a party to the contractual provisions of the instrument. Financial liabilities are classified according to the substance of the contractual arrangement entered into.

All financial liabilities are initially measured at transaction price.

The following table shows a comparison of other liabilities figures under both Solvency II and IFRS for the Group.

Other Liabilities	Solvency II	IFRS	Movement
	€'000	€'000	€'000
Deferred tax liabilities	321	-	321
Insurance & intermediaries payables	3,338	8,997	(5,659)
Reinsurance payables	653		653
Payables (trade, not insurance)	4,066	5,127	(1,061)
Total other liabilities	8,378	14,124	(5,746)

A deferred tax liability of €321k is recognised on the Solvency II balance sheet in respect of difference on the valuation of assets and liabilities and their corresponding tax base.

Insurance & intermediaries payables under Solvency II are reclassified as either Insurance Contract Liabilities or Payables (trade not insurance) in the case of certain accruals under IFRS. Payables (trade, not insurance) on the IFRS balance sheet includes indirect tax liabilities, amounts due to Group undertakings other payables. The difference in value between the two-accounting basis relates to reclassifications rather than valuation differences.

D.4 Alternative methods for valuation

No alternative valuation methods have been utilised by CIEL.

D.5 Any other information / disclosures

There is no other information to report on.

D. Valuation for Solvency Purposes

Company Information

The following table shows a comparison of asset figures under both Solvency II and IFRS for CIEL.

Assets	Solvency II	IFRS	Movement
	€'000	€'000	€'000
Financial assets	40,284	40,284	-
Reinsurance contract assets		(51)	51
Reinsurance recoverables from:	(697)	-	(697)
Non-life excluding health	(223)	-	(223)
Health similar to non-life	(474)	-	(474)
Insurance and intermediaries receivables	2,279	43,768	(41,489)
Receivables (trade, not insurance)	1,854	2,529	(675)
Cash and cash equivalents	2,041	2,041	-
Total assets	45,761	88,571	(42,810)

There are no differences in the calculation of assets between the Group and the Company.

There is no additional information to be provided on the valuation and calculation of technical provisions in relation to the Company that have been provided in Section D.2.

The following table shows a comparison of other liabilities figures under both Solvency II and IFRS for CIEL.

Other Liabilities	Solvency II	IFRS	Movement
	€'000	€'000	€'000
Deferred tax liabilities	321	-	321
Insurance & intermediaries payables	3,338	8,996	(5,658)
Reinsurance payables	653		653
Payables (trade, not insurance)	4,057	5,120	(1,063)
Total other liabilities	8,369	14,116	(5,747)

There are no differences in the calculation of other liabilities between the Group and the Company.

Under the accounting valuation of IFRS 17, the insurance and reinsurance payables together with the trade payables are now classified as part of the insurance contract liabilities.

There are no other material information relating to valuation of assets or other liabilities, and there have been no material changes in the valuation of assets or liabilities during the year.

E. Capital Management

E. Capital Management

E.1 Own Funds

The Group aims to ensure that its 'own funds' consists of the appropriate mix of 'tier 1', 'tier 2' and 'tier 3' (including ancillary own funds) capital as defined by Chapter 5 MFSA insurance rules issued under the Insurance Business Act. However, as far as possible the Group will aim to have tier 1 capital. The Group's own funds shall take the form of:

- Ordinary Share Capital
- Retained Earnings
- Shareholders' contribution
- Unpaid and uncalled Share Capital
- Any other capital admissible under the above insurance rules

The following table analysis the movement of capital between tiers as at 30 April 2025 and 2024:

CHEL Own funds	Own Funds Quality	FY25	FY24	Movement
		€'000	€'000	€'000
Ordinary share capital	Tier 1	7,400	7,400	-
Shareholders' contribution	Tier 1	700	700	-
Reconciliation reserve	Tier 1	12,438	9,892	2,546
Total Own Funds		20,538	17,992	2,546

Total own funds are utilised to cover the SCR for the Group. Only Tier 1 Capital is utilised to cover the MCR for CIEL.

The Group's components of own funds are detailed below:

Tier 1 Capital

Tier 1 Capital is made up of paid-in ordinary share capital, shareholders' contribution and the reconciliation reserve. This is of the highest quality and permanent. The paid-in ordinary share capital amounted to €7,400,000 (2024: €7,400,000). The Group has further a paid in shareholders' contribution of €700,000 (2024: €700,000).

The reconciliation reserve is made up of the following:

Group	FY25	FY24
	€'000	€'000
Solvency II Excess of Assets over Liabilities	20,538	17,992
Other Basic Own Funds Items	8,100	8,100
Reconciliation reserve	12,438	9,892

E. Capital Management

The following table provides a reconciliation between the Group Solvency II Own Funds and the Total Group Equity as per IFRS:

	FY25	FY24
	€'000	€'000
Solvency II Excess of Assets over Liabilities	20,538	17,992
Difference in the value of assets	42,809	30,830
Difference in the value of gross technical provisions	(42,547)	(43,293)
Difference in the value of other liabilities	(5,746)	8,497
Total Group Equity as per IFRS	15,054	14,026

The differences in assets are explained in D.1, the differences in technical provisions are explained in D.2, whilst the differences in other liabilities are explained in D.3.

Tier 3 Capital

Tier 3 capital is made up of the Net Deferred Tax Asset. As at 30 April 2025, the Company did not have any Tier 3 capital.

None of the Group's own funds are subject to transitional arrangement. No additional ratios to the ones calculated and disclosed in template S.23.01 are included in this document. None of the Group's own funds are transferable or fungible.

Capital Management

The Company's capital is managed to ensure that all regulatory requirements in relation to capital levels maintained are satisfied. To achieve this objective, the following capital requirements are adhered to:

- The Solvency Capital Requirement (SCR) calculation
- The Minimum Capital Requirements (MCR) calculation

The Board ensures that the higher of these two capital requirement assessments shall be maintained. Secondary to fulfilling the Group's regulatory requirements as described above, the Board aims to maximize the employment of capital, subject to the conditions imposed by the Group's investment policy.

The Board formally reviews the utilization of the Group's capital and the overall effectiveness of its capital management policy at least annually.

There are no additional solvency ratios to the ones included in template S.23.01 (i.e., SCR and MCR) to be disclosed by the Group.

Calculation of Group Own Funds and Calculation of Solvency

Group own funds and solvency capital calculations have been carried out in accordance with Method 1 – Accounting consolidation-based method in accordance with Article 230 of the Directive.

The Directors of CIEL have determined that CISEL should be classified as a strategic participation when considering the requirements of Article 335 of the Solvency II Directive and EIOPA published Q&A ID 649.

Capital Shortfalls

The Board is confident that in the event of a capital shortfall that the Collinson Group, in response to a justified request for a capital injection, will take the necessary action to ensure that the Group's regulatory capital requirements are met.

E. Capital Management

In the unforeseen event that the Group faces insufficient levels of Capital to meet its regulatory requirements, the Board shall investigate alternative measures to realign the business plan with its capital base. These measures shall include de-risking, amendments to underwriting and risk retention strategy, amendment to pricing strategy and, if necessary, to request additional capital from the parent.

The Group has the following components of own funds as at 30 April 2025 and 2024: Tier 1 basic own funds; ordinary share capital, capital contribution and reconciliation reserve.

The Group's ordinary shares have full voting, dividend, and capital distribution (including on winding up) rights; they do not confer any rights of redemption.

No own funds items are subject to transitional arrangements.

No deductions are applied to own funds and there are no significant restrictions affecting their availability and transferability.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

Solvency Capital Requirement Coverage

Group Solvency Position	FY25 €'000	FY24 €'000
Group's Own Funds to cover the SCR	20,538	17,992
Solvency Capital Requirement	8,850	7,131
SCR Coverage Ratio	232%	252%
Group's Own Funds to cover the Minimum Consolidated Group SCR	20,538	17,992
Minimum Consolidated Group SCR	4,000	4,000
Minimum Consolidated Group SCR Coverage Ratio	513%	450%

The Group uses EIOPA's Solvency II standard formula as the basis for calculating the SCR.

The minimum consolidated Group SCR was calculated in accordance with the Commission Delegated Regulation. With effect from October 2022, the absolute floor for the calculation of the MCR increased from €3,700,000 to €4,000,000. The MCR remained at the level of the absolute MCR (AMCR) of €4,000,000 (2024: €4,000,000).

The SCR and MCR are calculated on the basis of the eligible own funds.

The Own Funds available to cover the SCR and MCR has been positively impacted by the higher net asset value of CISEL and by the financial results registered during the year under review.

E. Capital Management

The calculation below shows the net best estimates and net written premiums for the year 2025 per line of business utilised in the calculation of the linear minimum consolidated Group SCR.

Linear formula component for non-life insurance obligations	€'000	Net best estimate and TP calculated as a whole €'000	Net written premium in the last 12 months €'000
Medical expense insurance		9,828	16,269
Other motor		39	7,267
Fire and other damage to property		106	265
Marine, aviation and transport insurance and proportional reinsurance		64	208
Assistance		9,216	14,376
Miscellaneous financial loss		39	261
Overall MCR calculation			
Linear MCR	4,816		
SCR	8,850		
MCR cap	3,983		
MCR floor	2,213		
Combined MCR	3,983		
Absolute floor of the MCR	4,000		
Minimum Capital Requirement	4,000		

Solvency Capital Position

During the year, the Group continued to keep under review the assumptions underpinning the standard formula and assessment that the continued use of the standard formula to calculate the SCR remains appropriate.

As set out in the EIOPA Directive, the Group's solvency position is calculated using method 1 ("accounting consolidation-based method"). The Group held €20,538k of eligible unrestricted Own Funds to cover the SCR as at 30 April 2025 (2024: €17,992k). The Group held sufficient capital to cover the SCR throughout the reporting period.

E. Capital Management

The table below provides a breakdown of the components of CHEL's SCR as at 30 April 2025:

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	2,096	2,187	(91)
Counterparty Default	390	435	(45)
Undiversified BSCR	10,477	8,341	2,136
Diversification	(3,422)	(2,856)	(566)
Base SCR	7,055	5,485	1,570
Operational Risk	2,116	1,646	470
LACDT	(321)	-	(321)
Group Solvency Capital Requirement	8,850	7,131	1,719
Group's Own Funds to cover the SCR	20,538	17,992	2,546
Group SCR Coverage Ratio	232%	252%	(20%)

Loss absorbing capacity of deferred tax assets under Solvency II

The value of the Combined SCR has been reduced to allow for the loss absorbing capacity of deferred tax ("LACDT"). This adjustment has been calculated in accordance with Article 207 of the Regulation and is equal to the change in the value of deferred taxes that would result from an instantaneous loss ("IL") of an amount that is equal to the Basic SCR plus operational risk.

As at 30 April 2025, CIEL has taken an LACDT benefit of €321k (2024: Nil). The LACDT has been calculated on the basis that the IL would remove the need for CIEL to meet the Deferred Tax Liability on the balance sheet. No LACDT has been calculated based on any expectation of future profit that would lead to the creation of a Deferred Tax Asset.

Changes to the methodology of the underlying SCR calculation

No changes were made to the methodology of the underlying SCR calculation during the year ended 30 April 2025.

Undertaking Specific Parameters (USPs)

The Group does not use any Company undertaking specific parameters in the standard formula calculation. Simplified calculations are used in computing spread risk within the Market Risk Module in accordance with Article 104 of the regulations.

Capital add-on

The Group does not make use of any capital add-ons, as the risk profile does not deviate significantly from the assumptions underpinning the calibration of the standard formula.

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

The duration-based method of calculating the equity risk sub-module has not been used in the Company's SCR calculation.

E.4 Differences between the standard formula and any internal model used

The Group uses solely the standard formula for its solvency capital requirement calculation.

E. Capital Management

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement during the period.

During the financial year ended 30 April 2025 there were no instances during which the Group was not compliant with both the MCR and SCR. Furthermore, the Board of CIEL approved an ORSA report during 2025 which showed that the Company expects to meet its capital requirements over its planning period.

E.6 Any other information

Loss absorbing capacity of deferred tax

The establishing of a Deferred Tax Liability on the SII balance sheet has allowed for the inclusion of the loss absorbing capacity of deferred tax within the SCR.

Events after the reporting period

In July 2025, CHEL injected an additional €1,000,000 in CIEL in the form of a Capital Contribution.

E. Capital Management

Company information

The section provides information of the Capital Management in respect of the Company. There are no material differences with respect to the capital management processes between the Group and the Company except as explained below.

The following table analyses the movement of capital between tiers of CIEL as at 30 April 2025 and 2024:

CIEL Own funds	Own Funds Quality	FY25	FY24	Movement
		€'000	€'000	€'000
Ordinary share capital	Tier 1	8,300	8,300	-
Capital contribution	Tier 1	1,700	700	1,000
Reconciliation reserve	Tier 1	8,430	6,121	2,309
Total Own Funds		18,430	15,121	3,309

The reconciliation reserve is made up of the following:

CIEL	FY25	FY24
	€'000	€'000
Solvency II Excess of Assets over Liabilities	18,430	15,121
Other Basic Own Funds Items	10,000	9,000
Reconciliation reserve	8,430	6,121

The following table provides a reconciliation between CIEL Solvency II Own Funds and the Total Equity as per IFRS:

	FY25	FY24
	€'000	€'000
Solvency II Excess of Assets over Liabilities	18,430	15,121
Difference in the value of assets	42,810	30,830
Difference in the value of gross technical provisions	(42,547)	(43,293)
Difference in the value of other liabilities	(5,747)	8,497
Total Group Equity as per IFRS	12,946	11,155

E. Capital Management

CIEL's solvency position as at 30 April 2025 was as follows:

Solvency Position	FY25 €'000	FY24 €'000
Company's Own Funds to cover the SCR	18,430	15,121
Solvency Capital Requirement	8,613	6,752
SCR Coverage Ratio	214%	224%
Company's Own Funds to cover the MCR	18,430	15,121
Minimum Capital Requirement	4,000	4,000
MCR Coverage Ratio	461%	378%

The calculation below shows the net best estimates and net written premiums for the year 2025 per line of business utilised in the calculation of the Linear minimum SCR.

Linear formula component for non-life insurance obligations	€'000	Net best estimate and TP calculated as a whole €'000	Net written premium in the last 12 months €'000
Medical expense insurance		9,828	16,269
Other motor		39	7,267
Fire and other damage to property		106	265
Marine, aviation and transport insurance and proportional reinsurance		64	208
Assistance		9,216	14,376
Miscellaneous financial loss		39	261
Overall MCR calculation			
Linear MCR	4,816		
SCR	8,613		
MCR cap	3,876		
MCR floor	2,153		
Combined MCR	3,876		
Absolute floor of the MCR	4,000		
Minimum Capital Requirement	4,000		

E. Capital Management

The table below provides a breakdown of the components of CIEL Solvency Capital Requirement (SCR) as at 30 April 2025:

Solvency Capital Requirement	FY25 €'000	FY24 €'000	Movement €'000
Non-Life Underwriting	4,992	3,095	1,897
Health Underwriting	2,999	2,624	375
Market Risk	1,781	1,743	38
Counterparty Default	390	435	(45)
Undiversified BSCR	10,162	7,897	2,265
Diversification	(3,290)	(2,703)	(587)
Base SCR	6,872	5,194	1,678
Operational Risk	2,062	1,558	504
LACDT	(321)	-	(321)
Solvency Capital Requirement	8,613	6,752	1,861
Company's Own Funds to cover the SCR	18,430	15,121	3,309
SCR Coverage Ratio	214%	224%	(10%)

There is no other information to report on.
