

From immersive experiences to Industry 4.0 solutions, the partnership between Treedis and Matterport is changing the way businesses operate. Our collaboration showcases how Treedis adds value to Matterport digital twins to deliver incredible results for customers.

## Connect your workers with cutting-edge technologies.

Treedis and Matterport are at the forefront of Industry 4.0. Together, we integrate cutting-edge technologies such as immersive AR and VR training, enhanced safety protocols, remote and field employee support and collaboration tools, digitized SOPs, and seamless IoT integration into everyday workflows. The result? A 30% improvement in performance metrics across a more connected workforce.

### Navigate large facilities with ease.

The Treedis wayfinding package is tailored to meet your navigation needs across large facilities. Whether planning your route in advance within a digital twin, using mobile devices, or using augmented reality guidance, this unified process ensures a seamless experience whether you are in the field or working remotely.

### Create immersive experiences tailored to your needs.

From remote onboarding to interactive marketing and beyond, Treedis offers a wide range of solutions that leverage the power of Matterport's digital twin platform to create uniquely immersive experiences tailored to your company's specific needs.

### Enterprise-grade services for large companies.

Consistent with Matterport's enterprise-grade security, Treedis provides scalability, security, seamless deployment, integration, or custom development options to large companies.

## Extend your reality with one simple editing process.

As the only Matterport overlay platform offering VR support for any digital twin, Treedis provides access to cutting-edge features that will take your experience to the next level, whether you're on a smartphone, tablet, or PC. Merging virtual and real, the Treedis Augmented Reality App offers data overlays, interactive elements, and indoor navigation for a captivating Industry 4.0 experience.
