Features

Normet's Alpha 30DC7 is a diesel hydraulic mobile concrete sprayer designed for tunnel profiles of up to 7 m in height and 9 meters in width with an hydraulically driven FAD 7 m³/min screw type air compressor. The maximum longitudinal spraying reach for a set up is 3 m.

The new NSP 30 concrete pump has a theoretical maximum pumping capacity of 12 m³/h. The Alpha 30DC7's accelerator dosing system uses a peristaltic pump and has two stainless steel tanks with a total volume of 420 liters.

The Alpha 30DC7 can be equipped with a radio or wired remote control system for controlling boom and nozzle movements and rotation, as well as the accelerator dosage and concrete pump.

To make manoeuvring easy in narrow tunnels the Alpha 30DC7 has four wheel steering and four wheel drive. It has a 120 kW Liquid cooled turbo charged diesel engine meeting Tier 3 regulations.

Operator's cockpit on the Alpha 30DC7 is FOPS and ROPS approved.

The additional equipment for the Alpha 30DC7 consists, among other things, of a high pressure washer system with stainless steel water tank, a spare wheel and a wired remote control (plus cable).
