MORTERA
MORTAR MACHINE

normet

Mortera is an extremely versatile mortar machine suitable for a wide range of concrete repair, injection and grouting jobs. Robustly built and easy to use, it meets the high demands of mortar applications on surface and underground construction sites. The pan mixer's outstanding mixing performance, coupled with the reliable rotor-stator pump for continuous delivery of the wet materials, enables precise and even placement of mortar materials.

KEY FEATURES

- Theoretical output: 7-40 l/min (2L6)
- **Safety First**
Integrated safety features protect the operator and ensure safe operation in all working conditions.
- **Built to Last**
Designed for durability, Mortera stands up to the toughest site conditions, project after project.
- **Low Maintenance, Long Service Life**
High-quality components and easily accessible wear parts simplify maintenance, ensure reliable performance and extend the service life.
- **Adaptable to Any Job**
Built for use in a variety of construction environments, with effortless handling and adaptability for a wide range of applications.
- **Effortless Cleaning**
Hinged hopper grills and a large drain ensure easy cleaning.

The large hopper opening with a low filling height, bag opener and safety grill with large mesh size makes it easy to feed the machine even during continuous batch mixing. The optimized discharge gate on the mixer and the large opening in the hopper grille on the pump ensure that even stiff and sticky material can be easily transferred into the underlying hopper.

Equipped with a powerful rotor-stator pumping system with infinitely adjustable flow rates, the Mortera offers continuously high flow rates with minimal pulsation, which significantly reduces the strain on operators and increases efficiency in every project. Ergonomically arranged controls and a simple yet safe control box with emergency stop circuit ensure trouble-free operation for continuous use, contributing to high quality results - every time.

The hinged hopper grills on the mixer and pump hopper equipped with safety switches, enable easy cleaning, and the large drain guarantees efficient and complete emptying of the machine without leaving any material residues. High-quality materials reduce wear and tear, and the design, which is geared towards easy access, simplifies maintenance. Integrated safety features protect operators and ensure a safe working environment at all stages of the operation.

With Mortera, construction professionals achieve efficient and cost-effective results in demanding projects. The machine not only increases productivity, but also the quality of the end product, thus meeting the highest standards.
