

Meeting title : Stockport Cycle User Group (CUG) sub – group

Location: Fred Perry House – please use rear entrance (Town Hall end)

Thursday April 26th, 6pm to 7:45pm

1) Contraflow cycling on Bridgefield Street

This is now the first place in Stockport where there is a signed on-street contraflow cycling facility that does not include a cycle lane. Comment on the arrangement is invited, including experience of using it.

2) Layout for a 'cycle gate'

The Council's Highway Design and Transport Strategy teams are working together to produce a design that may be used in the future at locations where a road is closed to motor vehicles, but 'permeable' for cycles. Several such locations already exist, but an attempt is being made to standardise elements of the design.

3) Experience of using Flexipave; layout of parallel crossing

Several traffic-free links in Stockport have now been constructed using this relatively new concept that incorporates recycled material. Most prominent of these, is a section of the Cycle City Ambition Grant (CCAG2) route between Demmings Road and the Warwick Close / Bowmont Close path. Stockport's first parallel (zebra and cycle) crossing is also under construction on Demmings Road. The Council would welcome views relating to both of these innovative measures.

4) Cycling information on the Council website

To further review and take suggestions relating to what is currently available

5) Roscoe's roundabout

The Council has acquired funding to make improvements at the roundabout, at the Cheadle High Street / Manchester Road junction, and within Abney Hall Park. Some initial key considerations of these proposals will be discussed by the group

For further information please contact cycling@stockport.gov.uk ; also get in touch if you cannot make the meeting, but are interested in contributing to any these agenda items.

Date for future meetings

Full meeting: Weds May 30th; sub-group: Weds June 27th **(both in the Town Hall)**
