

INSULATION DRAUGHTPROOFING AND HEATING

Install wall insulation to standard cavity walls,
hard to treat cavities or solid walls – you may be
eligible for FREE or discounted insulation

Install or top up Loft insulation
to a depth of 270mm or 10.5"

Install draught proofing around
windows and doors

Install insulation to cellar roofs to reduce the
cold*

Install insulation underneath suspended
timber floors*

Turn your room thermostat down by 1°C
as this could cut your heating bills by 10%

Boilers work more
efficiently with regular
servicing by a qualified Gas
Safe engineer

Install thermostatic radiator
valves to each radiator so you
can regulate the heat you need
for each room

Install a condensing boiler and timer controls

Check that your water thermostat is set to 60°C / 140°F

Fit a hot water jacket on your water cylinder that has a
thickness of at least 75mm – this could save you £25 - £30

Install double glazing

Lag your pipework

Fit a letter box flap to stop draughts

*Seek professional advice before carrying out any remedial works
