NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1

Description of Plans Administered By OMERS Administration Corporation

OMERS Administration Corporation (AC) is a corporation without share capital, continued under the Ontario Municipal Employees Retirement System Act, 2006 (OMERS Act). AC is the administrator of the OMERS pension plans as defined in the OMERS Act and is trustee of the pension funds. The OMERS pension plans are comprised of the OMERS Primary Pension Plan (Primary Plan), the Retirement Compensation Arrangement for the OMERS Primary Pension Plan (RCA) and the OMERS Supplemental Pension Plan for Police, Firefighters and Paramedics (collectively, the OMERS Pension Plans). As trustee of the Primary Plan's fund, AC holds legal title to the pension fund assets; the trust beneficiaries are Primary Plan members, and in certain circumstances, their spouses or dependents. AC is responsible for administering the OMERS Pension Plans in accordance, as applicable, with the Pension Benefits Act (Ontario) (PBA), the Income Tax Act (Canada) (ITA) and the OMERS Act. OMERS Sponsors Corporation is the sponsor of the OMERS Pension Plans under the OMERS Act.

The assets of any of the OMERS Pension Plans cannot be used to fund the pension obligations of any of the other OMERS Pension Plans.

OMERS Primary Pension Plan

The Primary Plan is a multi-employer, jointly sponsored pension plan, created in 1962 by an act of the Ontario Legislature, whose members are mainly employees of Ontario municipalities, local boards, public utilities and non-teaching school board staff. The Primary Plan is governed by the OMERS Act, the PBA, the ITA and other applicable legislation.

The benefit provisions and other terms of the Primary Plan are set out in the Primary Plan text. The Primary Plan consists of both the defined benefit component and the Additional Voluntary Contribution (AVC) component. The Primary Plan is registered with the Financial Services Regulatory Authority of Ontario and with the Canada Revenue Agency under Registration #0345983.

The defined benefit component of the Primary Plan is designed to provide lifetime defined benefit pensions, and its funding requirements are determined on a long-term basis. The defined benefit component is funded by equal contributions from participating employers and from active members, and by net investment earnings of the Primary Plan assets.

The AVC component of the Primary Plan permits members to make additional voluntary contributions on which the member earns the annual net investment return of the Primary Plan.

Retirement Compensation Arrangement for the OMERS Primary Pension Plan

The RCA provides pension benefits for Primary Plan members with earnings exceeding the amount that generates the maximum pension allowed by the ITA with respect to service after 1991. It is a separate trust arrangement and is not governed by the PBA and is not a registered pension plan under the ITA. The RCA is governed by the OMERS Act, the ITA and other applicable legislation. It is funded on a modified pay-as-you-go basis by equal contributions from participating employers and active members and by the net investment earnings of the RCA fund.

Summary of Significant Accounting Policies

Basis of Presentation

AC follows the requirements of the Chartered Professional Accountants of Canada (CPA Canada) Handbook Section 4600 – Pension Plans (Section 4600), which is the basis for Canadian accounting standards for pension plans. AC's recognition and measurement of assets and liabilities are consistent with the requirements of Section 4600. For accounting policies that do not relate to its investment portfolio or pension obligations, AC follows the requirements of International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

These Condensed Interim Consolidated Financial Statements (Interim Financial Statements) include the financial position, changes in net assets available for benefits and changes in pension obligations of AC and of the OMERS Pension Plans and have been prepared in accordance with CPA Canada Handbook Section 4600 and International Accounting Standard 34, Interim Financial Reporting. They do not include all the information and disclosure required in an annual set of consolidated financial statements. These Interim Financial Statements should be read in conjunction with the annual consolidated financial statements and the accompanying notes included in the OMERS 2022 Annual Report. The Interim Financial Statements follow the same accounting policies and methods used in preparation of the audited 2022 annual consolidated financial statements.

Comparative figures relating to future financial commitments have been revised to conform to the current year's presentation as set out in Note 8 – *Guarantees, Commitments and Contingencies*.

These Interim Financial Statements were approved by AC's Board of Directors on August 16, 2023.

Use of Estimates and Judgments

Preparing these Interim Financial Statements requires AC Management (Management) to make estimates, judgments and assumptions that affect the reported values of assets and liabilities, income and expenses, accrued pension obligations and related disclosures. Actual results could differ from these estimates. Areas of significant accounting estimates and judgment include the valuation of real estate, infrastructure, private equity, and private debt investments, as well as derivatives and pension obligations. The recent increases in interest rates and the persistent pace of inflation contributes to heightened uncertainty related to estimates and assumptions for these valuations. In all cases, Management's estimates are sensitive to key assumptions and drivers that are subject to material change, and Management continues to monitor developments in these inputs.

Accrued Pension Obligation

The June 30, 2023 accrued pension obligation is determined by accumulating the December 31, 2022 accrued pension obligation with normal cost and interest and by deducting benefit payments in the period. Adjustments are made for other known experience, if considered material.

Investments

A. Investments at Fair Value

Investments and investment-related assets and liabilities at fair value by asset class are as follows:

As at	Ju	ne 30, 2023	December 31, 2022
Fixed Income			
Inflation-linked bonds	\$	2,653	\$ 2,670
Nominal bonds and debentures		11,575	13,822
Private debt and mortgages		8,687	8,955
Total Fixed Income		22,915	25,447
Equities			
Public equities		16,256	16,602
Private equities		32,573	31,128
Total Equities		48,829	47,730
Real Assets			
Infrastructure investments		30,370	29,742
Real Estate investments		24,988	24,633
Total Real Assets		55,358	54,375
Short-Term Instruments			
Cash and short-term deposits		19,578	25,837
Total Investments		146,680	153,389
Investment-Related Assets			
Investment receivables		565	553
Deferred, prepaid and other assets		48	54
Derivatives		1,056	496
Pending trades		127	642
Total Investment-Related Assets		1,796	1,745
Investment-Related Liabilities			
Investment liabilities (note 4)		(16,833)	(25,894)
Derivatives		(293)	(1,087)
Pending trades		(126)	(114)
Total Investment-Related Liabilities		(17,252)	(27,095)
Net Investment Assets	\$	131,224	\$ 128,039

B. Investment Fair Value Hierarchy

Investment assets and liabilities are measured at fair value based on inputs from one or more levels of a fair value hierarchy as follows:

Level 1

Fair value is based on unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 primarily includes publicly-listed equity investments, cash and derivative contracts traded on a public exchange.

Level 2

Fair value is based on valuation methods that make use of inputs, other than quoted prices included in Level 1, that are observable by market participants either directly through quoted prices for similar but not identical assets, or indirectly through observable market information used in valuation models. Level 2 primarily includes short-term deposits, debt securities and derivative contracts not traded on a public exchange and investment-related liabilities, including debt and securities sold under repurchase agreements.

Level 3

Fair value is based on valuation methods whose significant inputs are based on unobservable market data. Level 3 primarily includes private market investments such as real estate, infrastructure, private equity, mortgages and private debt.

(a) Net investment assets are categorized into the fair value hierarchy as follows:

As at June 30,				2023
	Level 1	Level 2	Level 3	Total
Fixed Income	\$ - \$	14,228 \$	8,687 \$	22,915
Public Equity	15,877	-	379	16,256
Private Equity	-	-	32,573	32,573
Infrastructure	-	-	30,370	30,370
Real Estate	-	-	24,988	24,988
Short-Term Instruments	4,286	15,292	-	19,578
Investment-Related Assets	72	1,724	-	1,796
Investment-Related Liabilities	(58)	(17,194)	_	(17,252)
Net Investment Assets	\$ 20,177 \$	14,050 \$	96,997 \$	131,224
As at December 31,				2022
	Level 1	Level 2	Level 3	Total

Real Estate	23,604	1,940		_	(60)	2,453	(2,958)	24,979		1,353
Total	\$ 88,245	\$ 4,616 \$		60	\$ (952)	\$ 7,993	\$ (11,514) \$	88,448	\$	2,380

(i) Transfers between Private Equity and Real Estate represent asset class transfers.

(ii) Includes realized foreign exchange gains and losses.

(iii) Separately identifies unrealized gains (losses) that are also included in the 'Included in Total Investment Income (Loss)' column.

(iv) Transfers out of Private Equity include an investment which became publicly traded. Transfers out of Fixed Income include investments where quoted market prices are obtained.

(c) Fair Value Assumptions and Sensitivity

Level 3 investment assets and liabilities are valued using models whose significant inputs are based on unobservable market data. The significant valuation input for private credit and infrastructure investments is the discount rate. Significant valuation inputs for real estate investments are the discount rate and the terminal capitalization rate. In each case, the discount rate is composed of two elements: a risk-free rate, which is the return that would be expected from a secure, liquid, virtually risk-free investment, such as a high quality government bond; plus a risk premium. The risk premium is estimated from, where observable, implied values of similar publicly-traded investments or sales of similar investments or similar assets. If such information is not available, the risk premium is estimated at a level that compensates for the incremental amount of risk associated with a particular investment. The selected discount rates and terminal capitalization rates are chosen to be consistent with the risk inherent in the stream of cash flows to which they are applied.

Significant valuation inputs for private equity investments are earnings before interest, taxes, depreciation and amortization (EBITDA) multiples. All else being equal, higher multiples equate to higher fair values, and vice versa.

The following table presents the sensitivity of Level 3 investment valuations to reasonably possible alternative assumptions for asset categories where such reasonably possible alternative assumptions would change the fair value significantly. These sensitivities are hypothetical and should be used with caution. The impact to the valuation from such changes to the significant input has been calculated independently of the impact of changes in other key variables. In actual experience, a change in one significant input may result in changes to a number of underlying assumptions which could amplify or reduce the impact on the valuation.

As at				June 30, 2023	December 31, 2022
	Significant Inputs	Range of Inputs	Change in Significant Inputs	Change in Net Investment Assets	Change in Net Investment Assets
Private credit	Discount rate	3.8% - 23.3% (2022: 3.8% - 24.0%)	+/- 50 bps \$	-/ +67 \$	-/+72
Private equity	EBITDA Multiple	4.5X - 21.5X (2022: 4.5X - 21.5X)	+/- 0.50x	+/-930	+/-865
Infrastructure investments	Discount rate	7.0% - 15.8% (2022: 7.0% - 15.8%)	+/- 25 bps	-/+1,820	-/+1,545
Real estate investments	Discount rate	4.8% - 12.0% (2022: 4.4% - 10.0%)	+/- 25 bps	-/+711	-/+701
Real estate investments	Terminal capitalization rate	3.1% - 8.5% (2022: 3.0% - 8.5%)	+/-25 bps	-/+1,095	-/+1,099

The above sensitivity analysis excludes fund investments totaling \$8,304 (December 31, 2022: \$8,128) for which AC does not have access to the underlying investment information. For those investments, fair values are equal to the values provided by the fund's general partner, unless there is a specific and objectively verifiable reason to vary from the value provided.

C. Derivative Financial Instruments

The following table summarizes AC's use of derivatives. Notional values represent economic exposure, and are the contractual amounts to which a rate or price is applied for computing the cash flows to be exchanged. These notional values are used to determine the gains (losses) and fair values of the derivative contracts; they are not recorded as assets or liabilities on the Condensed Interim Consolidated Statement of Financial Position. Notional values do not necessarily represent the amount of potential market risk or credit risk arising from derivatives.

D. Investment Risk

AC's primary long-term investment risk is that the value of its assets and the capacity of those assets to generate investment income is insufficient to meet pension obligations. AC's future pension obligations are the basis for establishing its long-term investment objectives, combined with an assessment of associated risks.

AC manages market, credit and liquidity risk as follows:

a) Market Risk

Market risk is the risk that the fair value of an investment is impacted by changes in market prices such as foreign exchange rates, interest rates, equity prices, commodity prices, credit spreads and other price inputs.

(i) Foreign Exchange Rates

AC pays pensions in Canadian dollars and manages a highly diversified portfolio of long-term investments, many of which are denominated in foreign currencies. AC centrally manages the strategy for foreign currency and assumes certain foreign exchange risks, measuring and considering them in the context of overall portfolio objectives, alongside other investment related risks discussed elsewhere. Net investment assets by currency exposure, after the impact of currency hedging, are as follows:

As at			December 31, 2022		
Currency	Net Exposure	% of Total	Net Exposure	% of Total	
United States Dollar	\$ 41,066	31 %	\$ 37,632	30 %	
Euro	6,883	5	5,268	4	
British Pound Sterling	6,578	5	5,554	4	
Australian Dollar	3,564	3	3,078	2	
Indian Rupee	1,966	2	2,042	2	
Hong Kong Dollar	1,911	1	2,347	2	
All Other	4,178	3	4,172	3	
Total Foreign Currency Exposure	66,146	50	60,093	47	
Canadian Dollar	65,078	50	67,946	53	
Total	\$ 131,224	100 %	\$ 128,039	100 %	

Foreign Currency Sensitivity

After giving effect to the impact of foreign currency hedges and holding constant all other variables and underlying values, a five per cent increase or decrease in the value of the Canadian dollar against all foreign currencies, to which OMERS is exposed, would result in an approximate \$3,307 (December 31, 2022: \$3,005) decrease or increase in AC's net assets as shown below:

As at	June 30, 2023	December 31, 2022
Currency	Change in Unrealized Loss/Gain	Change in Unrealized Loss/Gain
United States Dollar	\$ -/+ 2,053	\$ -/+ 1,882
Euro	-/+ 344	-/+ 263
British Pound Sterling	-/+ 329	-/+ 278
Australian Dollar	-/+ 178	-/+ 154
Indian Rupee	-/+ 98	-/+ 102
Hong Kong Dollar	-/+ 96	-/+ 117
All Other	-/+ 209	-/+ 209
Total	\$ -/+ 3,307	\$ -/+ 3,005

(ii) Interest Rate Risk

AC's primary exposure to interest rate changes in its investment assets relates primarily to capital deployed in fixed income products, which include bonds and debentures, private debt and mortgages, as well as a variety of indirectly managed interest-bearing investments in private portfolios and interest rate swaps. AC's exposure to interest rate changes in its investment liabilities relates primarily to term notes. Investments with fixed rates of interest will decrease in market value while liabilities with fixed rates of interest rates rise, and vice versa.

Sensitivity to changes in interest rates

AC's exposure to a 50 basis point increase (decrease) in interest rates, with all other variables held constant, would result in an approximate decrease (increase) in the value of directly managed fixed income investments and interest rate swaps, net of term note liabilities, of \$102 (December 31, 2022: \$181). This would be recognized as a change in unrealized loss (gain).

(iii) Price Risk

Price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from foreign currency risk or interest rate risk), whether those changes are caused by factors specific to the individual financial instrument, its issuer or factors affecting similar financial instruments traded in the market.

AC's investment in publicly-traded equities is achieved through both physical holdings and derivative exposures. A ten per cent increase (decrease) in the aggregate value of these public equities would result in an approximate increase (decrease) in public equity exposures and an unrealized gain (loss) of \$3,038 (December 31, 2022: \$2,995).

AC's investments in private equity, infrastructure, real estate, private debt and mortgages are also subject to price risk. Values are impacted by a number of variables as described in Note 3B - *Investment Fair Value Hierarchy*.

AC is also subject to price risk through changes in credit spreads on certain of its fixed income investments and term note liabilities. A 50 basis point increase (decrease) in the credit spreads of these interest bearing instruments would result in an approximate net decrease (increase) in the value of fixed income investments and term note liabilities, and a net unrealized loss (gain) of \$188 (December 31, 2022: \$103).

b) Credit Risk

Credit risk is defined as the financial loss that results from the failure of a counterparty to honour its contractual obligations. AC is subject to credit risk primarily in connection with issuers or guarantors of securities, debtors, structured securities, derivatives, repurchase agreements and securities lending arrangements. Credit risk for uncleared over-the-counter (OTC) derivatives is mitigated through the exchange or posting of margin. Credit risk for cleared OTC derivative contracts and futures contracts is typically minimal, as the counterparty is an exchange or central clearing counterparty which is designed for reducing counterparty risk and improving financial system stability. For these trades, initial margin is posted and margin receivables and payables are settled daily.

To manage counterparty credit risk, AC:

- requires collateral from its counterparties in certain circumstances, as outlined in contractual arrangements;
- · limits how much exposure it has with individual counterparties;

- regularly performs financial analysis of its counterparties, which includes reference to credit rating
 agencies and other relevant external sources. AC only trades OTC derivatives with high quality
 counterparties;
- estimates ratings using an internal rating process, if no rating is available from selected reputable credit rating agencies for credit investments; and
- enters into enforceable master netting agreements.

(i) Credit Quality

The credit ratings for fixed income and short-term instruments is set out in the table below:

	Sovereign	Provincial			
	Governments	Governments	Corporate	Total	% of Total
AAA	\$ 8,016	\$ -	\$ 3	\$ 8,019	19 %
AA	7,302	60	12,356	19,718	47
A	-	-	1,235	1,235	3

Unrated securities in the table above relate to private real estate debt and mortgages with a weighted average loan-to-value ratio at the time of issuance of no greater than 75%.

(ii) Margin and Collateral

AC is a counterparty to financial instruments that are subject to margin arrangements. AC pledges and receives collateral consisting of securities and in some cases cash, in the ordinary course of managing net investments. AC has enforceable contractual rights to realize upon collateral and to set-off against amounts owing under financial contracts following a counterparty default or other termination right. Additional collateral is exchanged if the value of the collateral falls below a predetermined level, based on the value of the underlying transaction(s) or interest, and the value of the collateral posted. Specifically:

- In the case of OTC derivatives, variation margin collateral is collected from and provided to counterparties according to the Credit Support Annex (CSA), which forms part of International Swaps and Derivatives Association (ISDA) Master Agreements. Initial margin collateral is pledged to and provided by counterparties, as required by ISDA initial margin credit support or collateral transfer documentation (IM CSA). Initial margin collateral is held by third party custodians in segregated accounts.
- In the case of prime brokerage and securities borrowing, collateral is exchanged to the full extent
 of the liability with the counterparty, with a borrower required to pledge marketable securities or
 cash of higher value as collateral than the securities borrowed. AC does not recognize any
 securities borrowed as its investment assets because the risks and rewards of the securities
 remain with the lender.

~~~~

AC enters into securities repurchase transactions under Global Master Repurchase Agreements (GMRA), whereby AC sells securities to counterparties and simultaneously agrees to buy them back at a predetermined price in the future. Collateral is exchanged between the counterparties based on the current value of the securities sold under the agreements. AC does not derecognize any securities sold because the associated risks and rewards remain with AC.

AC is permitted to sell or repledge collateral in the absence of default, with the exception of initial margin on OTC derivatives. The equivalent cash or securities must be returned to the counterparty should the counterparty demand a return of collateral. The fair value of collateral sold or repledged is \$nil (December 31, 2022: \$nil).

The fair value of collateral pledged and received, as well as securities sold under repurchase agreements, is as follows:

| As at                                                      | Ju | ine 30, 2023 | December 31, 2022 |

#### (iii) Right of Netting and Offset

AC is a counterparty to financial instruments that are subject to netting and offset arrangements. AC enters into enforceable master netting agreements, such as ISDA Master Agreements, GMRA and securities lending agreements. Under these agreements, following a counterparty's event of default, bankruptcy or other early termination event, AC is entitled to liquidate transactions under each of the above derivative, repurchase and securities lending arrangements and to net amounts payable under all transactions under that agreement. Master netting agreements might include contractual rights of set-off, enforceable following the occurrence of an event of default or other termination event, that might allow, in certain circumstances, AC or its counterparty to set-off amounts owing under one agreement against amounts owed under another agreement, on a counterparty by counterparty basis. In the Condensed Interim Consolidated Statement of Financial Position, financial instruments are not offset, as a party's rights of offset across agreements are conditional.

Certain financial transactions, such as derivative transactions, involve a legally enforceable right to offset the recognized amounts and to settle payments on a net basis, or to realize upon an asset and a liability simultaneously. Financial assets and liabilities that are offset are reported as a net amount in the Interim Financial Statements.

AC may not be permitted to net and set-off upon the default of a clearer in respect of exchange traded derivatives and cleared OTC derivatives. In the Condensed Interim Consolidated Statement of Financial Position, financial instruments are not offset where the rights of offset are conditional.

In the following table, the Net amount presents the effect of the amounts that do not qualify for offsetting but which are subject to conditional netting arrangements or similar arrangements, including ISDA Master Agreements, GMRA, security lending agreements and any related rights to financial collateral:

| As at June 30,                                            |                                                      |                    |                                                 |                                                    |    |                                                       |                                                  | 2023       |

#### c) Liquidity Risk

Liquidity risk is the risk that AC will encounter difficulty in meeting cash flow obligations as they come due. AC may use repurchase agreements, derivative contracts, securities lending and securities borrowing arrangements to gain exposure to equities, fixed income, credit, commodities and currency. Using these instruments increases AC's collateral requirements and liquidity risk.

AC has developed forward-looking liquidity risk and cash flow models to periodically assess its liquidity position. AC also maintains a portfolio of highly marketable assets that could be sold or funded on a secured basis to generate liquidity. AC monitors its liquidity position to ensure sufficient liquid assets are available to meet cash and collateral requirements and other obligations.

2022

As at June 30, 2023, AC maintained \$23,618 of liquid assets comprised of \$19,578 cash and short-term deposits, \$2,653 inflation-linked bonds, \$5,422 Canadian and United States government securities, all net of \$4,035 pledged collateral (December 31, 2022: \$23,071 of liquid assets comprised of \$25,837 cash and short-term deposits, \$2,670 inflation-linked bonds, \$7,076 Canadian and United States government securities, all net of \$12,512 pledged collateral).

#### (i) Terms to Maturity

The term to maturity of AC's derivative and non-derivative liabilities based on fair value is as follows:

| As at                                                                  |                  | December 31, 2022 |     |                 |        |                  |                 |                 |        |

#### (ii) Commercial paper

OMERS Finance Trust (OFT), whose beneficiaries are subsidiaries of AC, is authorized to issue up to an equivalent of \$5,000 (December 31, 2022: \$5,000) in commercial paper, which is unconditionally and irrevocably guaranteed by AC. As directed by the OMERS Investment Risk Policy, total debt with recourse to AC cannot exceed 10 per cent of total Net Investment Assets (gross of debt with recourse to AC). Commercial paper of \$2,075 was issued as at June 30, 2023 (December 31, 2022: \$1,618).

Commercial paper generally has short-term maturities, and the requirement to repay this debt at maturity increases liquidity risk. OFT manages this risk by maintaining a high credit rating and a \$3,900 (December 31, 2022: \$3,900) revolving credit facility with a syndicate of well-capitalized banks to backstop the commercial paper program and to use for other general corporate purposes. As at June 30, 2023, \$nil was drawn against this facility (December 31, 2022: \$nil).

## **Investment Liabilities**

#### AC's investment liabilities are as follows:

| As at                                       | June 30, 202 | 3           | December 31, 2022 |

## **OMERS Primary Pension Plan**

A summary of the Condensed Interim Financial Statements of the Primary Plan is as follows:

#### **Condensed Interim Statement of Financial Position**

| As at                                                               | Ju | une 30, 2023 | December 31, 2022 |
|---------------------------------------------------------------------|----|--------------|-------------------|
| Net Assets Available for Benefits                                   | \$ | 127,365      | \$ 124,206        |
| Accrued Pension Obligation and (Deficit) Surplus                    |    |              |                   |
| Defined benefit component                                           |    |              |                   |
| Accrued pension obligation                                          | \$ | 130,864      | \$ 128,789        |
| (Deficit) Surplus                                                   |    |              |                   |
| Funding deficit                                                     |    | (4,510)      | (6,678)           |
| Actuarial value adjustment of net assets                            |    | (540)        | 578               |
|                                                                     |    | (5,050)      | (6,100)           |
| Additional Voluntary Contributions component obligation             |    | 1,551        | 1,517             |
| Total Primary Plan Accrued Pension Obligation and (Deficit) Surplus | \$ | 127,365      | \$ 124,206        |

#### Condensed Interim Statement of Changes in Net Assets Available for Benefits

| For the six months ended June 30,                      | 2023                    | 2022    |
|--------------------------------------------------------|-------------------------|---------|
| Statement of Changes in Net Assets                     |                         |         |
| Net investment income (loss)                           | \$<br>3,770 \$          | (493)   |
| Contributions                                          | 2,532                   | 2,331   |
| Benefits paid                                          | (3,085)                 | (3,018) |
| Pension administrative expenses                        | (58)                    | (51)    |
| Total Increase (Decrease)                              | 3,159                   | (1,231) |
| Net Assets Available for Benefits, Beginning of Period | 124,206                 | 120,727 |
| Net Assets Available for Benefits, End of Period       | \$<br><b>127,365</b> \$ | 119,496 |

The primary economic actuarial assumptions used in the actuarial valuation of the Primary Plan as at June 30, 2023 are unchanged from December 31, 2022.

The Primary Plan's financial position is summarized as follows:

| As at                                                                                                   | Ju | ne 30, 2023 | December 31, 2022 |
|---------------------------------------------------------------------------------------------------------|----|-------------|-------------------|
| Primary Plan fair value of net assets available for benefits                                            | \$ | 127,365     | \$ 124,206        |
| Less: Additional Voluntary Contribution net assets                                                      |    | 1,551       | 1,517             |
| Defined benefit net assets available for benefits                                                       |    | 125,814     | 122,689           |
| Less: Actuarial value adjustment                                                                        |    | (540)       | 578               |
| Actuarial value of net assets available for benefits                                                    |    | 126,354     | 122,111           |
| Less: Defined Benefit accrued pension obligation                                                        |    | 130,864     | 128,789           |
| Funding deficit of actuarial value of net assets available for benefits over accrued pension obligation |    | (4,510)     | (6,678)           |
| Actuarial value adjustment to net assets available for benefits                                         |    | (540)       | 578               |
| (Deficit) Surplus of net assets available for benefits over accrued pension obligation                  | \$ | (5,050)     | \$ (6,100)        |

## The change in the actuarial value adjustment is as follows:

|                                                                                                         | e six months Fo<br>ded June 30,<br>2023 | or the year ended<br>December 31,<br>2022 |
|---------------------------------------------------------------------------------------------------------|-----------------------------------------|-------------------------------------------|
| Expected interest on beginning actuarial value adjustment <sup>(i)</sup>                                | \$<br><b>23</b> \$                      | 203                                       |
| Current year returns below the actuarial smoothing rate not recognized in the year $^{\left( i  ight)}$ | (830)                                   | (2,397)                                   |
| Prior years' returns above the actuarial smoothing rate recognized in the year                          | (311)                                   | (290)                                     |
| Decrease in actuarial value adjustment                                                                  | (1,118)                                 | (2,484)                                   |
| Actuarial value adjustment, beginning of period                                                         | 578                                     | 3,062                                     |
| Actuarial value adjustment, end of period                                                               | \$<br><b>(540)</b> \$                   | 578                                       |

(i) Based on the actuarial smoothing rate in effect during the period of 7.97% (2022: 6.63%).

The actuarial value adjustment is constrained such that the resulting actuarial value of net assets is no more than 15% different from the fair value of net assets. As at June 30, 2023 this constraint had no impact on the actuarial value adjustment.

# Net Investment Income (Loss)

The OMERS Pension Plans' investment income (loss) by asset class is as follows:

#### B. Net Investment Income (Loss) by Segment

(i) Funds invested by AC on behalf of The Board of Trustees of Toronto Metropolitan University (formerly Ryerson University) and the Transit Windsor Fund under contractual agreements.

# NOTE 8

## **Guarantees, Commitments and Contingencies**

AC enters into guarantees, commitments and contingencies in the normal course of business.

Guarantees are provided to third parties with respect to certain investments. The maximum amount payable under guarantees, standby letters of credit and contingent amounts payable provided as part of investment transactions was \$2.3 billion as at June 30, 2023 (December 31, 2022: \$2.3 billion).

As at June 30, 2023, future financial commitments relating to the acquisition, development and refurbishment of investments include \$3.6 billion (December 31, 2022: \$3.2 billion) which is expected to be due within one year and \$10.5 billion (December 31, 2022: \$11.7 billion) which is expected to be due after one year. Future financial commitments relating to funds managed by third parties and private debt investments are \$3.4 billion (December 31, 2022: \$3.6 billion) and are payable on demand, subject to the terms and conditions of each agreement.

AC indemnifies its directors, officers, certain employees, its business units and certain others in connection with proceedings against them to the extent that these individuals are not covered under another arrangement. In addition, AC may in certain circumstances in the course of investment activities agree to indemnify a counterparty. Under the terms of such arrangements, AC may be required to compensate these parties for costs incurred as a result of various contingencies such as changes in laws and regulations or legal claims. The contingent nature of the liabilities in such agreements and the range of indemnification prevent AC from making a reasonable estimate of the maximum amount that would be required to pay such indemnifications.

As at June 30, 2023, AC was involved in certain litigation and claims. The outcome of such litigation and claims is inherently difficult to predict; however, in the opinion of Management, any liability that may arise from such contingencies would not have a material adverse effect on the Interim Financial Statements.
