

# Most Discounted Summer Fares Compared to Last Year

Using the Skytra Ticketing Database containing 83%\* of worldwide purchased flight tickets, we are able to identify the best value holiday destinations for those looking to book their summer holidays now for August this year. The data identifies flights booked from the UK to European destinations only. We compared the price paid per KM for August 2020 compared to the same period last year, pre-COVID 19. Those with the biggest price drop per KM in essence show the best value ticket prices.

Skytra, a 100% Airbus company, is offering new risk management and business intelligence solutions to the air travel industry leveraging its unique ticketing data base.

Percentages below are based on air travel ticket price discounts for Aug 2020 compared to prices for the same holiday period last year, pre-covid19.

\* In ticket value
