Important Information

"A living annuity allows you to set your income level subject to constraints imposed by the authorities from time to time and allows you to select a wide range of investments in respect of the capital that will generate the annuity. The level of income you select is not guaranteed for the rest of your life. The level of income you select may be too high and may not be sustainable if:

- you live longer than expected with the result that the capital is significantly depleted before your death; or
- the return on the capital is lower than that required to provide a sustainable income for life.

It is your responsibility (in consultation with your financial adviser) to ensure that the income that you select is at a level that would be sustainable for the rest of your life. You need to carefully manage your income drawdown relative to the investment return on the capital in order to achieve this. The table below can be used as a guide.

Table 1: **Years before your income will start to reduce.**

	Investment return per annum (before inflation & after all fees)					
		2.50%	5.00%	7.50%	10.00%	12.50%
Annual income rate selected at inception	2.50%	21	30	50+	50+	50+
	5.00%	11	14	19	33	50+
	7.50%	6	8	10	13	22
	10.00%	4	5	6	7	9
	12.50%	2	3	3	4	5
	15.00%	1	1	2	2	2
	17.50%	1	1	1	1	1

It is important to note that the table above assumes that you will adjust your percentage income selected over time to maintain the same amount of real income (i.e. allowing for inflation of 6% per annum). Once the number of years in the table above has been reached, your income will diminish rapidly in the subsequent years.

Please ensure that your financial adviser has explained both the advantages and the risks of the living annuity and compared these against conventional annuities (where the insurer carries the full investment risk and the risk of you living longer than expected).

The table is a general guideline and should be considered, taking into account each annuitant's financial situation and all other sources of income. It is an indicative guideline only, to assist you in making informed decisions in respect of your annuity."

SECTION B: In-fund Living Annuity Selection

If you need assistance, contact IMS or speak to a accredited Financial Advisor to help you make an informed decision.

Please make a choice of either **Option 1** or **Option 2** below.

Option 1 - Trustee Endorsed In-fund Living Annuity

Trustee Endorsed In-fund Living Annuity (if selected, please cross this box)

☐

The Trustee-approved investment strategy for this option is the Sanlam Capital Protection portfolio - you will not have any other investment choice.

Important Information

The prescribed maximum drawdown rates below have been determined by age band and gender. These relate to limits to preserve sustainability, which depends on longevity. Members may select a lower drawdown rate (subject to a minimum of 2.5%). However, members may not elect a drawdown higher than the prescribed drawdown rates below.

If no selection is made, members will be defaulted into the prescribed drawdown rate indicated below.

Age	Males	Females
55 - 59	4.5%	4.0%
60 - 64	5.0%	4.5%
65 - 69	5.5%	5.0%
70 - 74	5.5%	5.0%
75 - 79	6.0%	5.5%
80 - 84	7.0%	6.0%
85+	8.0%	7.0%

Drawdown rate selection

Completing the section below is mandatory.

Please choose an annual drawdown rate between 2.5% and 10% of your gross benefit paid as a monthly benefit (if no selection is made, you will be defaulted to a drawdown rate of 5%). Your monthly benefit (pension) will be disinvested proportionately from your assets/member share which will be paid out to you.

If you have selected an amount which is above the drawdown rate of 10%, you will be defaulted to the maximum drawdown rate of 10%. If you have selected an amount which is below the drawdown rate of 2.5%, you will be defaulted to the minimum drawdown rate of 2.5%.
