

Cambridge courseware (CogBooks) instructor guide: Canvas Importing a Course

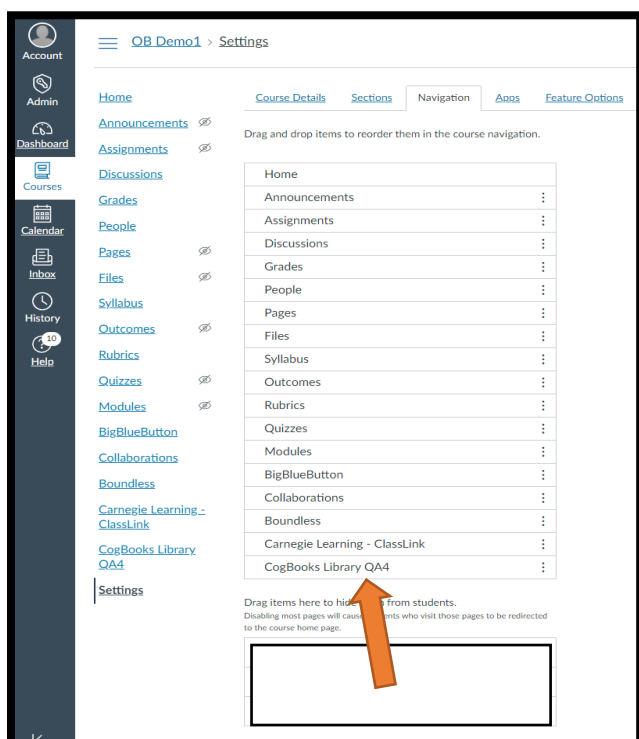

This guide will cover how to import your courseware from the CogBooks library.

Starting from the Dashboard in the Canvas LMS

Step 1 – Find and click the course shell that will be used to upload the courseware.

Step 2 – Look at the Course Navigation panel on the left, find Settings, and click it. From the list of tabs on the top, click on Navigation. Drag the CogBooks Library into the Course Navigation and hit Save.

Step 3 – Click on the CogBooks Library to open the course list. Find and select the course you want to load. The next screen will allow you to pick the specific topics and subtopics you wish to use in your course.

The screenshot displays the CogBooks Library interface within a course management system. The page title is "A&P I > QA4 App Placement 0410". The left sidebar contains navigation options: Account, Admin, Dashboard, Courses, Calendar, Inbox, History, and Help. The main content area is titled "CogBooks" and includes a search bar with the placeholder text "Search by ISBN, textbook title or a keyword". Below the search bar, there are tabs for "All", "History", "Physics", "Biological Sciences", "Health & wellness", "Philosophy", "Psychology", and "Business". The "All" tab is selected, showing a grid of eight course cards. Each card features a cover image, a title, a brief description, and an ISBN number.
