Prestige Shine

Moving Image

Chocolate Glimmer

Dusty Gold

Pewter Illusion

Neutral Intrigue

## How to get the metallic look

### Step 1: Choose your colour

- Choose from 9 curated colours or LiveChat for free personalised colour advice.

### Step 2: Prep

- Clean your surface, then mask off the area.
- Stir the paint with a paint stirrer in up and down scooping motions, making sure to scrape the bottom of the can.

### Step 3: Topcoat

- Cut in around the edges using a brush, then apply your first coat with a roller.
- Allow to dry, then apply the second coat with a roller, working in small sections.
- While the paint is still wet, texture the surface with a wide brush, dry roller or muslin cloth. Drag the paint in a random pattern.

HOW-TO VIDEO

# How to re-use and reduce wastage while painting

## Responsibly dispose of your paint

### 1. PaintBack

Take your paint tin with leftover paint to your local Paintback collection site – there are over 160 nationally!

Paintback takes unwanted paint and packaging and recycles or otherwise responsibly disposes of it, diverting it from landfill and vital waterways.

Scan me to find a local Paintback location

### 2. Recycle your tin with waste paint hardener

#### Easy disposal of paint

Dulux EnviroSolutions Waste Paint Hardener is a great option. This handy product turns unwanted water-based paint back into solid waste for easy and safe household disposal in 3 steps:

#### Step 1

Simply scoop the desired amount of waste hardener into the paint tin and stir until paint solidifies.

#### Step 2

Leave for 2 hours with the lid off.

#### Step 3

Wrap hardened paint in newspaper and dispose of as hard waste. The clean, paint free tin can also be disposed of in recycled waste, providing a sustainable option to minimise the environmental impacts of paint products.

## Re-use accessories

Save your accessories for next time! Simply give them a good clean. If you've used water-based paint you can clean your brushes in a bucket of water to remove most of the paint, ready for use next time.

**Note:** for solvent-based paint, mineral turpentine is required.
