STEPS | DAY

Transform your outdoor seating area with Dulux® Weathershield® in 3 steps

STEP 1: PREP

- Before you start, move furniture and clear the space, brush away any dirt and lay down a drop cloth.
- Use a brush to remove imperfections.
- Lightly sand any pre-painted surfaces.
- Cover the floor with a drop sheet and mask off around the edges.

STEP 2: SPRAY

- If using Weathershield, dilute with up to 10% water and stir paint.
- Unscrew the container from the spray gun and pour in the paint.
- For the internal walls of the outdoor seating area, turn the nozzle to the vertical setting. Use the circular jet for corners, edges and hard-to-reach surfaces.
- Point the spray gun directly ahead and start spraying from one side, working across the wall in long vertical strokes. Release your finger from the trigger when you get to the top and bottom to prevent too much paint forming in one area and dripping.
- Follow the same process for the ceiling.
- 2–3 coats may be required.

Multi-purpose spray unit with adjustable spray rate for faster application.

Guaranteed not to peel, flake or blister for as long as you live in your home.**

To see how much faster spray is, watch our video

*The \$245 spend is based on Dulux products and generic accessories required for most projects. Based on your specific project needs you may need slightly different paint and accessories, reach out to Dulux Help and Advice for more information.
