

StoneShield™ Cladding System

An alternative walling system to traditional masonry construction.

The StoneShield Cladding System is designed as a totally integrated, multi-layered, non-load bearing lightweight cladding system for facades. Delivering a weatherproof external building envelope that provides excellent thermal performance (R-Value) with continuous insulation (CI) to reduce thermal bridging and also offers noise reduction as well as fire rated (FRL & BAL) performance.

Fletcher Insulation

Benefits of the StoneShield Cladding System

Ideal for facade, boundary and separating walls

Suitable for Class 1 and 10 & 2 to 9 buildings

For use in BAL & FRL zones

Thermal properties

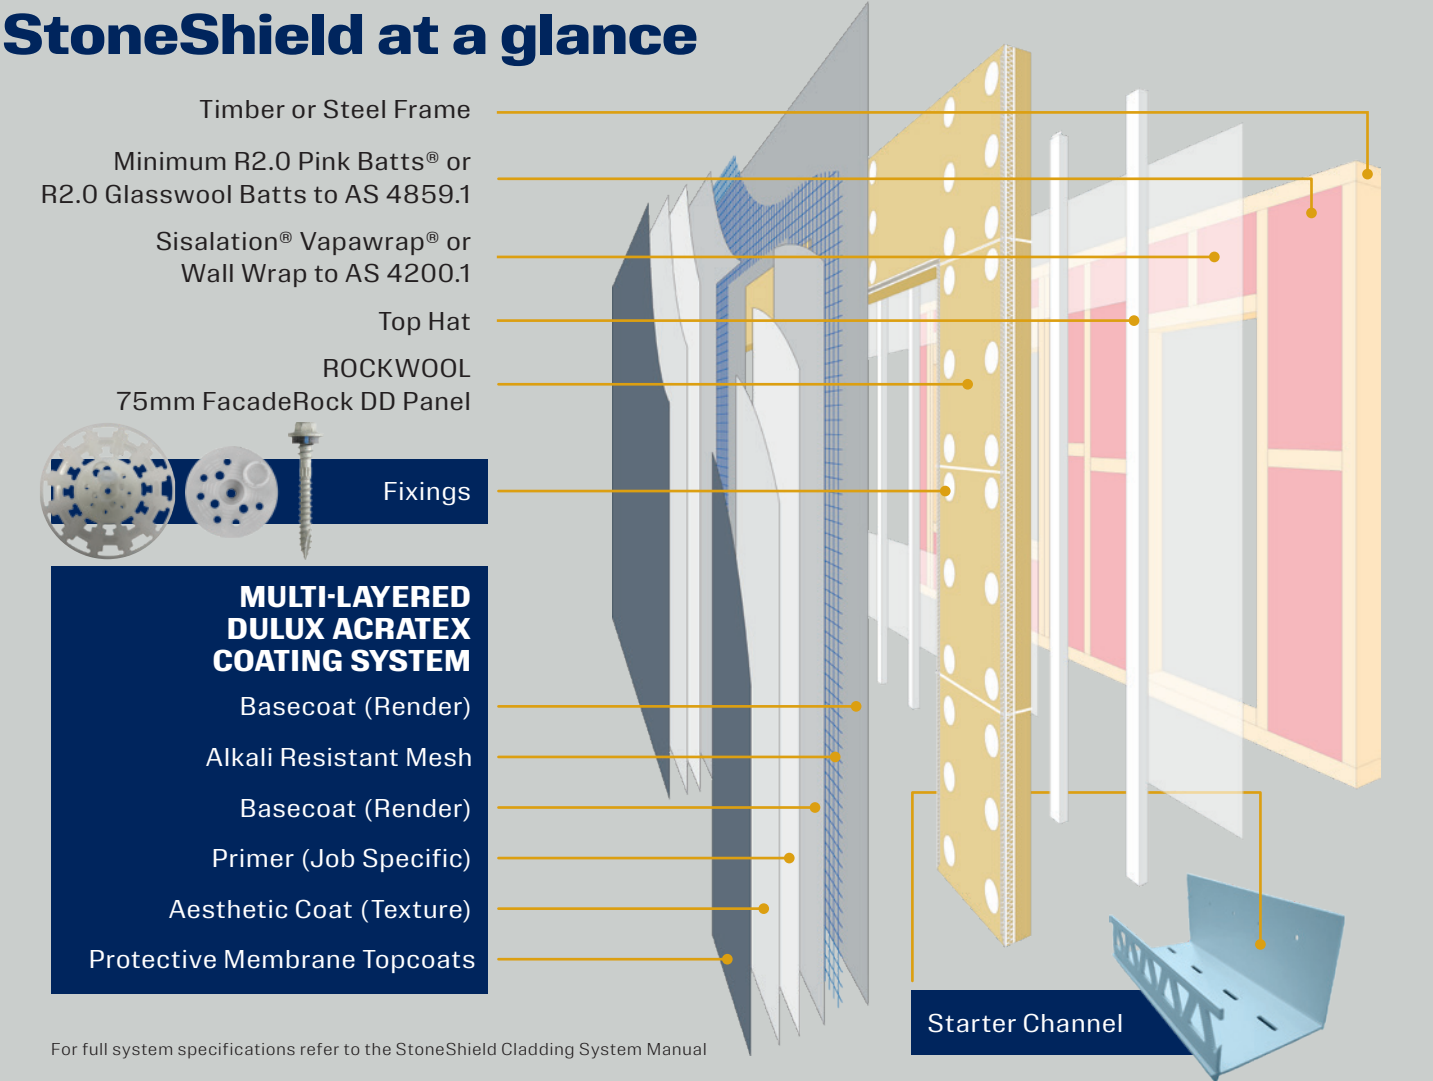

Noise reduction

Easy to handle dual density lightweight panels

StoneShield at a glance

For full system specifications refer to the StoneShield Cladding System Manual

Areas of Application	StoneShield Cladding System*
External Cladding	YES
Boundary Wall (FRL 90/90/90*)	YES
Separating Wall	YES
Suitable for BAL-LOW to BAL-FZ	YES
Ground and Upper Floors	YES
Class 1 and 10 Construction	YES
Class 2 to 9 Construction	YES
Wind Loading AS 4055	Up to N4

*Subject to system specification.
