About the range

Dulux Professional DryErase is a roller applied whiteboard paint that transforms a painted surface into an erasable canvas. The product is simple to apply and is suitable for both commercial and residential markets. *Dulux Professional DryErase* creates the space to improve collaboration, communication and sharing at work, in the home and in schools.

Dulux Professional DryErase is available in 5m² packs in a White or Clear finish. This transforms your space to a white surface, or allows the existing colour of the pre-painted surface to show through, opening up a world of collaborative opportunities.

Why use it

- DryErase can be applied to pre-painted surfaces and suitably prepared new surfaces. The product is only for application by professional applicators and can be used at work, home and educational institutions.
- The product will only be as smooth as the surface it is painted on; so follow the instructions carefully.

Product benefits

- Turns a painted surface into an erasable canvas.
- Clear or White finish that can be used over any suitably prepared surface.
- Drives collaboration and sharing.

Application requirements

- Application by a professional applicator only.
- Apply with roller supplied. DO NOT spray.
- Do not overspread as this will reduce product performance.
- DryErase has 2 hour pot life once PART A and PART B is mixed (at 25°C and 50% relative humidity).
- Open doors and windows to ensure good ventilation.
- Follow all safety precautions outlined on the PART A and PART B cans.

Each *Dulux Professional DryErase* 5m² kit includes:

- The product, roller sleeve, stirrer and detailed application instruction booklet.
- The product is supplied in 2 parts, one labelled PART A and the other labelled PART B.

Where to use DryErase

At work

Transform your office into a boundless erasable canvas, giving you the space to fully explore ideas.

Accelerate innovation by getting people on their feet working together in ways never before possible.

Paint an entire room and create a 360° working environment. Professional DryErase will improve the way people work and the way they work together, helping them collaborate more effectively, be more creative and ultimately deliver better results.

At school

There are no ideas too little, only little spaces to put them. Professional DryErase will transform classrooms into boundless erasable surfaces, giving teachers and students the space they need to communicate, connect and accelerate learning. Turn walls, desks and even old chalkboards into more functional and fun spaces. No matter where you use it, minds will open and fill with big ideas.

At home

Professional DryErase turns any home into a space that will keep the family organised, entertained and connected. Transform a kitchen wall into an erasable message board or paint a toy box to make it more interesting than everything inside. It's perfect for the home office, playroom, or any room, where ideas happen. Infuse fun and functionality into unexpected spaces.

Product Code

<i>Dulux Professional DryErase</i> White Kit 5m ²	56WD0056-UNIT
<i>Dulux Professional DryErase</i> Clear Kit 5m ²	56WD0057-UNIT

Preparation

1

New Surface

Wipe with a clean dry cloth to remove any dust. Apply one coat of Dulux Professional Total Prep, according to product instructions.

Topcoat

Prior to applying *Dulux Professional DryErase*, apply a water based semi gloss topcoat, in the colour of your choice, according to product instructions. Do not use an oil based topcoat.

NOTE: Please use a short nap roller to achieve a smoother finish for both prep coat and topcoat.

Pre-painted Surface

Ensure surface is in sound condition. Wipe with a clean dry cloth to remove any dust. No primer required.

NOTE: Please do not paint over pre-painted surfaces that are oil-based.

Topcoat

If desired and prior to applying *Dulux Professional DryErase*, change the colour by applying a water based semi gloss topcoat, in the colour of your choice, according to product instructions. Do not use an oil based topcoat.

NOTE: Note that the finish will only be as smooth as the existing coating.

Mix

2

Do not shake cans

1. Pour contents of PART B into PART A.
2. Stir thoroughly with broad flat stirrer provided for 1 minute.
3. Loosely place the lid back on the can and wait for 2 minutes before using. Do not tightly reseal the container once components have been mixed.

NOTE: Do not mix more than one 5m² kit at any time. Once mixed, you have 2 hours to apply.

Application

3

You have 2 hours to apply

1. *Dulux Professional DryErase* dries quickly. Apply in sections up to 1 metre wide by the entire height.
2. Cut in edges with a small short nap microfibre roller.
3. Load roller and apply liberally to first 1 metre section using the roller provided.
4. Repeat on each section working from one end to the other.
5. Ensure entire content of pack is used for the measured area.
6. Any spills or marks must be cleaned up immediately with water. Isopropyl Alcohol can be used for stubborn spills.

NOTE: Use a new roller sleeve with each new kit and dispose of used sleeve.

Use

4

Allow 7 days to fully cure before using. Any standard whiteboard marker is safe to use on the *Dulux Professional DryErase* surface.

Do not use EXPO pink whiteboard markers or red whiteboard crayons. Test novelty markers in an inconspicuous area before use.

Cleaning

Erase using a microfibre cloth. Use a damp cloth or whiteboard cleaner spray to remove any stubborn ink residue.

Frequently asked questions

Can *Dulux Professional DryErase* be recoated?

Dulux Professional DryErase should be treated as any other hard glossy surface. The coating will need to be sanded to ensure there is a good key for adhesion for any subsequent re-coats. Further, the components of the whiteboard paint do contain hazardous ingredients and though once mixed, reacted and dry are bound in the dry film and become inactive. It is still important to take care in order to prevent inhalation or ingestion of dust when sanding. It is advisable to wear an appropriate breathing apparatus during the sanding and preparation stage. A respirator with an organic vapour/particulate filter should be used.

What is the sheen level of *Dulux Professional DryErase*?

Dulux Professional DryErase produces a gloss finish, which is a gloss level of approximately 70 on the painted surface.*

* Please note that this will be at a viewing angle of 60 degrees.

What is the odour level of the product?

Dulux Professional DryErase is a low odour product.
