Worth doing, worth Dulux.

## Choose Dulux<sup>®</sup> Renovation Range FLOORS to transform your shower base in 3 steps.

### STEP 1: PREP

- Remove all silicone with Selleys Silicone Remover. Post clean with a scouring pad.
- Remove all grease and dirt with Selleys sugar soap.
- Mask any edges and surfaces you don't want painted.

### STEP 2: PRIME

- Ensure surface is dry.
- Cut-in using a sash brush around edges.
- Apply one coat of Dulux<sup>®</sup> Renovation Range Primer with a microfibre roller – 4mm nap, 100mm wide.
- Allow to dry for at least eight hours.

### STEP 3: TOPCOAT

- Add all of the additive, found underneath the lid, to the Dulux<sup>®</sup> Renovation Range Floors topcoat.
- Stir well using a lifting motion for 2–5 minutes.
- Cut-in using a sash brush around edges.
- Coat surface using a 4mm nap, 100mm wide microfibre roller.
- Apply at least two coats, allowing at least eight hours before re-coating.

**NOTE:** Ensure safety and application directions are followed as per product labels.

**RETURN TO USE:** Light use after 2 days (including running water and foot traffic). General use after 7 days (with normal exposure to water, soap and foot traffic).

# How-to make the most out of your paint and accessories

## If you're completing your painting project over a few days:

To keep your paint fresh simply put the lid back on your tin and store in a cool, dry area.

To get the most out of your accessories including brush and roller, cover with foil or plastic wrap to avoid washing and wasting paint. **Note:** if using water based paint you can wash your accessories in a bucket with water. If solvent based, mineral turpentine is required.

## If you've completed your painting project:

You've got a little bit of paint left in the tin? There's a few options:

1. Take your paint tin with left over paint to your local Paintback collection site – there are over 160 nationally!

Paintback takes unwanted paint and packaging and responsibly disposes of it, diverting it from landfill and vital waterways.

Scan me to find a local Paintback location

2. For easy disposal of water based paint, Dulux EnviroSolutions Waste Paint Hardener is a great option. This handy product turns unwanted water based paint back into solid waste for easy and safe household disposal in 3 steps:

### Step 1

Simply scoop the desired amount of waste hardener into the paint tin and stir until paint solidifies.

### Step 2

Leave for 2 hours with the lid off.

### Step 3

Wrap hardened paint in newspaper and dispose of as hard waste. The clean, paint free tin can also be disposed of in recycled waste, providing a sustainable option to minimise the environmental impacts of paint products.

3. Save your accessories for next time! Simply give them a good clean. If you've used water-based paint you can clean your brushes in a bucket of water to remove most of the paint, ready for use next time.

**Note:** for solvent based paint, mineral turpentine is required.
