

Product Safety Recall

52YD0205 Dulux Precision Coating Remover Test Patch Kit

Dulux is recalling Precision Coating Remover Test Patch Kits sold at Dulux Trade Centres, Paint Spot stores and Inspirations outlets since September 2022. The 'RED' sample pot within the kit with batch numbers W2209426, W2205502 and W2203456 may be impacted. The batch number is printed on the bottom of the sample pots.

What is the defect? Some of the screw top lids of the 'RED' sample pot in the test kit may not have been screwed tightly enough, and product may leak out, especially if the box or sample pot is not in an upright position.

What is the hazard? The contents of the sample pot are corrosive. If the product comes into contact with the skin or eyes, it may cause burning or irritation. If any contact occurs, you should flush eyes with water, thoroughly wash skin and clothing, and seek medical help in the case of a reaction.

What to do Consumers should wear PPE (long sleeves and pants, apron, closed shoes, nitrile rubber gloves and safety glasses) and carefully inspect the unopened sample pots in the test patch kit for signs of leakage. If there is leakage, tighten the pot lids and clean the pot(s) of any contamination, using disposable rags. Dispose of rags appropriately. If the box has been contaminated, place the box and its contents in a plastic bag and return it to your place of purchase for a refund or a replacement. If there is no leakage, ensure that all pot lids are tightly secured. The product is safe for use.

Contact For further medical advice, consumers can contact Dulux Emergency Response Service: Australia - 1800 033 111, New Zealand: 0800 734 607
