INTERIOR PROJECTS GUIDE

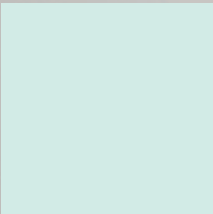

TAKE ON A HOME REFRESH...

It's amazing the difference a fresh coat of paint can make to any room.

And here's your guide to refresh your home, room by room. From the hallway, to the lounge room, bedroom, nursery and dining room, we share which products to use where, and some easy tips along the way.

For a refresh, you can use existing colours, or the colours below can be used to create your perfect scheme. All colours below can be mixed and matched.

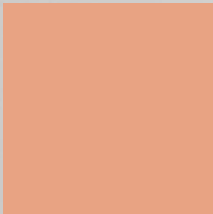

Don't miss the How to Apply steps on pages 14–15. It's that easy! So what are you waiting for? Get painting!

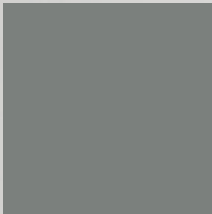

Dulux Big Bay

Take on the Dining room	12
How to Apply	14

Take On YOUR HALLWAY

Make a great first impression to welcome your guests, with a fresh entrance and hallway. A splash of new colour on the walls or a bold colour on the front door will make all the difference.

WALLS

Dulux
St Clair Half

Dulux
Okarito

Dulux
Benhar

Use Wash&Wear® Low Sheen for walls

Dulux Wash&Wear Low Sheen is a cut above the rest when it comes to resisting scuffs, stains and scrapes. The hallway is a high traffic area so you'll need paint that is washable and resistant to knocks and scratches.

DOOR & TRIM

Use Aquanamel® Semi Gloss for door and trim

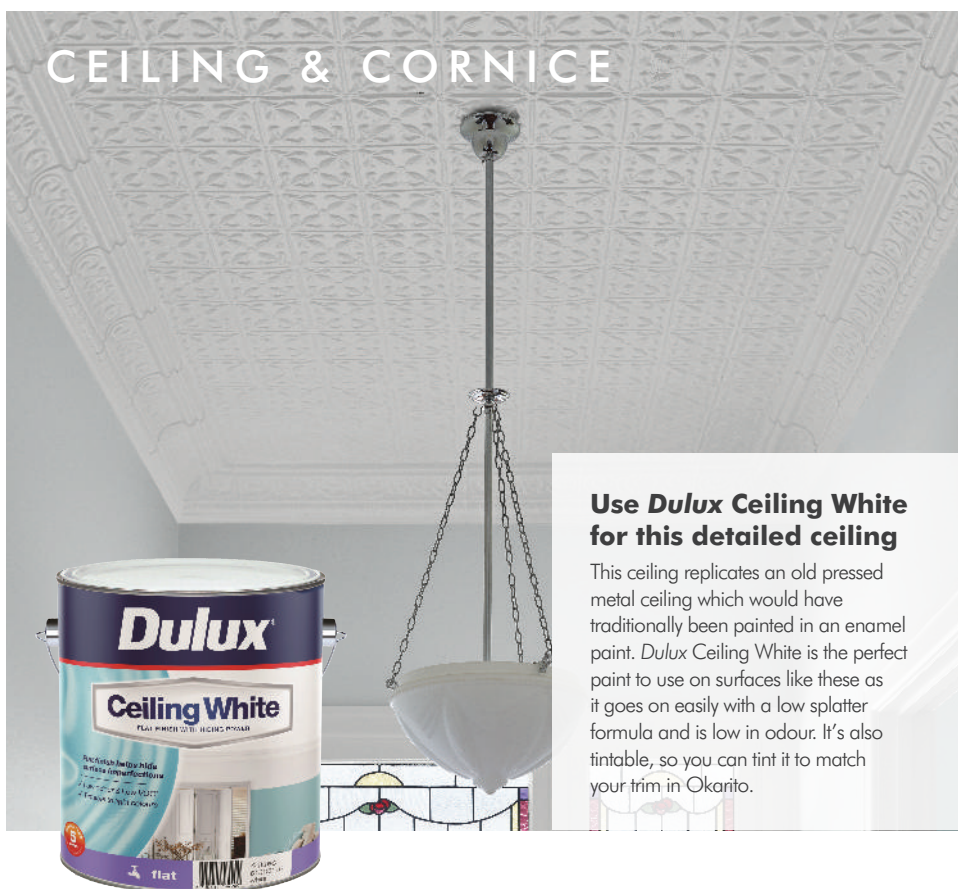

Dulux Aquanamel Semi Gloss is perfect for a feature piece like your front door. Not only is it hard wearing and resistant to chipping, it's water based and much easier to use than a traditional oil enamel. It also dries very quickly so you can get the job done in a matter of hours.

Walls: **Dulux Wash&Wear**
St Clair Half

Trim: **Dulux Aquanamel**
Okarito

Door: **Dulux Aquanamel**
Benhar

CEILING & CORNICE

Use **Dulux Ceiling White** for this detailed ceiling

This ceiling replicates an old pressed metal ceiling which would have traditionally been painted in an enamel paint. **Dulux Ceiling White** is the perfect paint to use on surfaces like these as it goes on easily with a low splatter formula and is low in odour. It's also tintable, so you can tint it to match your trim in Okarito.

Take On THE LOUNGE ROOM

The lounge room is where living happens. It needs to be a friendly and warm place for everybody and all surfaces need to withstand the wear and tear of everyday life. A colour refresh could make all the difference.

FEATURE WALL

Use Dulux® Design Concrete Effect for a feature wall

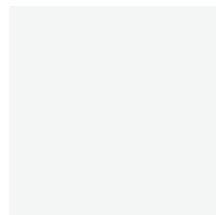

With its sleek, modern design, concrete is a popular trend inside modern homes. It's often introduced through feature walls, along with more minimalistic touches, such as decorative items. It works well on so many surfaces and is much more cost effective than actually using the real thing.

Feature wall: Dulux Concrete Effect Pale Elements

Wall: Dulux Wash&Wear Franz Josef Quarter

Ceiling: Dulux Ceiling White Okarito

DESIGNER TIP

YOU DON'T USUALLY NEED TO UNDERCOAT PRE-PAINTED WALLS OR CEILINGS. BUT, BE SURE TO CLEAN WITH SELLEYS® SUGAR SOAP TO GET OFF ANY DUST AND GRIME BEFORE YOU REPAINT.

Elements

Use Dulux Wash&Wear Low Sheen for walls

Dulux Wash&Wear Low Sheen has exceptional washability. In fact, you can wipe away most common marks, scuffs and stains with a wet cloth. This is the paint to choose if you want your walls to look freshly painted for years.

Take On THE BEDROOM

It's the one room you keep putting off. What are you waiting for? It's time to take it on. Choosing a colour scheme with style and comfort is easier than you think – all you need is a little inspiration.

FIREPLACE

DESIGNER TIP

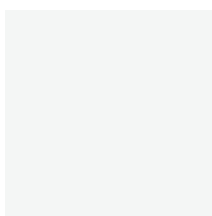

FOR A SMOOTH,
PROFESSIONAL FINISH,
PREPARE YOUR SURFACE WITH
DULUX 1STEP® PREP.

Use Dulux® Aquanamel®

Pick your sheen level from the Dulux Aquanamel range. Some would prefer a Gloss finish for their fireplace feature, others will opt for a lower sheen like Semi Gloss to create a seamless look with the walls.

Walls: Dulux Wash&Wear
Lakeside

Trim & Fireplace: Dulux
Aquanamel Okarito

WALLS

Dulux
Okarito

DESIGNER TIP

USE DULUX WASH&WEAR MATT FOR A SOPHISTICATED SUBTLE LEVEL OF SHEEN. LOWER SHEEN LEVELS ALSO MINIMISE VISIBILITY OF SURFACE IMPERFECTIONS.

Lakeside

Dulux
Okarito

BEFORE

Use Dulux Wash&Wear Matt in the bedroom for a stylish result

You no longer need to choose between a sophisticated matt finish and superior washability. Now you can have both. Dulux Wash&Wear Matt is a trusted washable matt interior paint.

Need help? Find preparation information on the back of the can. For step by step instructions on how to apply, go to pages 14–15. For any further help on your project, call our friendly Help & Advice team on 0800 800 424 or contact our live chat team online at dulux.co.nz

Take On THE NURSERY

It's a special time preparing a nursery for your little ones. This is the room in your home that you want to make warm and tranquil. The big tip for this project – have fun with it.

WALLS

DESIGNER TIP

CHOOSE DULUX® WASH&WEAR® AND WIPE AWAY MOST COMMON MARKS, SCUFFS AND STAINS WITH A WET CLOTH. YOUR WALLS WILL LOOK FRESHLY PAINTED FOR YEARS.

Dulux
North Cape

Dulux
St Clair Half

Dulux
Okarito

Use Dulux® Wash&Wear® +PLUS Anti-Bac Low Sheen for nursery walls

At last, there's a washable and low VOC wall paint developed to resist the growth of nasty bacteria and mould. This is why Dulux Wash&Wear +PLUS Anti-Bac is a perfect choice for your little one's room. Remember to allow room to dry for a week with good ventilation before introducing pregnant mum or baby to the room.

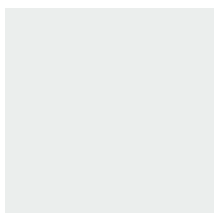

DESIGNER TIP

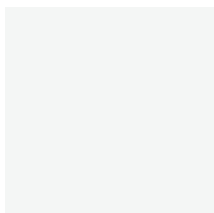

IF YOU ARE ALLERGIC TO MOULD SPORES, **DULUX CEILING WHITE** +PLUS KITCHEN&BATHROOM HAS A 10 YEAR GUARANTEE AGAINST MOULD GROWTH.*

Feature wall: **Dulux Wash&Wear** North Cape

Wall: **Dulux Wash&Wear** St Clair Half

Windows & trim: **Dulux Aquanamel**. Ceiling: **Dulux Ceiling White** in Okarito

CEILING

Dulux
Okarito

Use **Dulux Ceiling White +PLUS Kitchen&Bathroom**

Did you know *Dulux Ceiling White +PLUS Kitchen&Bathroom* can be used in all rooms of the home? This product is the perfect choice for a nursery as it is a mould and bacteria resistant formula.

WINDOWS

Use **Dulux Aquanamel® Semi Gloss** for windows and trim

Dulux Aquanamel is low odour and a water based interior and exterior acrylic enamel that dries to a tough and chip resistant semi gloss finish. It's non-yellowing too so it will last for years.

Take On THE DINING ROOM

A room where memories are made. Create a beautiful and relaxed open space in your home with a splash of colour. Choose washable and durable paint that will last for years.

CEILING

Use **Dulux Ceiling White +PLUS Kitchen&Bathroom**

Dulux Ceiling White +PLUS Kitchen&Bathroom is specifically formulated with kitchens and bathrooms in mind – it's perfect for damp and dry areas. This product is a mould and bacteria resistant formula with a 10 year guarantee against mould.*

DESIGNER TIP

ALWAYS START WITH YOUR
CEILING FIRST AND THEN FOLLOW
WITH WALLS AND TRIMS.

Dulux
Okarito

DESIGNER TIP

WHITE ON CEILINGS CAN APPEAR
A SHADE DARKER THAN ON
THE COLOUR CHIP. IF IN DOUBT
CHOOSE A SHADE LIGHTER.

Walls: Dulux Wash&Wear
Big Bay

Ceiling: Dulux Ceiling White
Okarito

Dulux
Big Bay

Use Dulux Wash&Wear +PLUS Kitchen&Bathroom Low Sheen for open plan living

You need a paint that is hard wearing, and stain and mark resistant for exceptional washability. It is also fortified with a powerful mould inhibitor specifically for use in damp and humid environments such as kitchens, bathrooms and laundries.

HOW TO APPLY

WALLS

How to paint your walls

1. Follow the preparation steps on the back of the can.
Dulux® 1Step® Prep can be used for a prep coat.
2. Start by cutting in around the edges of the wall with a brush.
These are areas the roller cannot easily reach.
3. Using the recommended synthetic roller nap as per product specifications below, load roller in the tray with a reasonable amount of paint.
4. Start rolling the wall in an 'M' pattern. Start with the wall closest to the natural light source. Continue over the same section until the wall is evenly covered.
5. Using an unloaded roller, and while the paint is still damp, begin in the top left corner of your painted area and gently let the roller roll down to the baseboards in a straight line. A lightness of touch will prevent new roller marks from forming. Repeat this action, slightly overlapping your last movement so your roller rubs away the line created by the previous stroke. Continue this across the area you have painted. This is called laying off.
6. Reload your roller and repeat until the wall is complete.
7. Allow the first coat to dry and repeat the total process again with a second coat.

Dulux® Wash&Wear® Matt

For walls where you need a subtle sheen. The matt finish also reduces visibility of imperfections on plaster walls. For the best quality finish, use a 12mm or 15mm nap synthetic roller and quality paint brush.

Dulux Wash&Wear Low Sheen

For all walls, especially in medium and high traffic areas such as hallways and family rooms. For the best quality finish, use a 9mm or 12mm nap synthetic roller and quality paint brush.

Dulux Wash&Wear Semi Gloss

For all walls, especially frequently cleaned areas and wet areas. For the best quality finish, use a 5mm or 10mm nap synthetic roller and quality paint brush.

Dulux Wash&Wear +PLUS Anti-Bac Low Sheen

For walls subject to bacteria and mould growth. Adding Anti-Bac makes a hard wearing, bacteria and mould resistant finish that helps to maintain indoor air quality. For the best quality finish, use a 9mm or 12mm nap synthetic roller and quality paint brush.

Dulux Wash&Wear +PLUS Kitchen&Bathroom Low Sheen

For walls exposed to humidity or damp such as kitchens, bathrooms and laundries. For the best quality finish, use a 9mm or 12mm nap synthetic roller and quality paint brush.

FEATURE WALL

How to paint a concrete feature wall

1. Follow the preparation steps on the back of the can.
2. Start by cutting in around the edges of the wall with a brush – these are areas the roller cannot easily reach.
3. Working in small sections, use a long nap roller to apply the effect to the wall.
4. Smooth the surface with a steel trowel using broad sweeping strokes holding the trowel at a 60–80° angle.
5. Apply two more coats following the same process.
6. Use a 600 grit sandpaper to lightly polish the surface in a circular motion. Use the edge of the trowel to further polish the surface.

Dulux Design Concrete Effect

The refined modern industrial textural effect of polished concrete, suitable for interior walls in the living room, bedroom, or study. For the best quality finish, use a 14-18mm nap synthetic or mohair roller and a steel trowel.

CEILING

How to paint your ceiling

1. Follow the preparation steps on the back of the can.
2. Begin by cleaning your ceiling. Remove cobwebs with a clean broom and wash the area with Selleys® Sugar Soap.
3. Tape around cornices, edges and any down lights.
4. Just like a vertical wall, begin by cutting-in where the roller won't reach. Using a paint brush, paint around down lights and edges to create a border.
5. Once you've loaded your roller evenly, begin in one corner and move fluidly in a parallel motion. For best results, work in 1 metre sections painting across and then down. Roll as far into the previously brushed sections as possible.
6. While the paint is still damp, begin laying off the paint. This is a crucial step in achieving a smooth and consistent finish.

To lay off: Using an unloaded roller, begin in the top left corner of your ceiling and gently pull towards you in a straight line with no pressure. A lightness of touch will prevent new roller marks from forming. Repeat this action and slightly overlap your last movement so your roller rubs away the line created by the previous stroke.
7. If your ceiling requires two coats, allow the first coat to dry and then repeat steps 4-6. It may require longer than two hours depending on drying conditions.

Dulux Ceiling White
An easy to apply, flat finish ceiling white with excellent hiding power and a 5 year guarantee against mould growth. For the best quality finish, use an 11mm nap synthetic roller.

Dulux Ceiling White +PLUS Kitchen&Bathroom
An ultra white, flat finish ceiling paint with superior hiding power and a 10 year guarantee against mould growth. For the best quality finish, use a 10-15mm nap synthetic roller.

Dulux Ceiling White NeverMiss®
A pink-to-white one coat ceiling paint that lets you see where you have painted. For the best quality finish, use an 11-15mm nap synthetic roller.

DOORS, WINDOWS & TRIM

How to paint your door

1. Follow the preparation steps on the back of the can.
2. If your door has already been painted with enamel, give it a light sand until the shine has become dull. Wipe off the dust.
3. Use Dulux 1Step® Prep to prime the door before applying a topcoat.
4. Using a synthetic brush, start painting the front panels of the door. Then, fill in the vertical sections between the panels. Follow with the horizontal sections at the top, middle and bottom. And finally, the outside panels.
5. Once you've completed an area, while paint is still wet, lightly smooth over the painted section with long brush strokes. Do not reload the brush when you do this, a few strokes should be enough to smooth the surface.
6. Allow two hours to dry, then give the surface a light sand with 400 grit sandpaper.
7. Repeat above steps for second coat.

How to paint your fireplace, windows and trim

1. Follow the preparation steps on the back of the can.
2. Begin by taping around the fireplace, window or trim with painter's masking tape.
3. Start by cutting in at the top and bottom of the trim, then finish off in the middle, ensuring the top and bottom edges are still wet.
4. Apply paint to the trim using short, horizontal brush strokes. Repeat the motion for about a metre at a time.
5. Smooth over painted section with long brush strokes while paint is still wet. Do not reload the brush when you do this. Don't brush it too much – a few light strokes should be enough to smooth the surface.
6. Repeat this process until complete. Allow to dry, then give the surface a light sand with 400 grit sandpaper and repeat for a second coat.

Note: With windows it is recommended to paint the inner window sections first then move to the outer trim. And remember, always keep windows open as they dry and ensure to move them constantly to prevent them from sticking together.

Dulux Aquanamel®

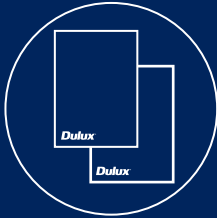

Dulux Aquanamel can be used in place of traditional oil based enamels which not only saves time, but has the added benefit of paintwork not turning yellow with time. Available in Gloss and Semi Gloss. For the best quality finish, use a 5-9mm nap synthetic roller for large areas and quality paint brush for trims.
