

Dulux®

Worth doing, worth Dulux.

Spray & Equipment Services

Airless Spray Equipment

At Dulux NZ, we can offer a range of services for your spray equipment as well as other painting related machinery. It is important to get your equipment serviced regularly. We can investigate any issues you may be having with your equipment, so you can get back on the job sooner. We also offer rental machines to keep you going while your machines are being serviced (subject to availability).

Brands we service

Electric Airless Brands: Graco, Wagner, Precision, Titan and other small electric sprayers

Industrial Brands: Graco, Wagner, Wiwa, Walden.

Diesel Heaters, Waterblasters and Dehumidifiers

In addition to airless spray equipment, we can now also provide in depth assessments and repairs of water blasters, diesel heaters, dehumidifiers and their accessories.

Brands we service

Diesel Heaters: Stanley, Remington, Jet Force, UltraHeat (Strouds)

Dehumidifiers: UltraDry (Strouds) and Almax

Waterblaster pumps: Cat, Comet, AR.

Onsite training, maintenance and repair

For larger machinery fleets, larger workforces and in-situ equipment, we can now offer onsite training, service assessments, preventative maintenance servicing and in some cases basic machine repairs.

Training would cover basic servicing techniques, correct machinery set up and installation of accessories, application consultations and general servicing enquiries.

Service assessments for larger fleets and in situ equipment would be similar to our in-house assessments, whereby we thoroughly assess machinery from inlet to outlet and provide a detailed report of necessary repairs or upgrades. We can also now provide preventative maintenance servicing on this machinery to ensure optimum operation and minimise downtime.

All our service technicians have on board tool kits and spares, and are able to carry out basic machine repairs onsite in some cases or recommend what may be required.

Meet the Spray and Equipment Service Team

Liam

I have been working with spray (fluid transfer) equipment for almost 5 years.

I have experience with DIY, commercial, and industrial spray equipment which includes electric, pneumatic, hydraulic and petrol-powered machinery. I also have significant experience servicing water blasters, dehumidifiers, diesel heaters and diaphragm pumps.

I can also provide onsite preventative maintenance and call out repairs of machinery that is in situ and cannot be moved, as well as linemarking equipment ranging from walk behind units to ride on equipment and the occasional roadmarking truck.

Rodney

I have been a painter and decorator since 1998 have been brought up using Graco spray machines. My kids race speedway cars and I rebuild their race engines so am very familiar with how pumps work.

I am a volunteer rural fire controller have been helping the community for 24 years now and I am the clerk of the course at Wellington family speedway, having volunteered there for 23 years.

Bernie

I've been working for Dulux since March 2023.

My background is in the dive industry, I have been lucky enough to work in both NZ and in the Caribbean for the last decade as a PADI/SSI Instructor, boat captain and dive guide. This gave me some hands-on experience with servicing dive gear and maintaining boat engines. I've found the high-pressure side of dive equipment is not so different from the airless spray units common to the painting industry.

I am finding the spray technology to be constantly improving. Even in the short time I have been in the industry I have seen Graco and Wagner release some awesome new products to make the applicator's job easier. We are lucky enough to have a wealth of knowledge in the Dulux team and I am positive we can help with any of your spray requirements.
