STEPS | DAY

Complete your furniture project with Dulux® Weathershield® in 2 steps

STEP 1: PREP

- Before you spray paint your outdoor furniture, brush away any dirt and lay down a drop cloth.
- Use a brush to remove imperfections.
- Lightly sand any pre-painted surfaces.

STEP 2: PAINT

- If using Weathershield, dilute with up to 10% water.
- Unscrew the container from the spray gun and pour in the paint.
- To protect your outdoor space from overspray, hold up a piece of cardboard behind the furniture as you spray it.
- Pop the spray gun on the vertical setting and point the spray gun towards your furniture.
- Point the spray gun directly ahead and start spraying your furniture with long sweeping strokes. Release your finger from the trigger when you get to the top and bottom to prevent too much paint forming in one area and dripping.
- 2–3 coats may be required.

Multi-purpose spray unit with adjustable spray rate for faster application.

Guaranteed not to peel, flake or blister for as long as you live in your home.**

To see how much faster spray is, watch our video

*The \$150 spend is based on Dulux products and generic accessories required for most projects. Based on your specific project needs you may need slightly different paint and accessories, reach out to Dulux Help and Advice for more information.
