Product specification and colour support at every stage of your project

Whatever your project size, the Dulux Specification and Project Services team is committed to supporting architects, specifiers, engineers, builders and developers at every project stage, from design to completion. Dulux provides total product and colour solutions to ensure every project is completed according to the specification.

Architectural Specification Services

No matter your project size, our team will write comprehensive coatings specifications for all substrates on your project. The team will further ensure that your project vision becomes a durable reality.

Specifying Australia's Leading Coatings Brands

Our team can provide advice and prepare comprehensive coatings specifications from the DuluxGroup product portfolio of Decorative, Powder, Protective, Texture and Timber coatings as well as Waterproofing products & finishes.

Continuing Professional Development

Our team is committed to providing training, advice and education to the construction industry and specifier community. Dulux is a recognised CPD provider by the Australian Institute of Architects Refuel Program.

Dulux provides a range of accredited modules that are relevant to design documentation across Dulux, Dulux Protective Coatings, Dulux Powder Coating, Dulux AcraTex®, Parchem® and Intergrain® portfolios.

Environmental Requirements

As the Australian pioneers of low Volatile Organic Compound (VOC) paints, Dulux can provide a low VOC paint solution for every size of project and application. Dulux low VOC solutions can help you achieve world class Green Star indoor environment quality (IEQ) requirements for buildings, without compromising on product durability and performance.

Dulux offers a comprehensive Green Star specification and documentation service.

Dulux Samples

Dulux World of Colour® provides over 4,600 colours in interior and exterior grade paint to ensure you find the perfect colour for your project. A range of tools are available to make choosing the right colour easier. Dulux provides A4 color samples in addition to woodcare, powder and texture product samples free of charge to enable you to assess individual colours, schemes and finishes for your project. Wet paint samples (up to 1L) can also be provided by Dulux for on-site application in order to check and agree colour and/or texture consistency and standards.

Dulux BIM Solutions

Dulux BIM Solutions provides easy to use Revit® and ArchiCad colour and product specification content and Add-ins. Dulux colours and products are added your BIM models quickly and simply, assisting BIM workflows and documentation to reduce manual data entry and errors. Dulux BIM Solutions allow more time for colour creativity.

Dulux EnviroSolutions®

Dulux EnviroSolutions® are a range of products that provide environmentally responsible solutions to traditional painting clean-up methods. The range of products support the building industry in meeting environmental responsibilities by:

- Minimising water usage
- Cleaning up without turps
- Controlling paint waste disposal

Beyond Specification – Site Support & Services

Our dedicated commercial team provides site support to ensure adherence to specification and best practice application on the project. Should you require assistance, Dulux can recommend reputable painting contractors.

Warranties

Dulux can provide a detailed Dulux Material Warranty in conjunction with painters and allied contractors to cover all paint and coating requirements. Details on how to care for painted surfaces and long-term maintenance needs will be included within any Dulux Material Warranty.

Worth doing, worth Dulux.

To ensure your project receives the best protection and decoration of Dulux quality coatings call Dulux Customer Service 13 23 77 or email specificationservices@dulux.com.au for further information. The specification website at dulux.com.au/specifier will have additional information for your reference.
