Business Moves Fast

Does your organization
have the mobility
strategy to keep pace?

The ability to work from anywhere is becoming a major factor in business, especially with more millennials joining the workforce.

With a solid mobility strategy you can:

- Enable revenue growth
- Produce operational savings
- Enhance productivity

Taking a holistic approach to Enterprise Mobility enables an organization to improve processes, implement the proper technology and provide secure access to information - both inside and outside the office - without disruption to existing processes.

1. Extend & Transform Your Infrastructure

In a rapidly changing business world, expanding your enterprise outside of your office walls can be difficult and risky. Ricoh eases the transition with solutions focused on secure, agile, efficient and transformational technologies.

We work in an age of digital transformation, and approaches that worked in the past no longer work in this fluid environment. Capitalizing on the digital shift requires a culture shift – but many businesses aren't sure where to start.

We can help you transform the way you work with Ricoh mobility solutions that accelerate document digitization, leverage multiple forms of data, integrate mobile devices and capture content more effectively.

Ricoh can help your organization take on the mobility challenges you face in the New World of Work – empowering iWorkers* and speeding up information processes.

**Information Worker*

2. Speed Up Customer Service

If your mobile employees have to wait until they're back in the office to complete transactions, productivity slows and customers are left waiting. Wouldn't it be better if you could take advantage of the mobile devices your employees already use to accelerate business-related tasks?

We can help your organization achieve agility by leveraging major mobile platforms. Perform work processes on-the-go with smartphones and tablets and retrieve important data while in the field.

Ricoh solutions for document digitization and scanning empower employees to capture and route important information more quickly... from wherever they are.

When you can extend the capture and retrieval of documents, data and images to your employees in the field, they can enhance the customer experience with quick responses and timely follow-through.

3. Use Mobility to Create Savings

Do you finance your own data centers? Sponsor corporate mobile devices? Purchase legacy software license agreements? If the answer to one or more of these questions is yes, Ricoh can help your organization capitalize on the real cost savings from Cloud-based solutions that make high total cost of ownership technologies a headache of the past.

We can assist your organization in developing a truly paperless ecosystem, allowing employees to work from anywhere – on any device – without increasing risk or cost.

Ricoh solutions provide seamless connectivity to multiple Cloud services. Technology delivered as a service means you only pay for the services you need – with the ability to scale up or down as your needs change.

Cloud-based technologies can enable new information workflows that encourage collaboration while improving business resiliency and continuity.

4. Embrace a Performance Culture

Once you invest in mobility solutions, you want to know that employees will use them. Ricoh has the knowledge and the expertise to help make the transition as smooth as possible for maximum user adoption – so you can enable a true performance culture within your organization.

Business success is directly tied to employee's ability to adopt and optimize the use of new technology, tools and processes. That's where Ricoh's change management expertise can help.

We focus on the organizational processes and people that will make your mobility framework successful – working with you to choose the technologies that best fit your unique needs.

Ricoh consultants practice side-by-side coaching, giving you the tools you need to ensure that implemented mobility changes stick.

5. Navigate the New World of Work

The steps you take today help determine how you'll compete tomorrow. Our consultants can set you up for success with the right combination of strategies and solutions to create a competitive advantage in the New World of Work.

Ricoh has developed its own Enterprise Mobility framework – which is industry-leading, people and process-centric and able to dramatically improve productivity while reducing operating costs.

Ricoh's tenured team of consultants are experts in multiple disciplines of transformational change – strategically aligned to bring a diverse range of knowledge to your unique information challenges.

In your Enterprise Mobility assessment, we'll show you how we leverage best practices and innovations in business process agility, information governance, risk management, compliance and organizational change management.

Put Enterprise Mobility into Practice and Enjoy These Benefits
