RICOH Smart Integration

More security, more productivity, more convenience

The Device Enhancement add-on works with any RICOH Smart Integration solution package to give you more security, productivity and convenience. Offer secured device access with user authentication, including card access. Reduce wasted prints and improve data confidentiality with secured print release, and stay on top of toner replacements and keep your print fleet running with device management and reporting tools.

It's easy to get started: just add the Device Enhancement add-on to the RICOH Smart Integration solution of choice, and you'll unlock even more capability for your MFP within minutes.

Why Smart Integration with the Device Enhancement add-on?

- Help protect document privacy with user authentication, including card authentication
- Send documents to a secured print queue and print from any device in the group
- Enable mobile printing and guest printing, without requiring direct network connectivity
- Know the status of your print fleet and view device counters with device management tools
- Understand how your devices are being used with utilization reporting features

The Device Enhancement add-on

Increase security and accountability

User-friendly authentication (including HID®, HID® iClass, Mifare® and more) makes it easy to access networked MFPs. Authenticated users can print, copy, scan, fax or access document server functions according to permissions. Device user lists are centralized for streamlined maintenance.

Protect the confidentiality of printed information

Secured document release can help you protect information without getting in the way of user convenience. Users submit print jobs to a secured print queue in the cloud. When ready, they approach any enabled MFP in the group, authenticate, choose documents and release to print.

Simplify printing for mobile users and guests

Today's workers expect to be able to conduct business from anywhere. Give mobile workers and guests the same convenience with secured print release. When users can submit print jobs from anywhere — without needing a print driver — and pick them up at their convenience, you can provide a better experience and improve productivity, without compromising privacy.

Know the status of your print fleet

Get preventative alerts when toner or paper levels are low. Know which devices are being used the most without manually tallying print and copy counters. View activity details (i.e. color vs. black-and-white) by authenticated user/device. Keep track of cost and environmental savings.

RICOH Smart Integration Service Packages²	Base Packages				Add-On Packages		
	Essentials	Connectors	Workflows	Advanced Workflows	Device Enhancement	Legal	Healthcare
Features							
Scan to email	\checkmark	\checkmark	\checkmark	\checkmark			
Convert scanned documents to editable, searchable files	\checkmark	\checkmark	\checkmark	\checkmark
