Why Neurotic?

Neurotic simplifies backend setup with data validation, monitoring, file management, and a robust API. Our intuitive dataset wizard makes backend work easy, letting developers focus on frontend experience.

Mission & Values

Our mission is to make backend development easy, enjoyable, and accessible. We focus on simplicity, affordability, and growing with our community, fostering collaboration and continuous improvement.

Project Description

Neurotic is a backend platform that streamlines data management, validation, and monitoring. It transforms complex setups into a quick, efficient process, saving developers time and effort.

Unique Value Proposition

Neurotic sets itself apart by being a smarter, more user-friendly alternative to platforms like Contentful, Appwrite, and Supabase. Our dataset wizard lets you build data models effortlessly, so you can focus on what truly matters—creating great user experiences.

Milestones / Achievements

Neurotic launched its MVP, secured first paying clients, and gained recognition in the Startup Supernova accelerator. We're in talks with industry leaders like Vercel, positioning ourselves as a key player in backend services for frontend developers.
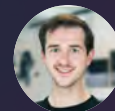

CTA / Financial Needs

We're gearing up to scale and finalize our market readiness. We invite you to join us on this journey—help us revolutionize backend development and create a brighter future for frontend-focused teams.
