

KuraTech is a **LegalTech** company that equips court-appointed liquidators with a **SaaS solution platform** for streamlined and effective liquidation administration, to exert **more high-quality legal work** from each bankrupt estate.

Problem

Liquidators only receive a deposit which covers around 10h of work. Their time is therefore limited.

Standard tasks can take up to **5 hours (50% of their time)**.

Solution

With connection to databases, **Kuratech's software can complete the standard procedures within 10 minutes**, and further empower the liquidators with various AI tools to be more productive and analyse the estate in more detail.

Value

By spending less time on standard procedures, liquidators can focus their limited time on analysing the bankruptcy estate. If the liquidators discover e.g. hidden assets, they can significantly increase their earnings with more work.

Q4 2024

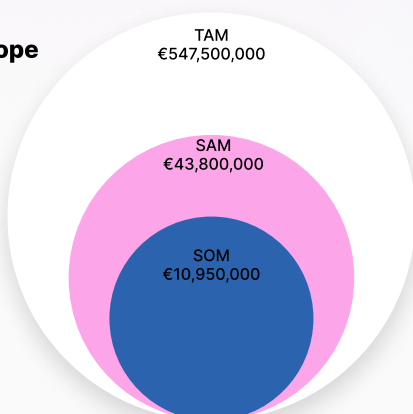

Q1 2025

Scaling to the Nordics

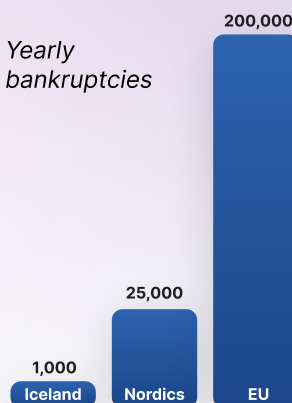

Market

- Liquidators receive a deposit of \approx €2,500
- KuraTech charges \approx €200 for automating standard procedures and additional \approx €100-1,000 for AI tools
- We aim to get **25%** market share in Europe by 2030

Europe

Yearly bankruptcies

Why Now?

- Importance of data-driven processes**
 - Data-driven decision-making in the legal industry is increasing
- Industry shift**
 - The legal industry is undergoing a transformative shift towards digitalization and automation

Business Model

Our customers are the liquidators.

- €200 for standard procedures
- €100 - 1,000 for analysing bank transaction

Competition

Most startups in the LegalTech sector are focused on general productivity tools. However, KuraTech is the only company globally focused on SaaS for Liquidators.
