

Hytec™ System Connects.
Install in minutes.
Last a lifetime.

HYTEC
A KOHLER COMPANY

The fast, affordable bath renovation. With a lifetime of care and maintenance benefits.

It's time for a renovation. But you're a little short on time and cash. Hytec™ System Connects are the perfect solution. These tough, lightweight panels can be installed in minutes, fitting right into place, with a waterproof seam. A simple one-person operation. Once they're up, they keep doing the job. The tough gelcoat finish resists nicks, scratches and mildew, and cleans up quickly and easily.

The panels come in a range of colours, too, to match your decorating needs. Now you can have a whole new look – without a great big investment in time, money and hassle. Hytec System Connects. Put them up and forget about them.

Features and Benefits

- Lightweight for easy carrying and installation
- Wide range of colours for decorating flexibility
- Rugged fibreglass construction
- Tough, smooth gelcoat finish resists chips, stains, scratches and mildew
- Large, ergonomic shelves
- Easy to clean and maintain
- Easily replaceable for future colour change

Locator guides make it easy for you to ensure proper alignment every time

3660L/R System Connects 36" side walls and 3661 System Connects 36" back wall. GR363 36" square shower receptor

3660L/R System Connects 36" side walls. GR36N 36" neo-angle shower receptor

3660L/R System Connects 36" side walls and 3662 48" back wall. GR483R 48" rectangular receptor

3063L/R System Connects 60" rectangular bath/shower wall set. GR603R 60" rectangular receptor

3063L/R System Connects 60" rectangular bath/shower wall set. 3060/61 Hystar™ skirted bath

Complete the system. With a perfectly matched Hytec™ shower receptor or bath.

The best part of our wall sets is how perfectly they come together with both the Hytec shower receptor and the Hystar™ skirted bath. They feature the same rugged but lightweight fibreglass construction, the same smooth, low-maintenance gelcoat finish, the same easy installation. One smart system where the components fit together easily – and work together beautifully. Of course, the receptors and the bath also can be installed alone. To match your needs, the receptors come in several sizes, up to 60 inches wide, and colours to match your needs. Plenty of ergonomics too – like the generous 21"-high kneewalls that eliminate the bending and straining you typically go through when cleaning shower receptors that do not have a kneewall.

Features and Benefits

- Alcove or corner shower base widths from 35 ¾" to 59 7/8"
- Hystar bath fits any standard five-foot pocket
- Range of colours to match your needs
- Colour-matched System Connects wall sets
- Rugged fibreglass construction
- Tough, easy-to-clean gelcoat finish resists chips, stains, scratches and mildew
- Generous footrests and seats – with superior backrest angle
- Integrated shelves placed at optimum height
- Moulded-in floor pattern

Generous seat and foot ledges provide the comfort needed to sit and enjoy a relaxing shower.
