

CLT Airport Community Roundtable

DRAFT Guiding Principles – 4/30/19

Purpose

Guiding Principles help the ACR in evaluation of potential recommendations.

Guiding Principles (Macro View) – Evaluating Recommendations for their effect on the Entire Community

Overall, reduce the airplane noise effect on the population.

Guiding Principles (Micro View) – Evaluating Recommendations for their effect on People, Locations, Entities

Desired Effect

- 1) For higher affected areas, increase the time between flights.
- 2) For higher affected areas, reduce the number of flights per day.
- 3) For higher affected areas, reduce the number of night flights.
- 4) For higher affected areas, reduce the plane noise level.

Affected Groups

- 5) Reduce the **# of people** who experience a high frequency of loud plane noise.
- 6) Reduce the **# of locations/neighborhoods** that experience a high frequency of loud plane noise.
- 7) Reduce the **# of schools** that experience a high frequency of loud plane noise.

Additional Considerations

- A. In lower affected areas, attempt to minimize increased airplane noise effects resulting from recommendations.
- B. Attempt to minimize/avoid increased airplane noise effects on Environmental Justice areas.
- C. Follow City of Charlotte actions on noise ordinance (which is in development) to determine if/how to modify the list of Affected Groups to apply to particular healthcare or religious facilities.
- D. Avoid unintended consequences resulting from recommendations.
