

Fees

Gemini Predictions applies a transaction-based fee structure that is calculated at the time of trade execution. Fee rates may vary for certain Members, including Designated Market Makers (DMMs), in accordance with Rule 3.15 of the Gemini Titan Rulebook. Fees apply to all contract terms and conditions unless otherwise specified.

Fee Model

Gemini calculates transaction fees for each side of a trade using the lower of the YES or NO contract prices.

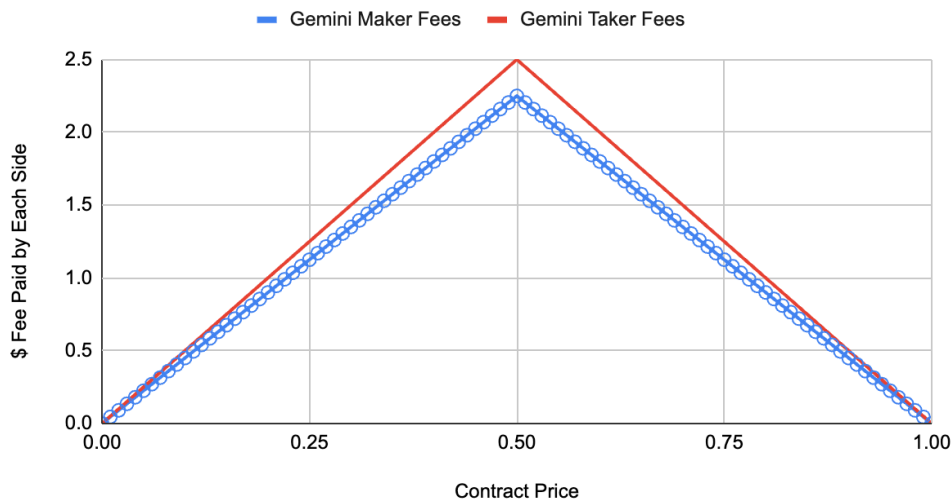

Fees are calculated as follows:

$$\text{Fees Charged} = \min(P, 1 - P) \times \text{Contracts} \times \text{Fee Rate}$$

Where:

- **P** is the price (in USD) of either the YES or NO side of the contract
- **Contracts** is the number of contracts traded
- **Fee Rate** is the applicable Maker or Taker fee rate (Maker: 0.00, Taker: 0.05)
