

Zero Track Pro Recessed

High-tech LED lighting system for interior architecture

Description

Zero Track Pro stands out with its ease of installation on surfaces, as well as with its minimized dimensions and minimalist aesthetics where, once integrated into the space, the eye cannot tell whether the line of the profile is on the surface or recessed into the ceiling/wall instead.

Its reduced dimensions also hold the technology to control adjustment with protocols that allow professional management of appliances through data paths or wirelessly (either in broadcast mode or individually, point to point).

High-tech LED lighting system for interior architecture

Notes

Wattage per linear foot is dependent upon quantity and type of light modules used.

Contractor to supply wire from driver to luminaire. Drivers should be installed in a suitable electrical enclosure (by others), and an accessible location.

Remote power supply

0-10V dimming control unit is not included. Compatible dimmers to be used must be "active 0-10V" or employ the Dim Control Unit (DCU).

The maximum length that can be fed with a single 96W driver is 19'-6", however voltage drop may limit actual lengths to shorter runs. Consult factory for specific application assistance.

3500K and other CCTs are available but not cataloged. Consult factory.
