

Light Cut Mini LED

Knife-edge interior cove system for interior architecture

Description

The Light Cut Mini is a linear cove lighting system comprising an knife-edge extruded profile which integrates perfectly in drywall ceilings. The spot modules are 3-ct track mounted and slide along the profile for maximum flexibility. A cove housing is created on the jobsite by the contractors. The system is available in two sizes depending on the installation. It has accessories for visual comfort optimization and color filters. The system can be utilized for as a cove in the middle of the ceiling or perimeter channels.
