

Artificial Intelligence with Humanity to Unlock the Secret, the Science, the System, to Supercharge Conversations, Performance and Results

SUSAN K YOUNGER,

*Consultant – Engaging Humanity in the Workplace Certified B.A.N.K. IOS Coach / Certified and Licensed
B.A.N.K. Trainer*

INTRODUCTION

Create value and improve staff function by learning how to credibly connect and engage all health care workers in conversations where each feel heard, understood, valued for their knowledge, and respected for their contribution, within a system and process with ease and proven results.

AIM:

Improved communication and engagement at all levels of interaction with respect for all members of society. Creating individual respect and value to create cohesive, productive work environments where all contribute at their best to serve the community and produce proven results in business.

MATERIALS AND METHODS:

Using the system and the tools of B.A.N.K.® methodology with Codebreaker Technologies AI to strengthen confidence in communicating effectively and efficiently to improve engagement with greater influence, to create desired results for society with engagement of humanity and trust.

RESULTS:

Decrease conflict, improve staff ability to connect with team members, clients, and patients with ease to discuss need for care, methods of treatments for improved health, and increase the bottom line with predictable results and less disruptions.

CONCLUSIONS:

Effective communications, respecting the values of all involved, create work environments that function with ease, less stress, and improving bottom line results. They serve a community and engage in a society where all feel the care and methods of treatments for improved health are presented and understood to be for good of all involved. Research and strategies are presented and easily evaluated for their solutions effectiveness.

BIOGRAPHY:

Susan K. Younger has a BA in architecture from Iowa State University. Working in management with several diverse teams, held to high expectations in various industries has given Susan a depth of experience few business leaders acquire. In 1998 she added Bodywork, including Structural Integration and Myofascial Release to her business and continued consulting in architecture as well. Working with B.A.N.K.® methodology since 2015, she has combined her wide backgrounds with her roles as leader, manager, author, and speaker to solve problems and to help others effectively develop interpersonal communication skills important in both business and in life.
