

Intermingling of Energy

DR. ANITA C POWELL, Msc.D.

Metaphysics, Energy Psychology, Author

INTRODUCTION

Nikola Tesla is to have said “if you want to find the secrets of the Universe, think in terms of energy, frequency and vibration. Pythagoras of Samos is to have said, “in everything, there is mathematics”. Albert Einstein is to have said, “Everything is energy and that’s all there is to it. Match the frequency of the reality you want, and you cannot help but get that reality. I can be no other way. This is not philosophy. This is Physics. And I say, “when we know that it works, how to work with it, it works with us”. Universal Energy, the Source external; Personal Energy, the Source internal. This is the essence of UniPersonal© Energy. The intermingling’ is by way of Energy Centers of the Intrinsic Subtle Body (Chakra), its expression the Extrinsic Subtle Body (Aura), supported by numerical vibrational equation – A sequence of three; an association with one of the Universal Laws, the Law of Correspondence...as above so below; as inside so outside. This presentation aims to offer strategies and approaches in how energy cannot be created or destroyed; however, it can be transformed via frequency, velocity, and vibration.

AIM:

To show the dual connection of both intrinsic and extrinsic energy.

CONCLUSION:

“There is an intermingling’ with the Universe. Whether we know it or not is immaterial.” Everything is energy; therefore, thought is energy, and its content and intent will determine the form and experience of our lives.
