- ✓ Step by step guide to account clean up
- ✓ Hands on assistance with clean up in Heap account

“

One of the most useful things about the Professional Services engagement with Heap was that it kept us accountable to a timeline. Without this project I think it would have been easy to just put things off 'until next month.' There is always a large volume of work that feels more important than cleaning up events. Now we are in a place where our team is not wasting time trying to make sense of the data. It has really helped build confidence across our org.

“

Since finishing our data reconfiguration we've found some impressive trends in how Heap is being leveraged. We've seen a 3x increase in the average of Heap charts created monthly as well as a 9x increase in new charts saved. With clearer event structures our growing team is empowered to dig more into our data, allowing us to find more & more answers to questions that help us reach our business goals!
