

aura

Setup Guide

Do not remove the stickers on the top of your Aura devices until setup is complete or use the Placement Card when removing device stickers to keep track of where they are in your home.

Setup Guide

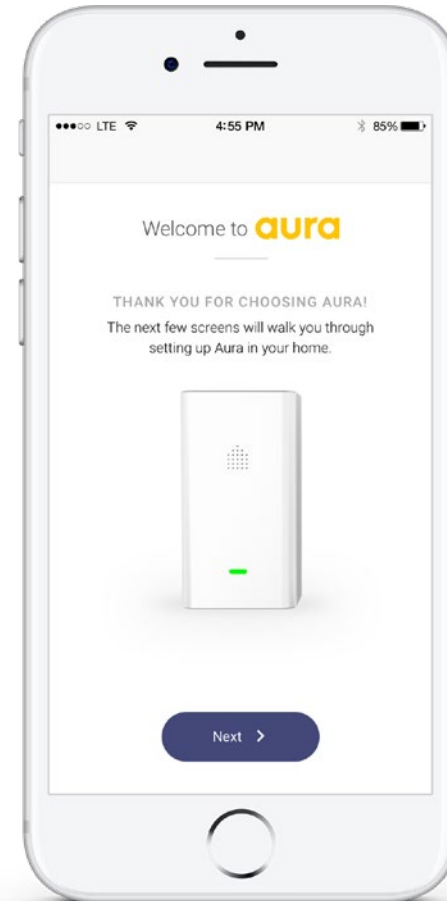

1. Download the Aura Home app and create an account

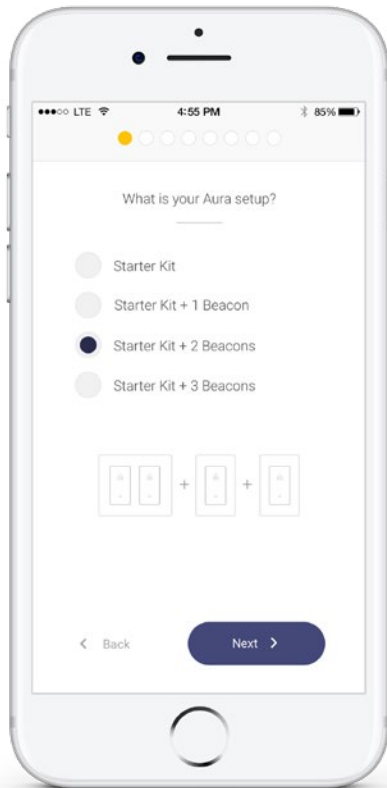

2. Once you've created your account, you'll receive an email from Aura Home Monitoring to verify your email address

Please note:

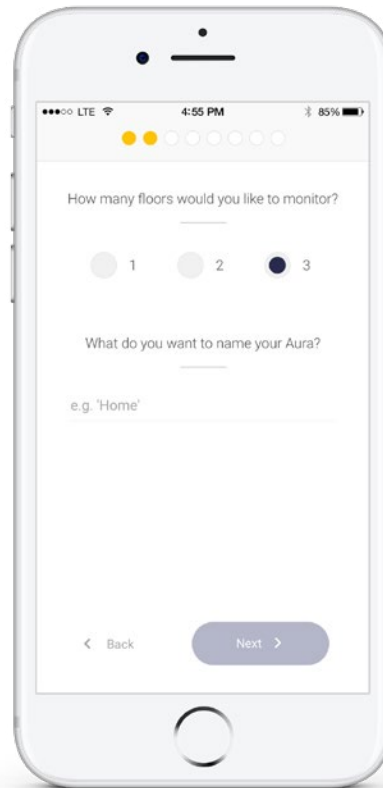

- You must verify your account or you will be locked out of the app after 24 hours
- The email verification link will work for 7 days after your account has been created
- If you did not receive an email, check your spam folder

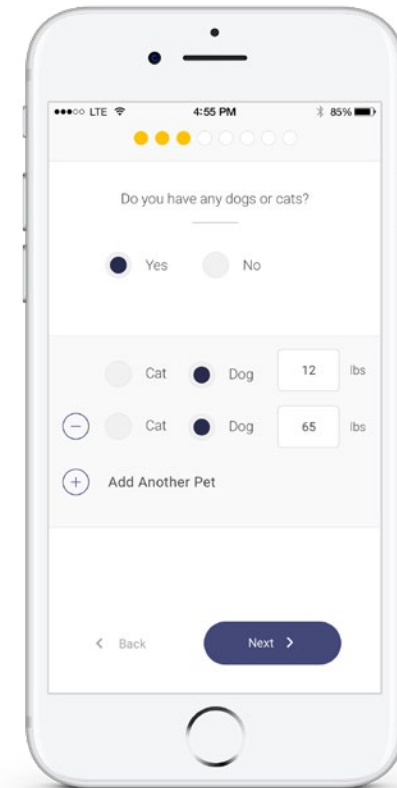

Setup Guide

3. Select the number of Aura Devices you have to set up (Starter Kit + Number of Accessory Beacon(s))

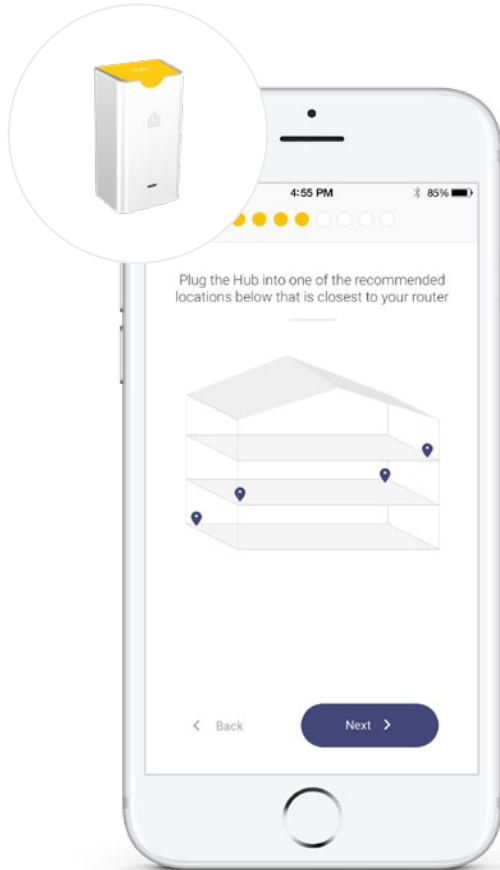

4. Select the number of floors you would like to monitor and name your Aura (e.g. Home)

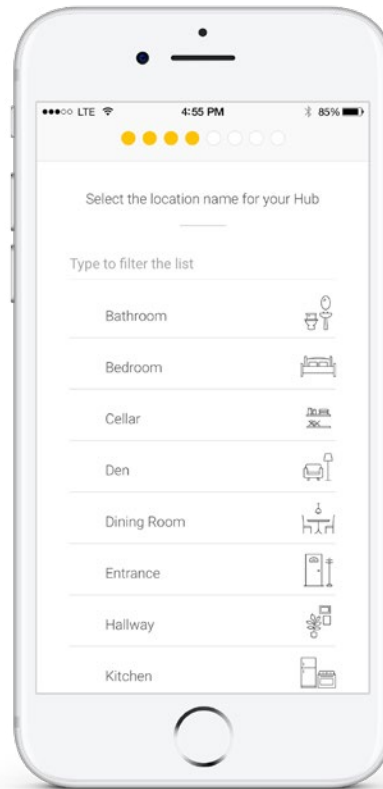

5. If you have have any dogs or cats, select yes and indicate the weight of each pet. This will be used to learn the pet movement in your home

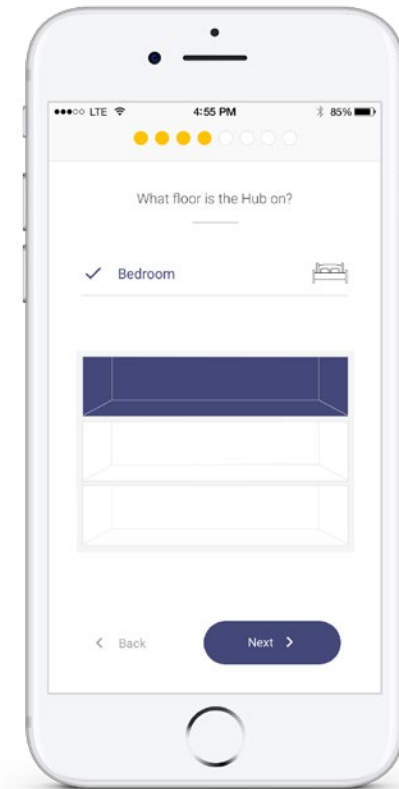

Setup Guide

6. Get the Hub (labelled with a yellow sticker) and plug it in following the suggested placement for your home

7. Select a room name for the Hub

8. With multiple floors, indicate which floor the Hub is located on
9. Select "Next" when the LED is flashing purple

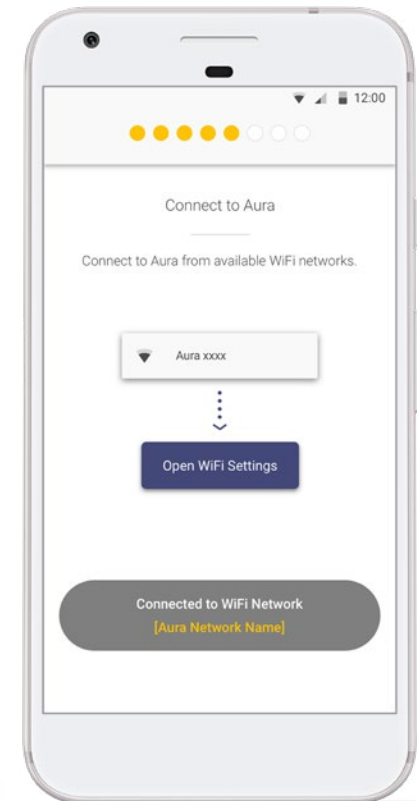

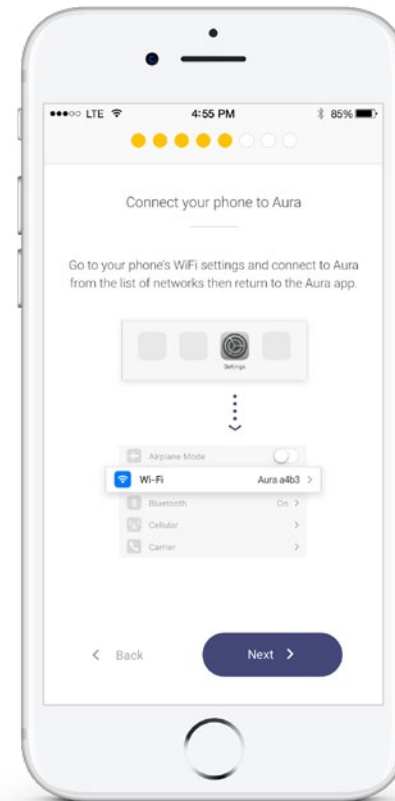

10. Connect your phone to Aura

Android:

1. Tap the "Go to WiFi Settings" button. This will take you to your phone Wi-Fi Settings
2. Select Aura from the list of networks. You will receive a notification that the network has no Internet access
3. Select "Yes", and "Don't Ask Again" for this Network if prompted

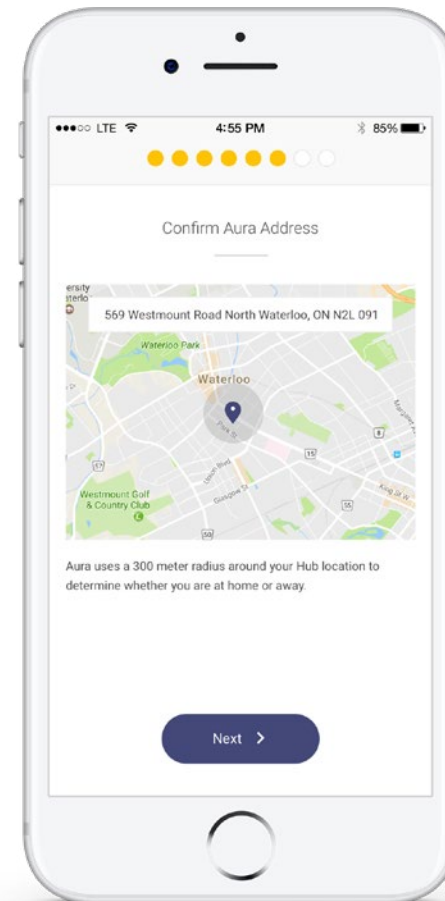

iOS:

1. Exit the Aura app when prompted during setup
2. Go to your phone WiFi Settings
3. Select Aura from the list of available networks
4. Once connected, return to the Aura app

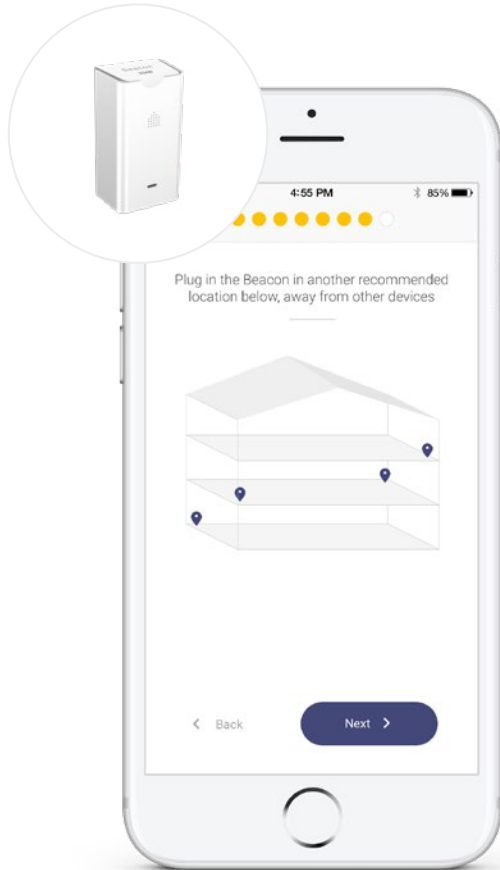

11. Confirm Aura address

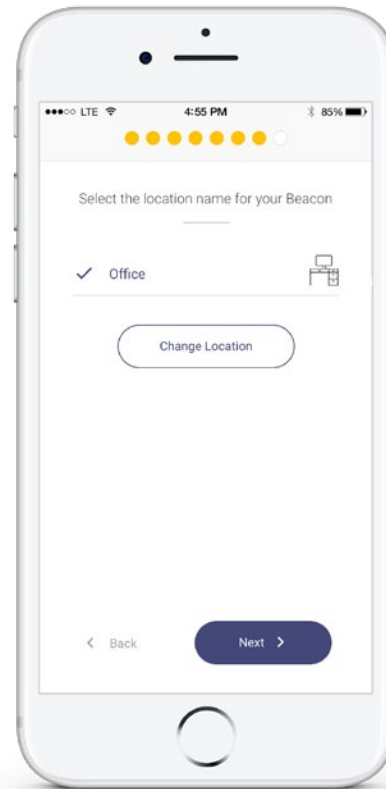

Enter the street address of the location of the Hub. It is important that you put in the correct address to enable the Auto Away feature and see Members as they arrive and leave

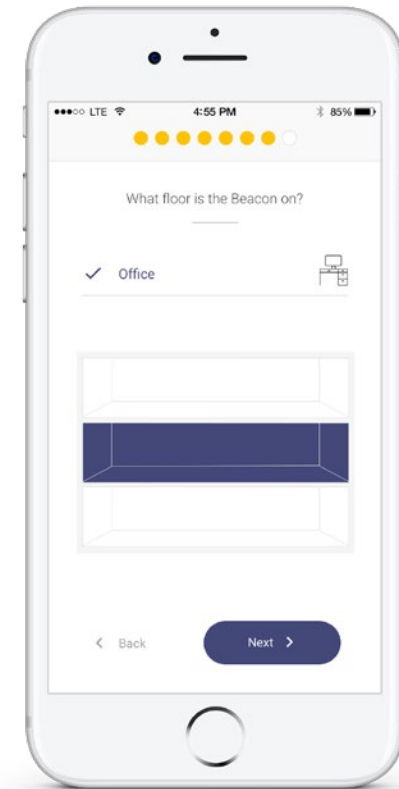

Setup Guide

12. Get your Beacon (labelled with a white sticker) and plug it in following the suggested placement for your home

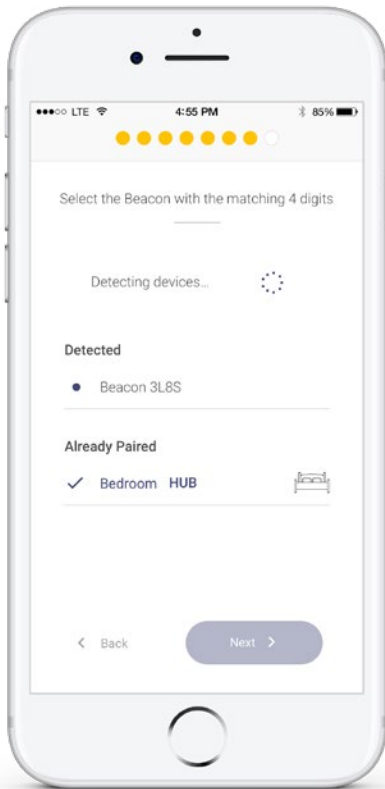

13. Select a room name for your Beacon

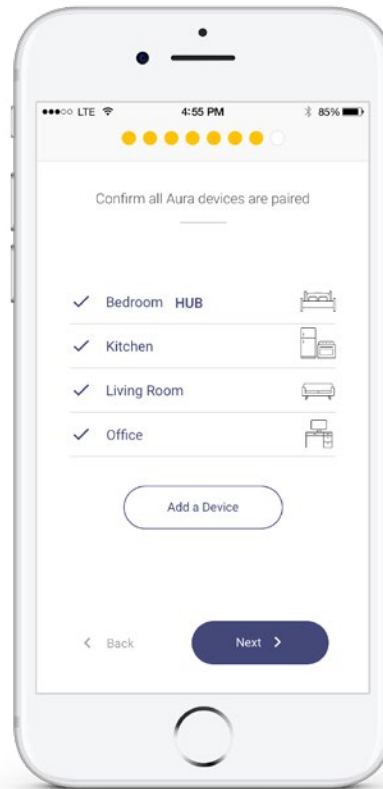

14. With multiple floors, indicate which floor the Beacon is located on

15. Select "Next" when the LED is flashing purple

Setup Guide

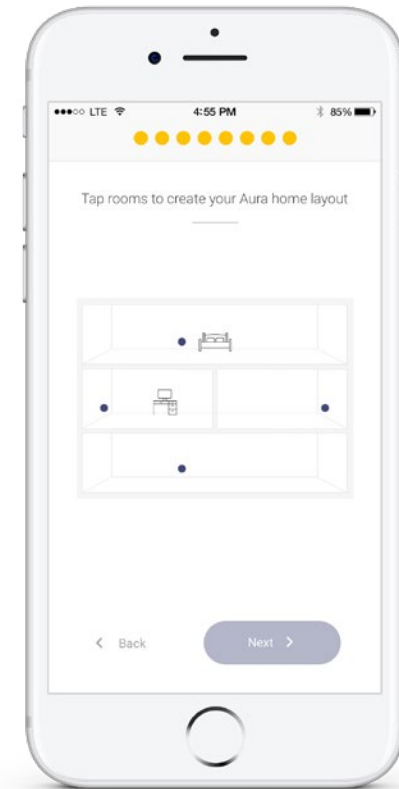

16. Select the Beacon from the list with the matching 4 digit label

17. Click "Add a Device" if you have multiple Beacons and repeat steps 12-16

18. Once all devices have been paired, click "Next"

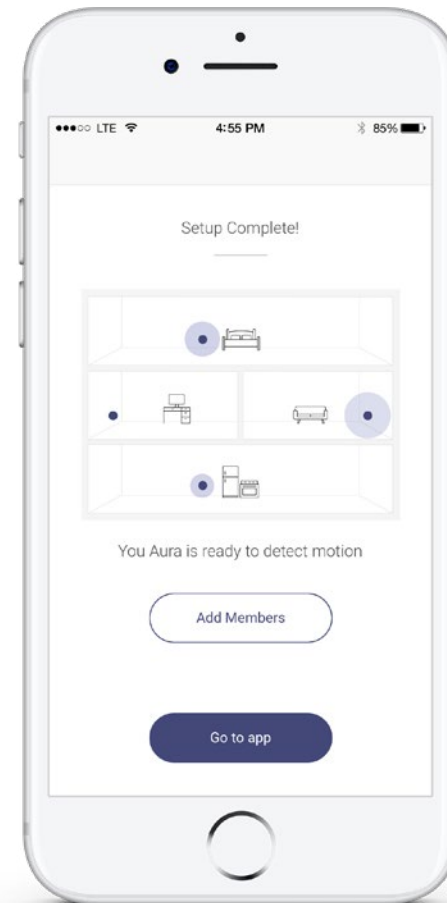

19. Tap rooms to create your Aura home layout

Setup Complete!

Add Members or go to the app to view live motion.

Keep the completed Placement Card for future reference.
