### Experience

#### Dark Leap (Tech-driven startup)

Software Developer & Designer / Remote / Apr 2023 - Ongoing

- Developed dynamic, responsive web applications using Next.js
- Optimized web applications for speed, SEO, and mobile responsiveness
- Developed cross-platform apps for PC, Android, and iOS using Unity and C#
- Worked on UI/UX design for apps and web projects

#### DeSophy (NYC-based creative agency)

Web Developer & Designer / Remote / Feb 2019 - Apr 2023

- Designed and built websites for commercial real estate clients
- Developed branding identities and marketing materials
- Elevated skills in JavaScript, React, and overall web development
- Played a key role in growing the Web Development & Graphics Design division

#### Andon Creative Design (Dubai-based agency)

Digital Designer & Developer / On-site / Oct 2018 - Feb 2019

- Designed and developed websites for clients like Fly Emirates and Mubadala
- Created dynamic online experiences using HTML, CSS, JavaScript
- Worked on design projects that communicated brand and mission effectively

#### Ariel Property Advisors (NYC-based real estate firm)

Graphic Designer / Remote / Aug 2014 - Sep 2018

- Designed marketing materials for properties worth \$100M+
- Maintained and enhanced company branding and website

#### Hyperoptic Ltd. (UK-based telecom company)

Creative Executive / On-site / Jul 2016 - Feb 2017

- Led redesign of company website to improve usability and appeal
- Created marketing materials for rebranding and outreach efforts

### Selected Projects

#### Difinery (dev—difinery.netlify.app)

Next JS, React, Shopify API, Contentful

Designed and developed a custom e-commerce platform for a jewelry store. Created the design in Adobe XD, with a Next.js front-end and Shopify backend for product management and transactions.

#### Dark Leap Website (darkleap.dev)

Next JS, React, TypeScript, Contentful

Website for a digital agency startup. Integrated Google Analytics and optimized user experience through data-driven improvements based on site performance.

#### Changements (changements.org)

Next JS, React, Contentful, Firebase

Developed a platform for a non-profit organization, enabling non-profits to register and promote their programs, while facilitating seamless direct donations from donors.
