

London Borough of Camden

The London Borough of Camden provides a range of services to over 215,000 residents in Greater London.

Customer requirements

The London Borough of Camden (LBoC) contacted Drax Electric Vehicles to take advantage of the Government's depot charging scheme grant to install EV charging infrastructure at its Holmes Road depot.

In the summer of 2025, the UK Government announced a £30 million depot charging scheme. The scheme offered businesses and local authorities fleets up to 75% off eligible project costs for installing the necessary infrastructure for charging zero-emission heavy goods vehicles (HGVs), vans, and coaches.

Location

- Holmes Road Depot, Camden
- Work began 2 March 2026 and completed by 31 March government deadline
