## Fixing your customers' costs, for budget certainty

Wouldn't it be good for your customers to gain more control of their energy costs?

We've revamped our Fixed products to offer a clearer set of choices.

Select the product from our range that best suits each customer's operational and financial needs, while bearing in mind their attitude to risk.

### More about TPCs

Your customers' bills include wholesale electricity costs as well as the third party costs (TPCs) that allow for the operation and maintenance of the UK energy system. And it's these TPCs - currently making up around 60% of the bill's total - that our Fixed range can help your customers manage better.

For a more detailed breakdown of TPCs and wholesale costs, check out the latest edition of our ['Electricity Prices Explained' guide](#) at [energy.drax.com](http://energy.drax.com).

# Pick to Fix

Here's a summary of our three Fixed products:

## Fix For Good

Just as the name suggests, all of your customer's costs are fixed with Fix for Good. We nail down all the TPCs for the term of the contract, even if they increase to a level that's greater than our forecast. And, your customer will pay the same standing charge (SC) and unit rate throughout their contract.

Find out more on page 6.

## Fix Balance

Fixes the unit cost and SC for the duration of your customer's contract. We also fix the TPCs for the term, apart from in exceptional circumstances.

Discover more on page 8.

## Fix Clarity

Fixes your customer's wholesale costs but passes through their third party charges. These TPCs will change regularly and may go up or down.

More on page 10

## Fix For Good

If budget certainty is important to your customer's business, Fix For Good is the electricity supply product they need. It fixes their wholesale energy costs - i.e. the unit rate and Standing Charge (SC) - and all their TPCs for the duration of each contract.

### Who's it for?

Fix For Good is available for all Non Half Hourly (NHH) and Half Hourly (HH) customers wanting budget certainty.

### What's next?

To get a quote for one of your customers, please get in touch with your Account Manager or email [core.brokers@drax.com](mailto:core.brokers@drax.com).

## Fix Balance

If your customers want the security of a fixed price at a lower cost than our Fix For Good product, Fix Balance could be the right choice.

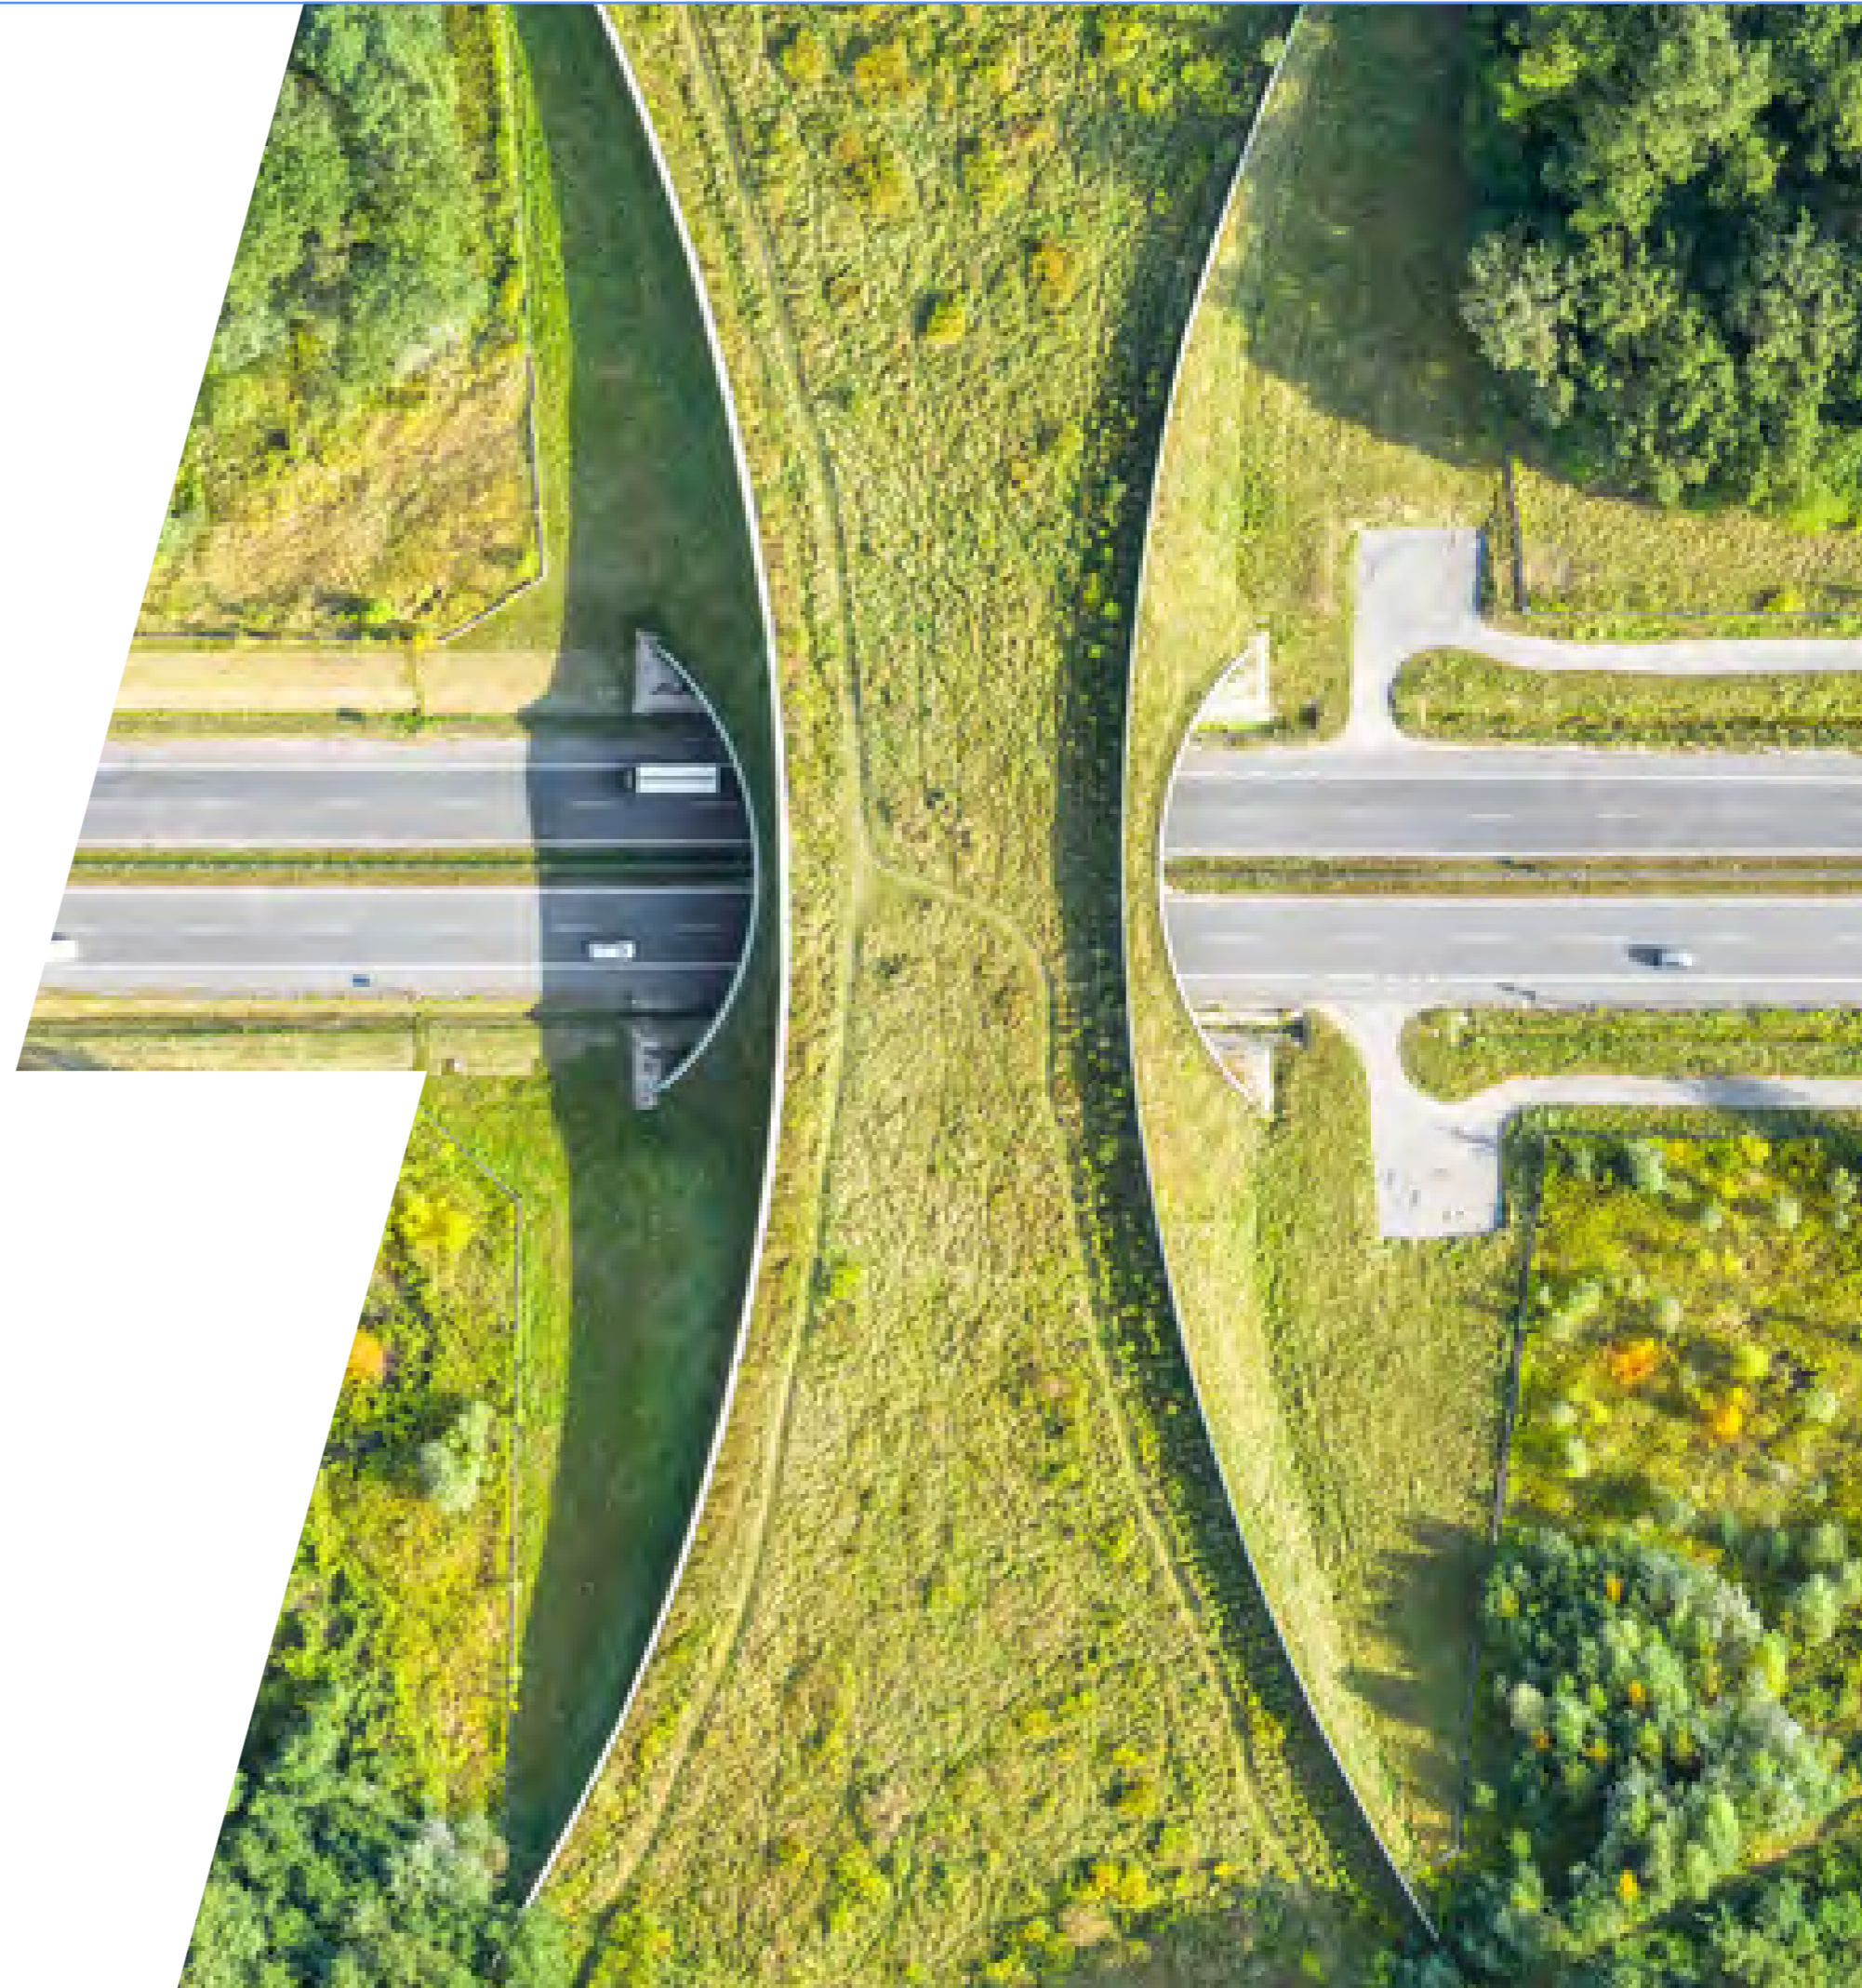

This product fixes wholesale prices for the duration of your customer's contract, although we reserve the right to amend existing (or add in new) TPCs in exceptional circumstances.

### Who's it for?

Our Fix Balance product is available to all customers with NHH and HH meter types who want budget certainty but also understand that, in exceptional circumstances, the costs within the contract may have to change.

### What's next?

To get a quote for one of your customers, please get in touch with your Account Manager or email [core.brokers@drax.com](mailto:core.brokers@drax.com).

## Fix Clarity

This product gives your customers the security of a fixed wholesale energy price and the opportunity to make the most of the highs and lows of TPCs. It fixes their wholesale costs but passes through their TPCs, which are likely to change regularly and may go up or down.

### Who's it for?

Only customers with HH meters are eligible for this product. Your customer's bill will include a breakdown of the TPCs we've passed through.

### What's next?

To get a quote for one of your customers, please get in touch with your Account Manager or [email core.brokers@drax.com](mailto:email.core.brokers@drax.com).

# Which TPCs get fixed?

Use the table below to compare how each of our fixed products handles TPCs.

| TPC  | Fix For Good | Fix Balance | Fix Clarity  |
|--|--------------|-------------|--------------|
| Contracts for Difference (CfD)             | Fixed        | Fixed       | Pass through |
| Capacity Market (CM)                       | Fixed        | Fixed       | Pass through |
| Feed in Tariff (FIT)                       | Fixed        | Fixed       | Pass through |
| Transmission Network Use of System (TNUoS) | Fixed        | Fixed       | Pass through |
| Distribution Use of System (DUoS)          | Fixed        | Fixed       | Pass through |
| Balancing Services Use of System (BSUoS)   | Fixed        | Fixed       | Pass through |
| Renewables Obligation (RO)                 | Fixed        | Fixed       | Pass through |
| Distribution Losses                        | Fixed        | Fixed       | Fixed        |
| Transmission Losses                        | Fixed        | Fixed       | Fixed        |
| EI support levy                            | Fixed        | Fixed       | Pass through |
| Nuclear RAB                                | Fixed        | Fixed       | Pass through |

**Note:**

With our Fixed products, we pass through the following TPCs: Meter Operator (MOP) charges; reactive power (also known as power factor); the Climate Change Levy (CCL); VAT.

# Our services

As well as supplying renewable electricity via a range of Fixed (and Flex) products, our energy experts can also support your customers in reducing - and optimising - their power consumption and energy costs.

**We provide:**

**EV charging infrastructure installation and maintenance, plus fleet management services**

On-site charging and EV fleet optimisation can help your customers save time and money.

**Power Purchase Agreements and Corporate PPAs**

If your customers generate and want to sell their own power, or to use other generators' electricity, we're ready to help.

**Energy optimisation**

We can support your customers in finding the operational flexibility to reduce power consumption and costs. We can also provide demand management services that give them an opportunity to make money from their actions.

**Emissions benchmarking and reporting**

We have solutions for customers needing support with their Scope 1, 2 and 3 reporting, and with the purchase of carbon credits.
