

Monash Biotech **PZD** Micropipettes

PZD (Partial Zona Dissection) micropipettes are used in blastomere biopsy and mechanical hatching techniques for physically piercing the zona pellucida. Monash Biotech PZD micropipettes are pulled with a long thin taper to a sharp point.

PZD Micropipettes (10 per box) *

Catalogue No.	Description
MBPZ-00	Straight
MBPZ-15	15° angled
MBPZ-20	20° angled
MBPZ-25	25° angled
MBPZ-30	30° angled
MBPZ-35	35° angled
MBPZ-40	40° angled
MBPZ-45	45° angled

- * micropipettes are individually packed and sterile
- * measurement tolerance $\pm 5\%$
- * Taper length 600 μ m
