# Transformation Process

## Kick-Off & Data Upload

- Verify integrations, including third party
- Set Go Live date

## Infrastructure Setup & Data Migration

- Migration is performed to fit your schedule
- Minimal downtime, no reimplementation

## Customer Validation & Testing

- Trimble Viewpoint's dedicated transformation team handles any testing concerns

## Go Live

- Data is refreshed
- No major changes to employee interaction
- All ERP modules are unlocked
- Cloud-only features are accessible, like Automatic Invoicing, On-Demand Licenses, Single Sign-On, Multi-Factor Authentication, Work Center & Trimble Construction One Analytics
- Handoff to customer

## Post Go Live

- Security: Data is backed up in three geographically diverse facilities. Trimble Construction One customer data is backed up with a recovery point objective of one hour.
- Hardware: Without Trimble Viewpoint servers to maintain, free up valuable resources to apply to higher value activities.
- Software: Continue using Trimble Viewpoint's ERP, while exploring new modules and cloud-only features.
- Business Processes: Access Trimble Construction One anywhere, anytime with an internet connection, allowing people to get their work done from where they are, from the office to the job trailer.
- Data: Discover insights with a secure data analytics platform with dashboards and web-enabled reports.
- Customer Success: Professional Services helps with remaining Viewpoint integrations. Plus, a dedicated Customer Success Manager provides support for six months after Go Live.

# About Trimble Construction One

**Trimble Construction One** is a connected, cloud based construction management platform that drives productivity, efficiency and accuracy at each phase of the construction project lifecycle. Using data from all phases of construction, Trimble Construction One connects teams with real-time information that shows true project costs and resource allocation so they get the right information at the right time to make the right decisions.
