

Trimble LogMAP

SOFTWARE

Ensure the right logs reach the
saw line on time

Trimble® LogMAP is a log yard management system designed specifically for saw-mills to manage sorted timber inventory. It serves as a warehouse management tool, supporting wheel loader operators, and provides real-time visibility into log locations and quantities in the yard.

Trimble LogMAP

Software

Feature Area and Capabilities	
Visual Yard Management	Map and table views showing log product locations and quantities in sorting bins and piles, providing real-time inventory visibility.
Movement Monitoring	Ensures correct transfers from sorting bins to log warehouses and from warehouses to production, guiding wheel loader operators and preventing errors.
Operational Intelligence	Sorting bin fill rate monitoring, pile age tracking, and customizable map modifications to optimize yard operations and prevent production line stoppages.
Integrations	API interface for receiving log data for sorting bins and production plans, including log products to be sawn and quantities.
Movement Accuracy and Verification	Ensures logs are transferred to correct warehouses and that the right log products reach production according to sawing schedules.
Machine Positioning	Real-time location tracking of wheel loaders on the yard map for better coordination.
Sorting Bins Fill Rates	Monitoring of sorting bin fill rates to maximize sorting line capacity utilization.
Pile Age Tracking	Average pile age tracking helps manage log freshness and prevent quality degradation.
Map Customization	Users can make their own pile changes and map modifications without requiring technical supports.

Technical Details	
Technical Characteristics	Technical Requirements
Delivered as SaaS (Software as a Service)	Windows 10 or newer
24/7 monitored cloud services on the AWS Europe platform	Memory: 8GB DDR4
Data stored in the EU region	Disk space: 256GB PCIe NVMe SSD
Trimble SSO authentication with two-factor authentication via a mobile application	Browser: Latest version of Chrome
	GPS antenna: Trimble AX940, AX940i or BX992 + AV28
